## **Differential Equations from the Algebraic Standpoint**

Mar 26 2020 This book can be viewed as a first attempt to systematically develop an algebraic theory of nonlinear differential equations, both ordinary and partial. The main goal of the author was to construct a theory of elimination, which "will reduce the existence problem for a finite or infinite system of algebraic differential equations to the application of the implicit function theorem taken with Cauchy's theorem in the ordinary case and Riquier's in the partial." In his 1934 review of the book, J. M. Thomas called it "concise, readable, original, precise, and stimulating", and his words still remain true. A more fundamental and complete account of further developments of the algebraic approach to differential equations is given in Ritt's treatise *Differential Algebra*, written almost 20 years after the present work (Colloquium Publications, Vol. 33, American Mathematical Society, 1950).

Mathematics for the IB Diploma: Higher Level with CD-ROM

Sep 12 2021 This title forms part of the completely new Mathematics for the IB Diploma series. This highly illustrated coursebook, available in both print and e-book formats, has been written to specifically cover the new IB Higher Level syllabus. Based on the new group 5 aims, the progressive approach encourages cumulative learning. Features include: a dedicated chapter exclusively for combined exercises; plenty of worked examples; questions colour-coded according to grade; exam-style questions; feature boxes of hints and tips. The print book includes a CD-ROM providing a complete e-version of the book, all the options chapters, extension worksheets, prior learning sheets, calculator skills sheets and fill-in proofs. These additional materials are also included in the e-book version.

*Rules and Reasoning* Oct 21 2019 This book constitutes the proceedings of the International Joint Conference on Rules and Reasoning, RuleML+RR 2019, held in Bolzano, Italy, during September 2019. This is the third conference of a new series, joining the efforts of two existing conference series, namely “RuleML” (International Web Rule Symposium) and “RR” (Web Reasoning and Rule Systems). The 10 full research papers presented together with 5 short technical communications papers were carefully reviewed and selected from 26 submissions.

Master the Firefighter Exam: Test Preparation Jan 16 2022 Peterson's Master the Firefighter Exam: Test Preparation is the coaching program for taking the firefighter exam. This

section analyzes each section of the typical firefighter exam, including reading comprehension, reasoning and judgment, spatial orientation, observation and memory, and mechanical reasoning. Test-takers will find powerful strategies for attacking every question type they'll encounter on the actual exam. Peterson's Master the Firefighter Exam shows readers what to expect on their written firefighter exam and helps them understand the subjects covered. For more information see Peterson's Master the Firefighter Exam.

Financial Planning Answer Book (2009) Feb 05 2021

Covering the five key areas of financial planning, this guide emphasizes its technical, tax, and regulatory aspects. The areas of discussion include investments, employee benefits and retirement plan assets, insurance, income tax and estate planning, and regulatory issues.

**Flexible Query Answering Systems** Jul 30 2020 This volume constitutes the Proceedings of the 8th International Conference on Flexible Query Answering Systems, FQAS 2009, held in Roskilde, Denmark, October 26–28, 2009. FQAS 2009 was preceded by the 1994, 1996 and 1998 editions held in Roskilde, Denmark, the FQAS 2000 held in Warsaw, Poland, the 2002 held in Copenhagen, Denmark, and the 2004 and 2006 editions held in Lyon, France, and in Milan, Italy, respectively. FQAS is the premier conference concerned with the very important issue of providing users of information systems with flexible querying capabilities, and with easy and intuitive access to information. The main objective is to achieve more expressive, informative, cooperative, and productive systems which facilitate retrieval from information

repositories such as databases, libraries, heterogeneous archives and the World-Wide Web. In targeting this objective, the conference draws on several research areas, such as information retrieval, database management, information filtering, knowledge representation, soft computing, management of multimedia information, and human-computer interaction. The conference provides a unique opportunity for researchers, developers and practitioners to explore new ideas and approaches in a multidisciplinary forum. The overall topic of the FQAS conferences is innovative query systems aimed at providing easy, flexible and human-friendly access to information. Such systems are becoming increasingly important also due to the huge and always growing number of users as well as the growing amount of available information.

**Logic Based Program Synthesis and Transformation**

Nov 21 2019 This book constitutes the thoroughly refereed post-proceedings of the 15th International Symposium on Logic Based Program Synthesis and Transformation, LOPSTR 2005, held in September 2005. The 10 revised full papers presented together with one invited talk were carefully selected and revised from 33 submissions. The papers are organized in topical sections on tools for program development, program transformations, and software development and program analysis.

**Macroscopic Electrodynamics Instructor's Solutions Guide** Dec 23 2019 This instructor's solutions guide accompanies our introductory graduate electrodynamics textbook, "Macroscopic Electrodynamics". We emphasize that this is a guide and not a step-by-step exposition for the 391 problems furnished in the text. Helpful indications of starting points and methods are given, as well as enough intermediate steps (and occasional final results) that a knowledgeable instructor can readily fill in the gaps. This approach is designed to provide the instructor with a powerful and time-saving teaching aid for introducing students to this beautiful and wide-ranging subject. This access is given only to instructors who are adopting the textbook for their classes. To gain access to this title, please fill in the adoption form and we will get back to you soon. **Data Networks** Mar 06 2021 This classic textbook aims to provide a fundamental understanding of the principles that underlie the design of data networks, which form the backbone of the modern internet. It was developed through classroom use at MIT in the 1980s, and continues to be used as a textbook in MIT classes. The present edition also contains detailed high-quality solutions to all the end-of-chapter exercises. Among its major features the book: 1)

Describes the principles of layered architectures. 2) Explains the principles of data link control, with many examples and insights into distributed algorithms and protocols. 3) Provides an intuitive coverage of queueing, and its applications in delay and performance analysis of networks. 4) Covers the theory of multiaccess communications and local data networks. 5) Discusses in-depth theoretical and practical aspects of routing and topological design. 6) Covers the theory of flow control, emphasizing issues of congestion and delay in integrated high-speed networks.

Master the Firefighter Exam Sep 24 2022 Peterson's Master the Firefighter Exam provides an in-depth review of the firefighting profession and a thorough analysis of a typical firefighter exam. Peterson's guide helps readers navigate through the firefighter qualifying process, study for the written exam, and understand the subjects covered. In addition, Peterson's Master the Firefighter Exam contains five practice tests, which assist test-takers in assessing their weaknesses and building their confidence as they prepare for the exam. Peterson's Master the Firefighter Exam shows readers what to expect on their written firefighter exam and helps them understand the subjects covered.

Shape Understanding System Apr 19 2022 This book presents the results of research into one of the most complex and difficult areas - research into thinking and understanding. The research was carried out at the newly founded Queen Jadwiga Research Institute of Understanding and is focused on the problem of visual understanding and visual thinking.

The authors believe this is the first book to attempt to investigate the complexity of visual thinking problems in the context of building the thinking machine.
