Can politics deliver on the promise of justice? House of Cards depicts our worst fears about politics today. Love him or

loathe him, Frank Underwood has charted an inimitable course through Washington politics. He and his cohorts depict the darkest dealings within the gleaming halls of our most revered political institutions. The amoral machinations of Underwood, the ultimate anti-hero, serve as an ideal backdrop for a discussion of the political theories of philosophers as diverse as Plato, Aristotle, Nietzsche, Machiavelli, Hobbes, and Marx. From political and corporate ethics, race relations, and ruthless pragmatism to mass media collusion and sexual politics, these essays tackle a range of issues important not only to the series but to our understanding of society today. "The newbie investor will not find a better guide to personal finance." —Burton Malkiel, author of A RANDOM WALK DOWN WALL STREET TV analysts and money managers would have you believe your finances are enormously complicated, and if you don't follow their guidance, you'll end up in the poorhouse. They're wrong. When University of Chicago professor Harold Pollack interviewed Helaine Olen, an award-winning financial journalist and the author of the

bestselling Pound Foolish, he made an offhand suggestion: everything you need to know about managing your money could fit on an index card. To prove his point, he grabbed a 4" x 6" card, scribbled down a list of rules, and posted a picture of the card online. The post went viral. Now, Pollack teams up with Olen to explain why the ten simple rules of the index card outperform more complicated financial strategies. Inside is an easy-to-follow action plan that works in good times and bad, giving you the tools, knowledge, and confidence to seize control of your financial life. Originally published during the early part of the twentieth century, the Cambridge Manuals of Science and Literature were designed to provide concise introductions to a broad range of topics. They were written by experts for the general reader and combined a comprehensive approach to knowledge with an emphasis on accessibility. Earthworms and their Allies, written in 1912 by Frank E. Beddard, offers both an introduction to the principal facts about earthworms and an analysis of their distribution across the world. A deeply researched international history and "exemplary study" (New York Times Book Review) of how a divided world ended and our present world was fashioned, as the world drifts toward another great time of choosing. Two of America's leading scholar-diplomats, Philip Zelikow and Condoleezza Rice, have combed sources in several languages, interviewed leading figures, and drawn on their own firsthand experience to bring to life the choices that molded the contemporary world. Zeroing in on the key moments of decision, the might-have-beens, and the human beings working through them, they explore both what happened and what could have happened, to show how one world ended and another took form. Beginning in the late 1970s and carrying into the present, they focus on the momentous period between 1988 and 1992, when an entire world system changed, states broke apart, and societies were transformed. Such periods have always been accompanied by terrible wars -- but not this time. This is also a story of individuals coping with uncertainty. They voice their hopes and fears. They try out desperate improvisations and careful designs. These were leaders who grew up in a "postwar" world, who tried to fashion something better, more peaceful, more prosperous, than the damaged, divided world in which they had come of age. New problems are putting their choices, and the world they made, back on the operating table. It is time to recall not only why they made their choices, but also just how great nations can step up to great challenges. Timed for the thirtieth anniversary of the fall of the Berlin Wall, To Build a Better World is an authoritative depiction of contemporary statecraft. It lets readers in on the strategies and negotiations, nerve-racking risks, last-minute decisions, and deep deliberations behind the dramas that changed the face of Europe -- and the world -- forever. Includes: A 52-card Crystals Deck A 160-page Illustrated Book "When we were studying for the USMLE Step I (the "Boards"), we found that there was no single adequate source for the relevant pharmacology. Many review books were too sparse and telegraphic and left many questions unanswered. On the other hand, major pharmacology texts were too verbose and detailed to use to study for the Boards. We therefore decided to assemble our own summaries of the important drugs. Our goal was to create a reference work that emphasized the "high-yield" facts but was also complete enough to provide a conceptual framework for learning rather than simple memorization. We opted for an index card format to allow for both an "active" style of flashcard studying and flexible organization. The widespread use of PharmCards since the first edition was published is gratifying and confirmed the need for such a study aid. In this fifth edition, we have redrawn the figures and added full color to enhance their readability. We have expanded the class cards to provide greater detail on drugs for diabetes, lipids, and hepatitis C. We have maintained the grouping of drug cards by category (e.g., adrenergic, cholinergic, and so on) and then by class (e.g., [alpha]-agonists, [alpha]-antagonists, [beta]-agonists, and so on) as we have received positive feedback that this structure facilitates comparing and contrasting similar agents. Some drugs defy easy classification; in these cases, we have positioned them where we thought they would be most helpful for study. Also note that some diseases are treated with drugs that span drug categories (e.g.,

asthma and glaucoma). In these cases, we have listed on each card the name and class of the other relevant drugs to treat that disease"--Provided by publisher. A blistering narrative account of the negligence and greed that pushed all of Wall Street into chaos and the country into a financial crisis. At the beginning of March 2008, the monetary fabric of Bear Stearns, one of the world's oldest and largest investment banks, began unraveling. After ten days, the bank no longer existed, its assets sold under duress to rival JPMorgan Chase. The effects would be felt nationwide, as the country suddenly found itself in the grip of the worst financial mess since the Great Depression. And now, nearing the end of his life, Stanford is about to meet his firstborn daughter, Irene Paisley, a home

health aide who has unwittingly shown up for her first day of work to tend to the father she thought was dead. *These Ghosts Are Family* revolves around the consequences of Abel's decision and tells the story of the Paisley family from colonial Jamaica to present-day Harlem. There is Vera, whose widowhood forced her into the role of a single mother. There are two daughters and a granddaughter who have never known they are related.
