"Doc Childre's writing is eloquent, his wisdom is profound, and his easy way of communicating makes this book a treasure. His colleagues present the energy of the heart in the safety of a scientific context that invites us again and again to move beyond it." -- Gary Zukav, author *The Seat of the Soul* and *The Dancing Wu Li Masters*
Heart Intelligence, Connecting with the Intuitive Guidance of the Heart provides readers with a new, high definition picture of the energetic heart as a unifying, creative, intuitive intelligence that we can learn to draw on for moment to moment guidance. *Heart Intelligence* links the

physical heart to the spiritual (energetic) heart. Through its extensive communication with the brain and body, the heart is intimately involved in how we think, feel, and respond to the world. Expanding on their breakthrough book, *The HeartMath Solution*, the authors offer heart-based techniques and guidelines for living from the heart, which connects the puzzle pieces of our purpose and fulfillment. The book provides information and simple practices for accessing our heart's intuitive guidance to connect with our highest choices for better outcomes. Our choices are especially important through these changing times because they constantly create or disrupt our peace, happiness and self-security. Our thoughts and feelings influence the chemistry that regulates much of our health -- how we feel, for better or worse. Our thoughts, feelings, emotions and attitudes are just frequencies that we can learn to change -- once we put our heart into our intention. Heart Intelligence provides practices to replace fear with the attitude of intelligent concern (managed concern) which leaves us in charge and more attuned to intuitive direction. We learn the benefits of practicing simple coherence

techniques a few times a day for boosting resilience and emotional balance; making appropriate choices; and clearing our mind from anxiety or overwhelm when needed. It is through deepening our heart intelligence, coherence and connection that humanity will be able to shift from separation to cooperation resulting in higher solutions to our personal and global problems Brilliant? A genius? David Adam Smith had the brains of fifty men—very literally! This book provides an elegantly simple framework for overcoming the key challenges of life and is proven to bring about lasting change. Get a good night's rest—every night—without all the drama This TWO-IN-ONE EBOOK PACKAGE covers infancy to toddlerhood! Are you drowsing off as you read this? Current Topics Validity 12 Months "Artful Making" offers the first proven, research-based framework for engineering ingenuity and innovation. This book is the result of a multi-year collaboration between Harvard Business School professor Robert Austin and leading theatre director and playwright Lee Devin. Together, they demonstrate striking structural similarities between theatre artistry and production and today's business projects--and show how collaborative artists have mastered the art of delivering innovation "on cue," on immovable deadlines and budgets. These methods are neither mysterious nor flaky: they are rigorous, precise, and--with this book's help--absolutely learnable and reproducible. They rely on cheap and rapid iteration rather than on intensive up-front planning, and with the help of today's enabling technologies, they can be applied in virtually any environment with knowledge-based outputs. Moreover, they provide an overarching framework for leveraging the full benefits of today's leading techniques for promoting flexibility and innovation, from agile development to real options. Therapeutic parenting is a deeply nurturing parenting style, and is especially effective

for children with attachment difficulties, or who experienced childhood trauma. This book provides everything you need to know in order to be able to effectively therapeutically parent. Providing a model of intervention, *The A-Z of Therapeutic Parenting* gives parents or caregivers an easy to follow process to use when responding to issues with their children. The following A-Z covers 60 common problems parents face, from acting aggressively to difficulties with sleep, with advice on what might trigger these issues, and how to respond. Easy to navigate and written in a straightforward style, this book is a 'must have' for all therapeutic parents. The book ecosystem is radically changing, and libraries must change with it. This book tackles the controversial discussion about eBooks and explores librarian-driven solutions and visions for the future of libraries in the 21st century. *The eBook Revolution: A Primer for Librarians on the Front Lines* is exactly what its title promises: an essential resource for librarians facing the formidable task of coordinating the library-wide transition to eBooks and fielding questions from patrons about eBooks on a daily basis. After an

introduction that covers the basics of eBooks and current eBook technology, the author puts things into perspective, documenting the changes that have occurred over the past decade. She also delves into important eBook issues, identifying librarian-driven solutions and providing glimpses of what libraries in the near future will likely be like. The book examines perennially critical issues such as accessibility, resource sharing, and the digital divide within the context of eBook technology and provides a clear framework for discussing eBooks, thereby enabling readers to make informed decisions regarding their own organizations. The Solutions 2nd Edition Workbook supports the Student's Book content with plenty of extra practice and revision. In the past few years, going cloud native has been a big advantage for many companies. But it's a tough technique to get right, especially for enterprises with critical legacy systems. This practical hands-on guide examines effective architecture, design, and cultural patterns to help you transform your organization into a cloud native enterprise—whether you're moving from older architectures or creating new systems from scratch. By following Wealth Grid, a fictional company, you'll understand the challenges, dilemmas, and considerations that accompany a move to the cloud. Technical managers and architects will learn best practices for taking on a successful company-wide transformation. Cloud migration consultants Pini Reznik, Jamie Dobson, and Michelle Gienow draw patterns from the growing community of expert practitioners and enterprises that have successfully built cloud native systems. You'll learn what works and what doesn't when adopting cloud

native—including how this transition affects not just your technology but also your organizational structure and processes. You'll learn: What cloud native means and why enterprises are so interested in it Common barriers and pitfalls that have affected other companies (and how to avoid them) Context-specific patterns for a successful cloud native transformation How to implement a safe, evolutionary cloud native approach How companies addressed root causes and misunderstandings that hindered their progress Case studies from real-world companies that have succeeded with cloud native transformations

An infant bottle-feeding aversion is one of the most complex, stressful and confusing situations parents could face. Baby becomes distressed at feeding times and refuses to feed or eats very little despite obvious hunger. Why won't he/she eat? This is a question parents ask numerous health professionals while searching for a solution. Babies are typically diagnosed with one, two or three medical conditions to explain their aversive feeding behavior during brief appointments. Unfortunately, behavioral causes are often overlooked. Consequently, many parents don't receive an effective solution from the

health professionals they consult. This is why this book is so necessary. In *Your Baby's Bottle-feeding Aversion*, Rowena describes the various reasons babies display aversive feeding behavior, explains how the reader can identify the cause, and describes effective solutions. Included are step-by-step instructions on how to resolve a behavioral feeding aversion that occurs as a result of being repeatedly pressured to feed - the most common of all reasons for babies to become averse to bottle-feeding. *Your Baby's Bottle-feeding Aversion* provides practical professional feeding advice that not only makes good sense, it works! Unusually varied problems, with detailed solutions, cover quantum mechanics, wave mechanics, angular momentum, molecular spectroscopy, scattering theory, more. 280 problems, plus 139 supplementary exercises. INSTANT #1 NEW YORK TIMES BESTSELLER For the first time in seven years, Allie Brosh-beloved author and artist of the extraordinary #1 New York Times bestseller *Hyperbole and a Half*-returns with a new collection of comedic, autobiographical, and illustrated essays. *Solutions and Other Problems* includes humorous stories from Allie Brosh's childhood; the adventures of

her very bad animals; merciless dissection of her own character flaws; incisive essays on grief, loneliness, and powerlessness; as well as reflections on the absurdity of modern life. This full-color, beautifully illustrated edition features all-new material with more than 1,600 pieces of art. *Solutions and Other Problems* marks the return of a beloved American humorist who has “the observational skills of a scientist, the creativity of an artist, and the wit of a comedian” (Bill Gates). Praise for Allie Brosh’s *Hyperbole and a Half*: “Imagine if David Sedaris could draw...Enchanting.” –People “One of the best things I’ve ever read in my life.” –Marc Maron “Will make you laugh until you sob, even when Brosh describes her struggle with depression.” –Entertainment Weekly “I would gladly pay to sit in a room full of people reading this book, merely to share the laughter.” –The Philadelphia Inquirer “In a culture that encourages people to carry mental illness as a secret burden...Brosh’s bracing honesty is a gift.” –Chicago Tribune

CB Insights study suggests that 42% of startups fail because they do not identify the right need, in other words: there is no need for the startup or product in the first

place. The issue here is the lack of tools used to generate the ideas and validate those. Bottom line, this issue is about a structured approach to idea generation and problem-solving. Do you know that most people engaged in collective problem solving spend a lot of their valuable time in meetings, discussing ideas, which they think eventually do not add value to product or startup? Harvard Business Review survey suggests that 71% of managers feel that meetings do not help accomplish much, as they do not have specific templates and exercises to guide specific outcomes with engagement from participants. THE SOLUTION BOOK is going to help you in experimenting with ideas effectively by providing you steps on how to create a framework for coming up with new ideas and products, considering a variety of views, develop teamwork and collaboration keeping you better focused on your results and outcomes. The solution book consists of 101 easy to follow techniques on problem-solving and ideation. Startup, innovation and venture failures are expensive and justified only by lack of tools and data for analysis. The book caters to all stages in your lifecycle as a creative thinker and problem solver

with tools to optimize your resources, go beyond conventional solutions and experiment with divergent (out of the box) thinking thanks to Elina Kallas, a researcher on entrepreneurship education with European Commission and in entrepreneurship at Harvard University, and Vidyangi Patil, an interdisciplinary professional of Biomedical Engineering with an extensive startup and research experience.
