(From back cover). This comprehensive explanation of the U.S. government's role in economics will be an eye-opener for anyone who wants to understand exactly what the government does—and doesn't do—in this most critical area. • Covers all basic subjects in government economics, addressing the practical side of public economics as well as theory • Includes rarely discussed topics such as modeling and forecasting the macroeconomy, the development of official measures of well-being, and professional ethics for economists in federal service • Comments on

issues of particular interest to those in business including government intervention in small business lending, regulation of the banking industry, regulations governing securities transactions, outsourcing, and strategies for promoting U.S. competitiveness in world markets • Includes entries by leading experts such as Robert Lerman, president of the Society of Government Economists; Susan Offutt, chief economist of the Government Accountability Office; Paul Pautler, deputy director at the Federal Trade Commission; and Murray Weidenbaum, former chair of the President's Council of Economic Advisors Josephine Alibrandi is seventeen, and in her final year of school. Dealing with her mum and the ways of her Nonna are daunting enough as she prepares for her exams. But Josie is about to discover real life gets in the way of her carefully-made plans. Winner of Children's Book Council Queensland BILBY Awards: Older Reader 2000.... The Economics Skills and Activities Workbook is designed as workbook to guide students through their yr 11 Economics studies. The activities help the students understand the different issues and aspects of studying economics. The course is skills based. Through the workbook your students will learn the skills of an economist. To help your students develop these skills and discover the economy, the workbook has a number of activities for them to do in each topic. These activities include group work, problem solving, research activities, surveys, casestudies and statistical and graphical interpretation of important economic data. It also directs the students to other sources of information, especially on the internet. The answers for these activities are found at the end of each topic. There is also a glossary of terms that economists use when they are talking about the various issues that the students will study. The glossary can be found at the end of each topic's activities. Finally there are 20 multiple choice test questions at the end of each topic to assess how your students are progressing on their journey of discovery of the world of economics. These test questions are a similar format to what these students will face when they sit for their Higher School Certificate Examination in economics. Again the answers for these questions are found at the end of each topic. Your students can measure their success and find out their strengths and weaknesses. The activities workbook help the students understand the different issues and aspects of studying economics. The course is skills based. Through the workbook your students will learn the skills of an economist. To help your students develop these skills and discover the economy, the workbook has a number of activities for them to do in each topic. These activities include group work, problem solving, research activities, surveys, casestudies and statistical and graphical interpretation of important economic data. It also directs the students to other sources of information, especially on the internet. The answers for these activities are found at the end of each topic. Contains a comprehensive summary of the entire course, activities, glossary of terms and a list of websites. This book covers Preliminary Engineering Studies course for Year 11 students in NSW.
