The 2007-09

international financial crisis underscored the importance of reliable and timely statistics on the general government and public sectors. Government finance statistics are a basis for fiscal analysis and they play a vital role in developing and monitoring sound fiscal programs and in conducting surveillance of economic policies. The Government Finance Statistics Manual 2014 represents a major step forward in clarifying the standards for compiling and presenting fiscal statistics and strengthens the worldwide effort to improve public sector reporting and transparency. Isaac Albéniz is one of the most important figures in the history of Spanish music. A legendary child prodigy, he went on to become one of the leading concert pianists of his generation in Europe. However, he aspired to compose music rooted in the folklore of his native Spain, contributing seminal masterpieces that defined the sound of Spanish art music in the 20th century and served as an inspiration to his most eminent successors. This annotated bibliography and research guide provides an up-to-date and thorough presentation of all the sources any aficionado, performer, or scholar would need to deepen his or her understanding of this fascinating pianist and composer. Die Unterrichtung der Wähler durch die Fraktionen des Deutschen Bundestages und durch die Abgeordneten und Senatoren des U.S. Kongresses besitzt für den demokratischen Meinungsbildungsprozess der Bürger einen hohen Stellenwert. Deswegen haben die jeweiligen Gesetzgeber im Abgeordnetengesetz des Bundes und im U.S. Franking Privilege-Statut auch die staatliche Finanzierung dieser Art der politischen Kommunikation mit der Öffentlichkeit festgeschrieben. Gleichzeitig suchte man die Integrität des Wahlprozesses vor unzulässiger staatlicher Einflussnahme zu schützen, indem man die Notwendigkeit einer Abgrenzung zwischen zulässiger Unterrichtung und missbräuchlicher Inanspruchnahme öffentlicher Finanzmittel anerkannte und nicht zuletzt deren Prüfung durch eine Kontrollinstanz festlegte. Die Freiheit des

Meinungsbildungsprozesses soll gewahrt und die Chancengleichheit der sich zur Wahl stellenden politischen Parteien und Kandidaten im demokratischen Wettbewerb sichergestellt werden. Ein legislativer Rechtsvergleich zwischen Abgeordnetengesetz und U.S. Franking Privilege-Statut erlaubt eine erste Evaluierung der gesetzlichen Regelungen und behandelt die Frage, ob das Lösungskonzept der ausländischen Referenzordnung überzeugender ausfällt. So lassen sich für das nationale Lösungskonzept gegebenenfalls weitere - rechtspolitische - Anregungen herleiten, die einer Verbesserung des nationalen Rechtsrahmens dienen.

This book discusses the design of textile production within the framework Industry 4.0. Relevant research topics in the textile industry are identified and solutions are conceptualized, developed and implemented. This is followed by an evaluation of the solutions in which, among other things, the profitability is considered. Questions about the transfer of knowledge into the company complete the work.

Industry 4.0 in Textile Production provides a rich investigation into and survey of textile production. The informative cases studies, clear perspective, and detailed analysis make this book of great use to engineers, researchers and postgraduate students interested in the textile industry.

This book constitutes the revised selected papers of the 8th International Workshop on Data Privacy Management, DPM 2013, and the 6th International Workshop on Autonomous and Spontaneous Security, SETOP 2013, held in Egham, UK, in September 2013 and co-located with the 18th European Symposium on Research in Computer Security (ESORICS 2013). The volume contains 13 full papers selected out of 46 submissions and 1 keynote lecturer from the DPM workshop and 6 full papers together with 5 short papers selected among numerous submissions to the SETOP workshop. The papers cover topics related to the management of privacy-sensitive information and automated configuration of security, focusing in particular on system-level privacy policies, administration of sensitive identifiers, data

integration and privacy, engineering authentication and authorization, mobile security and vulnerabilities. This book provides state-of-the-art scientific and engineering research findings and developments in the area of mobile robotics and associated support technologies. The book contains peer reviewed articles presented at the CLAWAR 2010 conference. Robots are no longer confined to industrial manufacturing environments. A great deal of interest is invested in the use of robots outside the factory environment. The CLAWAR conference series, established as a high profile international event, acts as a platform for dissemination of research and development findings and supports such a trend to address the current interest in mobile robotics to meet the needs of mankind in various sectors of the society. These include personal care, public health, and services in the domestic, public and industrial environments. The editors of the book have extensive research experience and publications in the area of robotics in general and in mobile robotics specifically, and their experience is reflected in editing the contents of the book. Integrating Mental Health and Disability into Public Health Disaster Preparedness and Response brings together the fields of mental/behavioral health, law, human rights, and medicine as they relate to disaster planning and response for people with disabilities, mental and behavioral health conditions and chronic illness. Children and adults with disabilities, mental/behavioral health conditions and chronic illness remain more vulnerable to the negative effects of emergencies and disasters than the general population. This book addresses the effects of emotional trauma, personal growth and resilience, the impact on physical health and systems of care, and legal compliance and advocacy. Following a philosophy of whole community emergency planning, inclusive of people with disabilities, the book advocates for considering and addressing these issues together in an effort to ultimately lead to greater resilience for individuals with disabilities and the whole community. Provides a public health framework on the

phases of disasters, integrating mental health and disability into planning, responding to disasters, and recovering post disaster Offers solutions for disability and disaster needs, as well as planning and systems for service delivery at multiple levels, including individual, local, state and federal Provides global examples of real world tools, best practices and legal principles, allowing the reader to think about the role that disability and mental health play in disaster planning, response and recovery across the world Reflects the best thinking about disaster planning and response and disability-related issues and demonstrates new and creative ways of bringing together these fields to strengthen communities Explains how to set up and operate the IBM PC AT, introduces the BASIC programming language, and covers files, graphics, batch processing, and the TopView program Discover the joys of upholstery and bring new life to your worn-out furniture. With a few basic tools, an eye for color, and some ingenuity, you can customize your home with fabrics and textures that reflect your unique personality. This comprehensive guide features more than 900 photographs and includes five projects designed to teach you all you need to know to reupholster any piece of furniture. You'll soon be confidently stripping down old sofas, stuffing sagging ottomans, and revamping chairs with your own distinctive style. The ASEAN+3 Bond Market Guide series provides member-specific information on the investment climate, rules, laws, opportunities, and characteristics of local bond markets in Asia and the Pacific. It aims to help bond market issues, investors, and financial intermediaries understand the local context and encourage greater participation in the region's rapidly developing bond markets. This edition focuses on updates in the bond market in Indonesia since the publication of the ASEAN+3 Bond Market Guide for Indonesia in 2017. An automated general purpose system for analysis is presented. This system, identified by the acronym 'MAGIC' for 'Matrix Analysis via Generative and Interpretive Computations, ' provides a

flexible framework for implementation of the finite element analysis technology. Powerful capabilities for displacement, stress and stability analyses are included in the subject MAGIC System for structural analysis. The matrix displacement method of analysis based upon finite element idealization is employed throughout. Six versatile finite elements are incorporated in the finite element library. These are: frame, shear panel, triangular cross-section ring, toroidal thin shell ring, quadrilateral thin shell and triangular thin shell elements. These finite element representations include matrices for stiffness, incremental stiffness, perstrain load, thermal load, distributed mechanical load and stress.

Warship 2015 is devoted to the design, development and service history of the world's combat ships. Featuring a broad range of articles from a select panel of distinguished international contributors, this latest volume combines original research, new book reviews, warship notes, an image gallery and much more to maintain the impressive standards of scholarship and research from the field of warship history. This 37th edition features the usual range of diverse articles including: The Battleships of the Patrie Class; Postwar Weapons in the Royal Navy; The Tragedy of the Submarine Mariotte, Known as the 'Toothbrush'; and Developments in Modern Carrier Aviation. Contributors to Warship 2015 include Michele Cosentino, Peter Marland, Hans Lengerer and Aidan Dodson. Over the past years, a considerable amount of effort has been devoted, both in industry and academia, towards the development of basic technology as well as innovative applications for the Internet of Things.

Adaptive Middleware for the Internet of Things introduces a scalable, interoperable and privacy-preserving approach to realize IoT applications and discusses abstractions and mechanisms at the middleware level that simplify the realization of services that can adapt autonomously to the behavior of their users. Technical topics discussed in the book include: Behavior-driven Autonomous Services GAMBAS Middleware Architecture Generic and

Efficient Data Acquisition Interoperable and Scalable Data Processing Automated Privacy Preservation Adaptive Middleware for the Internet of Things summarizes the results of the GAMBAS research project funded by the European Commission under Framework Programme 7. It provides an in-depth description of the middleware system developed by the project consortium. In addition, the book describes several innovative mobility and monitoring applications that have been built, deployed and operated to evaluate the middleware under realistic conditions with a large number of users. Adaptive Middleware for the Internet of Things is ideal for personnel in the computer and communication industries as well as academic staff and research students in computer science interested in the development of systems and applications for the Internet of Things. A serious source of information for those looking to reverse engineer business deals It's clear from the current turbulence on Wall Street that the inner workings of its most complex transactions are poorly understood. Wall Street deals parse risk using intricate legal terminology that is difficult to translate into an analytical model. Reverse Engineering Deals on Wall Street: A Step-By-Step Guide takes readers through a detailed methodology of deconstructing the public deal documentation of a modern Wall Street transaction and applying the deconstructed elements to create a fully dynamic model that can be used for risk and investment analysis. Appropriate for the current market climate, an actual residential mortgage backed security (RMBS) transaction is taken from prospectus to model by the end of the book. Step by step, Allman walks the reader through the reversing process with textual excerpts from the prospectus and discussions on how it directly transfers to a model. Each chapter begins with a discussion of concepts with exact references to an example prospectus, followed by a section called "Model Builder," in which Allman translates the theory into a fully functioning model for the example deal. Also included is valuable VBA code and detailed explanation

that shows proper valuation methods including loan level amortization and full trigger modeling. Aside from investment analysis this text can help anyone who wants to keep track of the competition, learn from others public transactions, or set up a system to audit one's own models. Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file. In the present global context, some countries still face many challenges to bringing about inclusive, efficient, and environmentally sustainable development. Simultaneously, the stakes of survival are rising, as climate change exacerbates both environmental and social ills. Asia as a region is particularly vulnerable, as it is densely populated and includes both developed and developing countries. The Routledge Handbook of Sustainable Development in Asia seeks to examine these issues in depth. Presenting a comprehensive literature review, as well as numerous case studies, this book examines sustainable development from economic and social perspectives, as well as from an environmental viewpoint. Divided into seven parts, the topics addressed include: Environmental challenges Energy dependence and transition Economic justice Social welfare Sustainable governance Providing comprehensive coverage of a wide variety of countries in the region, this handbook will be useful for students and scholars of sustainable development, environment and society, and Asian Studies in general. The Gulf War bore witness to a number of deadly encounters between these two great adversaries. Heavily armoured, highly mobile and capable of killing at over 2500m the M1 Abrams is, to this day, a veritable fighting machine. Superior to both Iraq's Soviet era T-55 and T-62 tanks, nearly all sources claim that no Abrams tank has ever been destroyed by enemy fire. Despite entering service in 1980, the M1 Abrams remained untested in combat until the Gulf War in 1991, where it was to be confronted by its archenemy the Iraqi-assembled Soviet-designed T-72. Entering production in 1971, the T-72 arguably outstripped its contemporaries in a balance of

mobility, protection and firepower. By the time of Operation Desert Storm, however, the tables had turned and the tank suffered due to low quality ammunition and poorly trained crews. In this fascinating study, Steven Zaloga pits these two great fighting machines against one another, plotting the development of the Cold War until both tanks met in combat in the deserts of Iraq and Kuwait.
