The Alcoholic Family Jun 20 2020 This pathbreaking book paints a radical new picture of alcoholism, offering powerful evidence that most chronic alcoholics live out their lives in intact, relatively quiet family environments. The authors show, however, that living in an alcoholic family—in which alcoholism is the central theme around which family life is organized—has profound effects on family members both drinkers and nondrinkers.

Tourism, Creativity and Development Dec 15 2019 Destinations across the world are beginning to replace or supplement culture-led development strategies with creative development. This book critically analyzes the impact and effectiveness of creative strategies in tourism development and charts the emergence of 'creative tourism'. Why has 'creativity' become such an important aspect of development strategies and of tourism development in particular? Why is this happening now, apparently simultaneously, in so many destinations across the globe? What is the difference between cultural tourism and creative tourism? These are among the important questions this book answers. It critically examines the developing relationship between tourism and creativity, the articulation of the 'creative turn' in tourism, and the impact this has on theoretical perspectives and practical approaches to tourism development. A wide range of examples from Europe, North America, Asia, Australia and Africa explore the interface between tourism and creativity including: creative spaces and places such as cultural and creative clusters and ethnic precincts; the role of the creative industries and entrepreneurs in the creation of experiences; creativity and rural areas; the 'creative class' and tourism; lifestyle, creativity and tourism and marketing creative tourism destinations. The relationship between individual and collective forms of creativity and the widely differing forms of modern tourism are also discussed. In the concluding section of the book the contribution of creativity to tourism and to development strategies in general is assessed, and areas for future research are outlined. The diverse multidisciplinary contributions link theory and practice, and demonstrate the strengths and weaknesses of creativity as a tourism development strategy and marketing tool. It is the first exploration of the relationship between tourism and creativity and its consequences for tourism development

in different parts of the world.

Consumer Culture Mar 30 2021 "A thorough and wide-ranging synthetic account of social scientific research on consumption which will set the standard for the second generation of textbooks on cultures of consumption." - Alan Warde, University of Manchester

"The multi-disciplinary nature of the book provides new and revealing insights, and Sassatelli conveys brilliantly the heterogeneity and ambivalent nature of consumer identities, consumer practices and consumer cultures... Newcomers to consumer culture will find this an invaluable primer and introduction to the major concepts and ideas, while those familiar with the field will find Sassatelli's sharp analysis and discussion both refreshing and inspiring." - James Skinner,

Journal of Sociology "This is a model of what a text book ought to be. Over the past decade the original debates about consumption have been overlaid by a vast amount of detailed research, and it seems unimaginable that a single text could do justice to all of these. To do so would involve as much a commitment to depth as to breadth. I was quite astonished at how well Sassatelli succeeds in balancing the two... Ultimately, it's the book that I would trust to help people digest what we now have discovered about consumption and start from a much more mature and reflective foundation to consider what more we might yet do." - Daniel Miller, *Material World* Showing the cultural and institutional processes that have brought the notion of the 'consumer' to life, this book guides the reader on a comprehensive journey through the history of how we have come to understand ourselves as consumers in a consumer society and reveals the profound ambiguities and ambivalences inherent within. While rooted in sociology, Sassatelli draws on the traditions of history, anthropology, geography and economics to provide: a history of the

rise of consumer culture around the world a richly illustrated analysis of theory from neo-classical economics, to critical theory, to theories of practice and ritual de-commoditization a compelling discussion of the politics underlying our consumption practices. An exemplary introduction to the history and theory of consumer culture, this book provides nuanced answers to some of the most central questions of our time.

L'Europa dei territori. Etica economica e sviluppo sociale nella crisi Jan 08 2022 I saggi che compongono questo libro traggono spunto in particolare dalla domanda seguente: quali forme assumerà nel prossimo futuro l'interazione tra i territori produttivi e lo scenario di governance continentale che di fatto li racchiude? Senza assumere una prospettiva analitica basata sul breve termine ed immediatamente applicabile in termini di politiche pubbliche, gli autori cercano di costruire un dialogo fra approcci scientifici diversi che spaziano dall'economia politica alla sociologia dell'ambiente, dalla geografia economica alla filosofia morale. L'Europa dei territori, infatti, non è che l'esito – sempre reversibile e comunque percorso da conflitti di varia natura ed intensità – di complessi processi socio-economici che devono ancora essere compresi a fondo. Pensare le traiettorie di sviluppo future dei territori europei, e le eventuali forme di mediazione e collaborazione che li caratterizzeranno, richiede non solo la presa d'atto delle trasformazioni epocali che hanno investito il lavoro, il welfare ed il territorio, ma anche uno sforzo collettivo che sappia immaginare ed agire un modello di sviluppo altro, radicato nei principi di giustizia sociale ed ambientale. Se, parafrasando un lungimirante Pasolini, gli italiani sono diventati consumisti in seguito ad una nefasta “rivoluzione antropologica”, allora bisognerà trovare il coraggio e la forza di invertire e rilanciare quel processo, stavolta in direzione di una sostenibilità concreta, diffusa e solidale; così che l'ambito economico sia funzionale ad un abitare autenticamente umano.

Communicating Specialized Knowledge Apr 18 2020 This book was born out of the idea that domain-specific knowledge has two major dimensions, since, on the one hand, peer-to-peer communication is primarily intended to further research within

specific disciplines, while, on the other, domain-external, asymmetric communication of ‘filtered’ knowledge caters to different types of lay-audiences. Collectively, the chapters in the volume take the reader on a journey through knowledge communication and knowledge (re)presentation strategies that are able to successfully disseminate and communicate. The domains under scrutiny are medicine and health, corporate communication, cultural heritage and tourism. A number of issues are addressed at the interface of corpus linguistics, genre studies and multimodal analysis. The variety of questions posed and methods used to explore corpus data will contribute to further debate among scholars in applied linguistics, sociolinguistics, multimodality, media studies and computer-mediated communication.

Mobile Lives Oct 13 2019 How should we understand the personal and social impacts of complex mobility systems? Can lifestyles based around intensive travel, transport and tourism be maintained in the 21st century? What possibility post-carbon lifestyles? In this provocative study of "life on the move", Anthony Elliott and John Urry explore how complex mobility systems are transforming everyday, ordinary lives. The authors develop their arguments through an analysis of various sectors of mobile lives: networks, new digital technologies, consumerism, the lifestyles of 'globals', and intimate relationships at-a-distance. Elliott and Urry introduce a range of new concepts – miniaturized mobilities, affect storage, network capital, meetingness, neighbourhood lives, portable personhood, ambient place, globals – to capture the specific ways in which mobility systems intersect with mobile lives. This book represents a novel approach in "post-carbon" social theory. It will be essential

reading for advanced undergraduate students, postgraduates and teachers in sociology, social theory, politics, geography, international relations, cultural studies, and economics and business studies.

Migration and Agriculture Nov 13 2019 In recent years, Mediterranean agriculture has experienced important transformations which have led to new forms of labour and production, and in particular to a surge in the recruitment of migrant labour. The Mediterranean Basin represents a very interesting arena that is able to illustrate labour conditions and mobility, the competition among different farming models, and the consequences in terms of the proletarianization process, food crisis and diet changes. Migration and Agriculture brings together international contributors from across several disciplines to describe and analyse labour conditions and international migrations in relation to agri-food restructuring processes. This unique collection of articles connects migration issues with the proletarianization process and agrarian transitions that have affected Southern European as well as some Middle Eastern and

Northern African countries in different ways. The chapters present case studies from a range of territories in the Mediterranean Basin, offering empirical data and theoretical analysis in order to grasp the complexity of the processes that are occurring. This book offers a uniquely comprehensive overview of migrations, territories and agro-food production in this key region, and will be an indispensable resource to scholars in migration studies, rural sociology, social geography and the political economy of agriculture.

Scholarly Pathways Apr 30 2021 With the increasing use of digital technologies in academic and research settings, scholars worldwide are engaging in new pathways for knowledge dissemination. Indeed, recent technological developments have made a dramatic change to the ways in which scholars nowadays access, distribute and disseminate their research work. The migration of traditional print genres to digital environments has caused phenomena of remediation, transmediality and genre hybridity. Moreover, new research-oriented genres on the Internet have emerged as a result of the multiple accountabilities of scientific output today. Thus, these scholarly pathways and transformative practices have opened up new and multiple perspectives and possibilities that are worth investigating. This volume explores knowledge dissemination practices according to two main orientations; first, with respect to the target audience, especially scholars vs. novices. Second in relation to the channels, especially multimodal and web-based platforms, and changing strategies such as popularization resources.

Environment and Tourism Oct 25 2020 For many people, holidays

are an increasingly central feature of contemporary western society. The tourism industry has expanded rapidly since 1950, but this book poses the significant question of consequent environmental impacts: are environments being benefited or damaged, by the tourist who visit them? A well-balanced introductory text, this topical book on the relationships between tourism, society and the environment, examines 'tourism' and 'environment' in detail, and gives a historical overview of the growth of the tourism industry. It discusses how the tourism industry markets physical and cultural environments to be consumed by the tourist, and the consequences of the tourism they then attract. It explores: * how the economics of tourism can be adopted in a positive way to aid conservation * whether the concept of sustainability can be applied to tourism * provides a critique of the 'new' forms of tourism, that have developed in recent years. An extensive range of international case studies from both the developed and developing world are used to illustrate the theoretical ideas presented, and to aid the student, it includes end of chapter summaries, further reading guides and boxed vignettes focusing on contemporary environmental issues and debates.

Enhancement of Public Real-estate Assets and Cultural Heritage Feb 09 2022 The management of cultural heritage and public real-estate assets is one of the most crucial challenges concerning the sustainable use of these resources, involving dynamic methods to stimulate preservation, development, renewal, and transmission to future generations of these essential assets. The contributions presented in this book provide a rich and varied panorama of research experiences and innovative tools, capable of promoting the re-use of cultural heritage in European cities and cultural landscapes, using a circular economy logic as a model of sustainable development. From this point of view, cultural capital becomes the driver of a regeneration process on the local, urban, and metropolitan scales, in which the transversal interconnections between the production cycles of the adaptive re-use of the available heritage, both in the adaptation and in the management phase, configure a circular process of multidimensional production of value. Therefore, future territorial redevelopment projects can base their idea strength on an open system of appropriately selected social attractors, whose

enhancement and use have the objective of triggering widespread regeneration effects on the whole territory of influence, receiving inducement and resources to progress.

The Language of Tourism Aug 03 2021 In this work, it is shown that tourism, in the act of promotion, as well as in the accounts of its practitioners and clients, has a discourse of its own. The text draws on both semiotic analyses of tourism and on the content of promotional material produce

Tourism in India Feb 26 2021 Tourism is one of the fastest growing industries in India, contributing enormously to the Indian economy. Indian civilization and culture have followed the tradition of Atithi Devo Bhava (treating Guest as God) from time immemorial. Tourism in India is fairly rich and diverse in terms of its attractions and resources nevertheless the body of knowledge of tourism as a discipline is relatively unexplored in terms of scholarly research. The tourism industry in India has not been able to perform to its most impeccable potential due to several obstructions. Lack of efficient marketing and positioning of its tourism resources in the global market is one of the prominent causes of this. The Indian tourism industry cannot achieve the desired growth and impetus unless it is backed by intense promotional and marketing strategies abreast of the global business arena. In this volume, an effort has been made to uncover a deeper understanding of marketing perspectives of tourism in India using an interdisciplinary approach. The chapters in this book reflect the prevailing scenario in the hospitality and tourism business in India as posited by renowned global experts on this subject. The book is an essential resource to students, researchers, and scholars interested in examining the existing marketing strategies as well as exploring the suggested strategies that can be adopted to promote tourism in India. The chapters in this book were originally published

as a special issue of *Anatolia*.
