Refiguring Mass Communication May 19 2020 This unique inquiry into the history and ongoing moral significance of mass communication also represents a defense, extension, and overhaul of the idea and social form of the discipline. Organized around narrative accounts of individuals and their communicative worlds, Refiguring Mass Communication illuminates significant but overlooked rhetorical episodes in history to enable modern-day readers to rehabilitate and reinvigorate their own engagements with mass communication. Coined in the 1920s as a way to describe radio, motion pictures, wide-circulation magazines, and the press, the term "mass communication" frequently is misused in the era of cable TV, niche marketing, and the Internet. In Refiguring Mass Communication, Peter Simonson compares his own vision of mass communication with distinct views articulated throughout history by Paul of Tarsus, Walt Whitman, Charles Horton Cooley, David Sarnoff, and Robert K. Merton, utilizing a collection of texts and tenets from a variety of time periods and perspectives. Drawing on textual and archival research as well as access to Merton's personal papers, Simonson broadly reconceives a sense of communication theory and what social processes might be considered species of mass communication. Simonson reveals the geographical and social contexts from which these visions have emerged and the religious and moral horizons against which they have taken shape. In a unique perspective, he considers the American county fair as an example of a live gathering and crucial site that is overlooked in contemporary forms of mass communication, urging a reconsideration of how individuals participate in and shape similar forms.

The new edition maintains its commitment to enhancing students' critical thinking and media literacy skills. As in recent editions, chapters offer sections on smartphones, tablets, and social networking sites that discuss the impact of these technologies specific to the medium at hand.
