EU Criminal Law is perhaps the fastest-growing area of EU law. It is also one of the most contested fields of EU action, covering measures which have a significant impact on the protection of fundamental rights and the relationship between the individual and the State, while at the same time presenting a challenge to State sovereignty in the field and potentially reconfiguring significantly the relationship between Member States and the EU. The book will examine in detail the main aspects of EU criminal law, in the light of these constitutional challenges. These include: the history and institutions of EU criminal law (including the evolution of the third pillar and its relationship with EC law); harmonisation in criminal law and procedure (with emphasis on competence questions); mutual recognition in criminal matters (including the operation of the European Arrest Warrant) and accompanying measures; action by EU bodies facilitating police and judicial co-operation in criminal matters (such as Europol, Eurojust and OLAF); the collection and exchange of personal data, in particular via EU databases and co-operation between law enforcement authorities; and the external dimension of EU action in criminal matters, including EU-US counter-terrorism co-operation. The analysis is forward-looking, taking into account the potential impact of the Lisbon Treaty on EU criminal law. It includes the Stewartson Memorial Lecture of Professor J. H. Whitelaw, and is divided into three parts. The first is a collection of papers that describe the status of current technology in two- and three-dimensional steady flows, the second deals with two- and three-dimensional unsteady flows, and the papers in the third address stability and transition. Each of the three parts begins with an overview of current research, as described in the following chapters. The individual papers are edited versions of the selected papers originally submitted to the symposium. Four years have passed since the Third Symposium, and certain trends become clear if one compares the papers contained in this volume with those of previous volumes. There are more three- than two-dimensional problems considered in Part 1 and the latter address more difficult problems than in the past, for example, the extension to higher angles of attack, to transonic flow, to leading edge ice accretion, and to thick hydrofoils. The large number of papers in the first part reflects the emphasis of current research and development and the needs of industry. The White Paper aims to set the stage for the upcoming free votes on the composition of a future House of Lords. It has therefore been drafted to reflect arguments in a balanced way and take account of discussions in the Cross-party Working Group on Lords Reform. It also sets out the way a hybrid House (where 50% of the members were elected and 50% appointed) might work. The Paper is organised under the following sections: background; current steps towards reform of the House of Lords; international comparisons; a reformed chamber: principles of composition; a reformed chamber: elected, appointed or hybrid; a reformed chamber: a statutory appointments commission; a

reformed chamber: membership; a reformed chamber: transition. This book takes a fresh look at programs for advanced studies for high school students in the United States, with a particular focus on the Advanced Placement and the International Baccalaureate programs, and asks how advanced studies can be significantly improved in general. It also examines two of the core issues surrounding these programs: they can have a profound impact on other components of the education system and participation in the programs has become key to admission at selective institutions of higher education. By looking at what could enhance the quality of high school advanced study programs as well as what precedes and comes after these programs, this report provides teachers, parents, curriculum developers, administrators, college science and mathematics faculty, and the educational research community with a detailed assessment that can be used to guide change within advanced study programs. Ensure students can aim for their best grade with the help of accurate and accessible notes, expert advice, and exam-style questions on each key topic. - Builds revision skills through a range of strategies and detailed expert advice - Covers all the knowledge with concise, clear explanations of all the syllabus requirements and topics - Demonstrates what is required to get the best grades with tips, sample questions and model answers Answers are free online at www.hoddereducation.com/IBextras Drive critical, engaged learning. South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and, to a much lesser extent, Afrikaans, but only a minority of the national population are native

speakers of these languages. Nine other languages can be media of instruction in schools, which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students, not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience. Schools wishing to introduce the IB diploma programme are faced with major investment in terms of time, effort and money in order to become authorised. This manual is a resource for schools already offering the diploma, as well as for prospective diploma schools. The Committee's report examines the Children Bill as introduced into the Commons in July 2004 (HCB 144, ISBN 0215704479), following Lords amendments. In particular, the report focuses on the parts of the Bill relating to: the creation of the post of Children's Commissioner for England; strengthening the legal framework of co-operation between agencies delivering children's services; as well as clause 49 of the Bill on the corporal punishment of children and the restriction of the defence of 'reasonable chastisement', in light of the UK's obligations under the UN Convention on the Rights of the Child and the European Convention on Human Rights. Conclusions reached include i) support for the creation of an independent rights-based office of Children's Commissioner; and ii) that the continuing availability of the defence of reasonable chastisement is incompatible with the UK's obligations under the UN Convention and other international agreements. In the UK's institutional arrangements for protecting human rights, both Parliament and the judiciary have a central role. When the courts give a judgement finding that a law, policy or practice is in breach of human rights, it is for Parliament to scrutinise the adequacy of the Government's response and in some cases decide if there needs to be a change in law. An important part of the role of the Committee is to help Parliament in this function. This report brings together all their monitoring work in relation to both judgements of the European Court of Human Rights and declarations of incompatibility given by UK courts under the Human Rights Act. The Moral Responsibilities of Companies is a philosophical analysis of the question of whether companies can be held morally responsible for the harms they create, and what implications such a view has on the moral position of employees and shareholders in these companies. The Committee's report contains the oral evidence given to Sub-Committee C (Foreign Affairs, Defence and Development Policy) by Lord Drayson, Minister of State, Defence Equipment, and Support at the Ministry of Defence, accompanied by Mr Andrew Mathewson, Director of the Directorate for Policy on International Organisations and Mr Robert Regan, Director of the International Relations Group, Ministry of Defence; and the correspondence from the Minister. Topics discussed include: the role of the European Defence Agency (EDA) as an organisation in a "start up" phase; the Force Protection Initiative and the UK's decision not to participate; defence procurement collaboration policy; interoperability and standard setting within the EDA; the EDA's Code of Conduct on defence procurement and the bulletin board; the size of the EDA's

budget and its effective use; the Defence Technological and Industrial Base (DTIB) strategy; the security of defence supplies; procurement co-operation with France; battlegroups and issues relating to deployment and self-certification.
