Fury's Kiss Apr 17 2022 Dorina Basarab is a dhampir—half-human, half-vampire. Subject to uncontrollable rages, most dhampirs live very short, very violent lives. But so far, Dory has managed to maintain her sanity by unleashing her anger on those demons and vampires who deserve killing... Dory is used to fighting hard and nasty. So when she wakes up in a strange scientific lab with a strange man standing over her, her first instinct is to take his head off. Luckily, the man is actually the master vampire Louis-Cesare, so he's not an easy kill. It turns out that Dory had been working with a Vampire Senate task force on the smuggling of magical items and weaponry out of Faerie when she was captured and brought to the lab. But when Louis-Cesare rescues her, she has no memory of what happened to her. To find out what was done to her—and who is behind it—Dory will have to face off with fallen angels, the maddest of mad scientists, and a new breed of vampires that are far

worse than undead...

Cassandra Speaks Aug 09 2021 What story would Eve have told about picking the apple? Why is Pandora blamed for opening the box? And what about the fate of Cassandra who was blessed with knowing the future but cursed so that no one believed her? What if women had been the storytellers? Elizabeth Lesser believes that if women's voices had been equally heard and respected throughout history, humankind would have followed different hero myths and guiding stories—stories that value caretaking, champion compassion, and elevate communication over vengeance and violence. *Cassandra Speaks* is about the stories we tell and how those stories become the culture. It's about the stories we still blindly cling to, and the ones that cling to us: the origin tales, the guiding myths, the religious parables, the literature and films and fairy tales passed down through the centuries about women and men, power and war, sex and love, and the values we live by. Stories written mostly by men with lessons and laws for all of humanity. We have outgrown so many of them, and still they endure. This book is about what happens when women are the storytellers too—when we speak from our authentic voices, when we flex our values, when we become protagonists in the tales we tell about what it means to be human. Lesser has walked two main paths in her life—the spiritual path and the feminist one—paths that sometimes cross but sometimes feel at cross-purposes. *Cassandra Speaks* is her extraordinary merging of the two. The bestselling author of *Broken Open* and *Marrow*, Lesser is a beloved spiritual writer, as well as a leading feminist thinker. In this book she gives equal voice to the cool water of her meditative self and the fire of her feminist self. With her trademark gifts of both humor and insight, she offers a vision that transcends the either/or ideologies on both sides of the gender debate. Brilliantly structured into three distinct parts, Part One explores how

history is carried forward through the stories a culture tells and values, and what we can do to balance the scales. Part Two looks at women and power and expands what it means to be courageous, daring, and strong. And Part Three offers “A Toolbox for Inner Strength.” Lesser argues that change in the culture starts with inner change, and that no one—woman or man—is immune to the corrupting influence of power. She provides inner tools to help us be both strong-willed and kind-hearted. *Cassandra Speaks* is a beautifully balanced synthesis of storytelling, memoir, and cultural observation. Women, men and all people will find themselves in the pages of this book, and will come away strengthened, opened, and ready to work together to create a better world for all people.

Liam Quinn knows from experience that magic makes monsters of the weak, and he has no time for a Sensitive with no control of her own strength. But when he sees Claire using her powers to save a human under attack—in full view of the French Quarter—Liam decides to bring her to Devil's Isle and the teacher she needs, even though getting her out of his way isn't the same as keeping her out of his head. As more and more Sensitive fall prey to their magic, and unleash their hunger on the city, Claire and Liam must work together to save New Orleans, or else the city will burn...

Jane Austen among Women Mar 04 2021 Originally published in 1992. In an age when genteel women wrote little more than personal letters, how did Jane Austen manage to become a novelist? Was she an isolated genius who rose to fame through sheer talent? Did she draw strength from the support of her family or from women writers who went before her? In *Jane Austen among Women*, Deborah Kaplan argues that these

explanations are either misleading or insufficient. Austen, Kaplan contends, participated actively in a women's culture that promoted female authority and achievement—a culture that not only helped her become a novelist but also influenced her fiction.

Behavioral Finance: The Second Generation May 26 2020 Behavioral finance presented in this book is the second-generation of behavioral finance. The first generation, starting in the early 1980s, largely accepted standard finance's notion of people's wants as "rational" wants—restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as "irrational"—succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people's normal wants and their benefits—utilitarian, expressive, and emotional—distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People's normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People's normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.
