Shines a light on the ways in which civil procedure may privilege—or silence—voices in our justice system In today's increasingly hostile political and cultural climate, law schools throughout the country are urgently seeking effective tools to address embedded inequality in the United States legal system. A Guide to Civil Procedure aims to serve as one such tool by centering questions of systemic injustice in the teaching, learning, and practice of civil procedure. Featuring an outstanding group of diverse scholars, the contributors illustrate how law school curriculums often ignore issues such as race, gender, disability, class, immigration status, and sexual orientation. Too often, students view the #MeToo movement, Black Lives Matter, immigration/citizenship controversy, or LGBTQ+ issues as mere footnotes to their legal education, often leading to the marginalization of many students and the production of graduates that do not view issues of systemic injustice as central to their profession. A Guide to Civil Procedure reveals how procedure is, and always has been, a central pressure point in the struggle to eradicate structural inequality and oppression through the courts. This book will give students and scholars alike a more complex view of their roles as attorneys, sharpen their litigation skills, and provide a stronger sense of community and purpose in the law school classroom. Here, record producer Beinhorn reveals how to deal with interpersonal issues record producers face when they work with artists one on one or in small groups. The situations and solutions are based upon the author's personal and professional experience working with a variety of different artists, such as Herbie Hancock, the Red Hot Chili Peppers, Soul Asylum, Hole, Soundgarden, Ozzy Osbourne, Courtney Love, Marilyn Manson, Social Distortion, Korn, and Mew. Beinhorn's unique methods and perspective, applied to record producing and music making in the studio, opens the door to successful collaborative efforts. The author shows you how to find what he calls your sensory connection to the creativity process, which ultimately helps you find the intent behind your creative choices. You can read dozens of articles and books that feature a hundred different people talking about what microphones they used when they recorded Record X or how they set their stereo buss compressor, but you will never find out what prompted them to make these choices. Beinhorn's focus on collaborative effort enables record producers and artists to find solutions while working as a creative team. This perspective is especially valuable as it is transdisciplinary and can be applied to many occupations and modes of creativity outside of record production.
