Force of Nature Jun 24 2020 In January 1969, aboard his home-built wooden boat Suhaili, Sir Robin Knox-Johnston became the first person every to sail solo, non-stop around the world. 25 years later, Sir Robin again completed a record-breaking circumnavigation, co-skippering Enza with Kiwi yachting legend Sir Peter Blake. His place in sailing's pantheon of greats was assured. Then, after the tragic death of his wife Sue, Sir Robin decided he would try again. In October 2006, at the age of 67 - when most people are settling in to a well-earned retirement - Sir Robin embarked on another gruelling single-handed race around the world. Compared to his rivals he lacked recent experience and a large shore-based support team. There were some who believed that this time he might have bitten off more than he could chew. Then early on, it looked like their worst fears might be realised. Within days of setting off, near-Hurricane-strength storms in the Bay of Biscay capsized his 60' yacht Saga Insurance. But it wasn't just Sir Robin who suffered. Three-quarters of the entire fleet had to run for shelter. When they re-emerged, all faced months of hardship and intensity ahead. Force of Nature is Sir Robin's first-hand account his extraordinary return to the ultra-competitive, punishing world of single-handed offshore racing. It turned out to be a very different journey to the one he undertook about Suhaili, yet his experience aboard her remains a touchstone throughout this story. It's a story of courage, ingenuity and resilience played out against the World's oceans. But most of all it's a powerful reminder that age is nothing but a number; no barrier to realizing one's dreams.

Project Independence Blueprint Final Task Force Report Jun 17 2022 This report of the Interagency Task Force on Oil Shale examines the prospects for expanding shale oil production to meet the objectives of Project Independence. The study considers production potential; resource requirements such as human, money, and material resources; production constraints; and actions needed to accelerate development. The report also deals with economic factors in increased development of oil shale production; oil shale resource base and ownership; leasing requirements and policy; water demand, supply and quality; air quality analysis; impact on fish and wildlife; and the status of technology.

The German Air Force I Knew 1914-1918 Nov 10 2021 Major Georg Paul Neumann was a former German Air Force officer who had served in the Great War. He produced his outstanding survey of the German Air Force in 1920 while the events were still recent history. He was able to draw on his own experience and his contacts to compile a large number of personal accounts from officers and men who had so recently fought in the cause. The result is an accurate, faithful and comprehensive review of the aircraft, personnel and organisation of the force which began life in 1910 as the Imperial German Army Air Service and ended the war as the Luftstreitkräfte. This comprehensive and compelling review includes a series of primary sources dealing with some of the unusual and lesser known aspects of the Luftstreitkräfte including a gripping account of defending a Zeppelin against attack by British fighters. Major Neumann's indispensable work has never been surpassed and this English language translation is essential reading for anyone with an interest in the realities of the war in the air in the Great War.

Federal Energy Administration Project Independence Blueprint Final Task Force Report Jul 18 2022 This report of the Interagency Task Force on Oil Shale examines the prospects for expanding shale oil production to meet the objectives of Project Independence. The study considers production potential; resource requirements such as human, money, and material resources; production constraints; and actions needed to accelerate development. The report also deals with economic factors in increased development of oil shale production; oil shale resource base and ownership; leasing requirements and policy; water demand, supply and quality; air quality analysis; impact on fish and wildlife; and the status of technology.

Advanced Manufacturing Systems and Innovative Product Design Dec 11 2021 This book comprises select papers presented at the Conference on Innovative Product Design and Intelligent Manufacturing System (IPDIMS 2020). The book discusses the latest methods and advanced tools from different areas of design and manufacturing technology. The main topics covered include design methodologies, industry 4.0, smart manufacturing, and advances in robotics among others. The contents of this book are useful for academics as well as professionals working in the areas of industrial design, mechatronics, robotics, and automation.
