La combustión explosiva de Hidrógeno sobre la superficie de una enana blanca provoca estallidos de novas. El sistema binario donde una nova clásica ocurre es una variable cataclísmica (cuya estrella compañera es de la secuencia principal), mientras que las novas recurrentes ocurren en binarias simbióticas (cuya estrella compañera es una gigante roja). El análisis de la emisión de rayos X en novas en la etapa de post-estallido proporciona información importante acerca del mecanismo de explosión de las novas y el restablecimiento de la acreción. En algunos casos, como en el de la nova V2486 Oph 1998, observaciones con el satélite X12-Newton años después del estallido indican que la acreción ha sido restablecida; y su espectro en rayos X es similar al de una variable cataclísmica magnética (del tipo de las polares intermedias). En este trabajo se ha desarrollado un modelo numérico para estudiar el flujo de acreción sobre enanas blancas magnéticas y su correspondiente emisión en rayos X con el objetivo de compararlo con las observaciones de novas en etapa de post-estallido, donde la acreción vuelve a estar activa. En este trabajo se han obtenido las distribuciones de temperatura, velocidad, presión y densidad a lo largo de la región de emisión, para diferentes masas de enanas blancas y diferentes ritmos de acreción. Así mismo, a partir de las distribuciones de temperatura y densidad es posible obtener el espectro de emisión en rayos X. Estos resultados se han aplicado a la nova V2487 Oph 1998 con el objetivo de caracterizar la región de emisión y obtener la masa de la enana blanca, ya que esta nova ha sido identificada como candidata de nova recurrente y progenitora de supernovas del tipo Ia. Postharvest Ripening Physiology of Crops is a comprehensive interdisciplinary reference source for the various aspects of fruit ripening and postharvest behavior. It focuses on the postharvest physiology, biochemistry, and molecular biology of ripening and provides an overview of fruits and vegetables, including chapters on the postharvest quality of ornamental plants and molecular biology of flower senescence. It describes various developments that have taken place in the last decade with respect to identifying and altering the function of ripening-related genes. Taking clues from studies in grape and tomato as model fruits, the book reviews a few case studies and gives you a detailed account of molecular regulation of fruit ripening, and signal transduction and internal atmospheres in relation to fruit ripening. It also presents an overview of methods utilized in fruit proteomics, as well as a global proteome and systems biology analysis of fruits during ripening, and discusses the basics of dormancy, its molecular and physiological basis, and methods to break the dormancy. The book provides an overview of the most important metabolic pathways and genes that control volatile biosynthesis in model fruits, including tropical, subtropical, and temperate fruits, with a special emphasis on fruit ripening and the role of ethylene during this process. It presents a brief description of the composition of volatiles in various fruit species and addresses the influences of preharvest factors and postharvest technologies on fruit aroma, basic mechanisms responsible for postharvest flavor change in fresh produce, and the potential impacts of various postharvest technologies on flavor. Nutritional Composition of Fruit Cultivars provides readers with the latest information on the health related properties of foods, making the documentation of the nutritive value of historical cultivars especially urgent, especially before they are lost and can't be effectively compared to modern cultivars. Because there is considerable diversity and a substantial body of the compositional studies directed towards commercial varieties, this information is useful for identifying traits and features that may be transposed from one variety to another. In addition, compositional and sensory features may also be used for commercialization and to characterize adulteration. Detailed characterization of cultivars can be used to identify "super-foods". Alternatively, unmasked historical cultivars may be the focus of reinvigorated commercial practices. Each chapter in this book has sections on the botanical aspects, the composition of traditional or ancient cultivars, the composition of modern cultivars, a focus on areas of research, the specialty of the communicating author of each chapter, and summary points. Presents the botanical aspects and composition of both traditional and modern plants, including in-depth insight into current research, and overall summary points for each fruit for consistent comparison and ease of reference Provides important information in the consideration of preservation, transference, or re-introduction of historical/traditional cultivars into current crop science Provides details on compositional and sensory parameters, from aroma and taste to micro- and macronutrients Includes data on nutraceuticals and novel components that have proven to impact on, or be important in, food quality, storage, processing, storage, and marketing The technology used to ripen bananas is affected by a wide range of factors, including the cultivar, growing conditions, harvesting method, and maturity at which the fruit are harvested and handled. Various post harvest treatments applied to fruit can also impact ripening. While many textbooks have been dedicated to Musa (bananas and plantains), none have focused exclusively on the ripening process. The commercial ripening of bananas and the chemical changes that occur thereby are considered here in detail. In developed, temperate countries where bananas are imported, successful ripening technologies have evolved. Most bananas, however, are marketed locally in the country where they are grown, and often the ripening technologies used have economic and health implications. This brief offers an in-depth discussion of not only the implications of these technologies, but also of alternative ripening methods and their commercial applications. For an understanding of both the chemical basis by which bananas ripen and the technologies used to control the process, look no further than this essential text. Esta es una obra acerca de la estrategia competitiva, escrita por una economista, quien afirma que las ideas fundamentales en la microeconomía son muy importantes para comprender la planeación estratégica. La obra aborda tres temas fundamentales. En primer lugar, siguiendo la tradición económica, se centra en la naturaleza competitiva de la estrategia competitiva, dedicando gran parte al estudio de la forma en la cual las fuerzas interactivas dentro del mercado y fuera de él, afectan las elecciones estratégicas disponibles para las organizaciones y los resultados de esas elecciones. En segundo tema de este libro es la importancia del cambio, el cual es esencial para el movimiento, de manera que podamos pensar en la planeación estratégica como una forma de crear y mantener el cambio. El último tema es que las elecciones implicadas en el desarrollo de una estrategia, se hacen inevitablemente en el contexto de una información limitada y de las fricciones en el mercado. Esta obra, en síntesis, proporciona un claro y sólido entendimiento del análisis moderno de la competitividad, en la cual además, se examina el ambiente competitivo, el interior de la organización, el grado de rivalidad y el proceso de planeación. Everybody Wants Answers. No One Wants the Truth. The Arunkel empire has stood a thousand years, forged by wealth and conquest, but now rebellion is stirring on the borders and treachery brews in the palace halls. Elsewhere, in a remote mountain village, a young mother sells the prophesies of her sister, Amarta, in order to keep them and her infant child from starving. It's a dangerous game when such revelations draw suspicion and mistrust as often as they earn coin. Yet Amarta's visions are true. And often not at all what the seeker wishes to hear. Now in a tapestry of loyalty, intrigue, magic, and gold, Amarta has become the key to a ruler's ambitions. But is she nothing beyond a tool? As Amarta comes into her own as a seer, she realizes she must do more than predict the future. She must create it. At the publisher's request, this title is sold without DRM (Digital Rights Management). About The Seer: "Compelling characters, a fully imagined world, and a gripping narrative: The Seer announces Sonia Lyris as a new and exciting voice in epic fantasy. I highly recommend this novel, and I look forward to her next."—David B. Coe, author of best-selling Winds of the Forelands series "The Seer is something extremely rare these days: a fantasy which is complex, complete, so intricate that you feel the picture goes on far, far beyond the parts of it which are in the book. There is a wonderful depth to it, and the characters and the setting in which the characters find themselves (both horrific and fascinating) made it compelling reading. The story's separate threads left me wondering how the author could possibly weave them together. She did so brilliantly, it was masterful and I was very impressed."—Dave Freer, author of the critically acclaimed Dragon's Ring series Todo lo que necesitas saber sobre las Cabras Pigmeas como mascota Este libro es una guía imprescindible para cualquier persona apasionada por las Cabras Pigmeas, Mini Cabras, o Cabras Enanas. Datos e información Cria, reproducción, mantenimiento, orden, alimento, cuidado, salud y donde comprarlas, todo incluido. Este libro está escrito con un estilo fácil de leer y comprender. De manera directa y explícita, Elliot Lang cubre todos los aspectos relativos al mantenimiento de las Cabras Pigmeas. El libro está lleno de buenos consejos y respuestas a tus preguntas. "Mi hijo sigue acosandome para que compre una cabra pigmea, porque su amigo tiene algunas en su casa. No sabía nada acerca del cuidado de estas cabras, pero ahora que lei el libro, siento que se todo lo que hay que saber." Josh Anderson "Bueno, sin duda no sabía que hay que estar al tanto de tantas cosas para tener algunas cabras. Este libro explica todo lo que hay que saber y está escrito con un estilo muy fácil de leer." Lindsey Thompson A Grammar of Eton is the first description of the Cameroonian Bantu language Eton. It is also one of the few complete descriptions of a North-western Bantu language. The complex tonology of Eton is carefully analysed and presented in a simple and consistent descriptive framework, which permits the reader to keep track of Eton's many tonal morphemes. Phonologists will be especially interested in the analysis of stem initial prominence, which manifests itself in a number of logically independent phenomena, including length of the onset consonant, phonotactic skewing and number of tonal attachment sites. Typologists and Africanists working on morphosyntax will find useful analyses of, among others, gender and agreement; tense, aspect, mood and negation; and verbal derivation. They will encounter many morphosyntactic differences between Eton and the better known Eastern and Southern Bantu languages, often due to evolutions shaped by maximality constraints on stems. The chapters on clause structure and complex constructions provide data hardly found in sources on the languages of the region, including descriptions of non-verbal clauses, focus, quasi-auxiliaries and adverbial clauses. This volume investigates the linguistic and semantic encodings and conceptions of space in the East-Polynesian language Marquesan by focusing on the great variety of language- and culture-specific ways of referring to space, thus documenting an essential part of human behaviour and everyday communication in a South Pacific island population. On the basis of a large corpus of both natural and elicited spoken language data the morphosyntactic and semantic properties of all relevant lexical and grammatical units and constructions used for spatial reference are analysed in detail. Remarkable for this language is the fact that a particular kind of spatial orientation system based on local landmarks of the environment - a so-called 'absolute system' - is used for spatial description even on a micro-level or so-called 'table-top' space. Marquesan - A Grammar of Space is the first comprehensive description and in-depth study of spatial language to be found in an Austronesian language. Apart from examining the complex sociolinguistic situation, the degree of language endangerment in the bilingual speech community and the resulting rapid linguistic change in spatial language use, the book also offers a detailed description of the theoretical background of 'language and space' research and the linguistic variability to be found across languages. Moreover, the volume contains an extensive grammatical sketch of Marquesan which complements the language description of the specific domain space in a useful way providing the reader with general insights into one of the not well documented Oceanic languages. The volume addresses linguists, psycholinguists, anthropologists, fieldworking linguists, and especially Oceanists and Austronesianists. Moreover, it provides important insights for researchers from other disciplines that are interested in the study of space. RESUMEN El estudio de las propiedades de la población de enanas blancas de la Galaxia es muy amplio, e implica aportaciones en diferentes campos de la astrofísica, tales como evolución estelar, dinámica galáctica, estudio de la materia oscura o análisis de bases de datos, entre otros. Las enanas

blancas, por otra parte, son objetos cuya configuración física es lo suficientemente estable como para permitir el desarrollo de modelos teóricos muy precisos. Este hecho unido a la característica de tales estrellas de ser objetos muy viejos presenta al conjunto de enanas blancas como candidatos ideales para el estudio de la formación y estructura de la Galaxia. Bajo estas condiciones hemos desarrollado un modelo, basado en las técnicas de simulación Monte Carlo, de la población de enanas blancas, tanto del disco como del halo galáctico. Las simulaciones realizadas presentan los avances más recientes en la física de las enanas blancas a la par que incluyen de manera realista el proceso de selección observacional. Con la construcción de un modelo preciso podemos extraer la mayor información posible de los datos observacionales, analizar los posibles sesgos estadísticos derivados del proceso de selección, al igual que comprobar los resultados de los modelos teóricos o estimar futuras predicciones. En primer lugar hemos realizado un estudio detallado y exhaustivo de la población de enanas blancas del disco galáctico. Este estudio se ha centrado en dos grandes bloques: el análisis de las propiedades cinemáticas y el estudio de la función de luminosidad. En este sentido hemos comprobado que los efectos de la ley de altura patrón no son en modo alguno despreciables y que pueden influir en la determinación de la edad del disco. Igualmente hemos analizado de forma especial la función de luminosidad, su completitud, sus sesgos observacionales, y una valoración estadística basada en las técnicas de estimación bayesiana de la edad del disco, obteniendo un valor de 13.5 Gyr con un error. ¿Hay vida en otros lugares del Sistema Solar? ¿Cuántas civilizaciones pueden existir en la galaxia? ¿Nos conoceremos algún día? Desde pequeños, nos fascinan las estrellas y los planetas. En seguida nos preguntamos si en su superficie podría haber criaturas, como tú y como yo, preguntándose si en otros lugares de la galaxia habrá seres como ellos... La avalancha de preguntas es imparable: el ser humano es curioso por naturaleza. Si alguna vez te has hecho alguna de estas preguntas, este libro es para ti. De la mano de Alex Riveiro, autor de *Hacia las estrellas*. Una breve guía del universo, y creador de *Astrobitácora*, el podcast de referencia de astronomía en español.

The Pacific is historically an area of enormous linguistic diversity, where talk figures as a central component of social life. Pacific communities also represent diverse contact zones, where between indigenous and introduced institutions and ideas; between local actors and outsiders; and involving different lingua franca, colonial, and local language varieties. Contact between colonial and post-colonial governments, religious institutions, and indigenous communities has spurred profound social change, irrevocably transforming linguistic ideologies and practices. Drawing on ethnographic and linguistic analyses, this edited volume examines situations of intertwined linguistic and cultural change unfolding in specific Pacific locations in the late twentieth and early twenty-first centuries. Its overarching concern is with the multiple ways that processes of historical change have shaped and been shaped by linguistic ideologies reflexive sensibilities about languages and language use held by Pacific peoples and other agents of change. The essays demonstrate that language and linguistic practices are linked to changing consciousness of self and community through notions of agency, morality, affect, authority, and authenticity. In times of cultural contact, communities often experience language change at an accelerated rate. This is particularly so in small-scale communities where innovations and continuity routinely depend on the imagination, creativity, and charisma of fewer individuals. The essays in this volume provide evidence of this potential and a record of their voices, as they document new types of local actors, e.g., pastors, Bible translators, teachers, political activists, spirit mediums, and tour guides, some of whom introduce, innovate, legitimate, or resist new ideas and ways to express them through language. Drawing on and transforming metalinguistic concepts, local actors (re)shape language, reproducing and changing the communicative economy. In the process, they cultivate new cultural conceptions of language, for example, as a medium for communicating religious knowledge and political authority, and for constructing social boundaries and transforming relationships of domination. Dice el refrán aquello de que lo bueno, si breve, dos veces bueno, de ahí el propósito de este libro, en el que se ha pretendido de forma muy sencilla, contar pequeñas historias (un revoltijo de 119), algunas con su moraleja incorporada, en las que se mezclan relatos de amor, drama, fantasía..., incluso algún cuento, además de otros contenidos de temática diversa, procurando (en la mayoría de los casos) darles un toque de humor, y en el que se narran en formato reducido, acontecimientos de la vida diaria. Reales unos, y más creativos en cuanto a la ficción, otros, en los que se ha tratado en un acto de invención, buscar diversos caminos más alejados de la realidad. Se ha intentado que el lector disfrute de diminutas lecturas que le aporten momentos (aunque sean cortos) de diversión para llenar esos huecos libres (a veces insignificantes) que muchas veces la rutina diaria nos proporciona a los seres humanos, mientras se apiada de nosotros para dejarnos algún instante de sosiego. Textos, cuyo reducido contenido pueda ser dosificado al gusto personal de quien los lee, como cucharadas de azúcar en el café. Si una historia no engancha, lo bueno que tiene es que dura poco, y si por el contrario gusta (y ese es el reto del autor), siempre dejará un buen sabor de boca para leer la siguiente. El deseo de quien escribe es haber hecho honor al refrán mencionado, y en cuanto a la brevedad, lo ha conseguido (eso ha sido fácil), en lo referente a la calidad, el asunto, es más complicado y su valoración ya es algo que queda supeditado a la opinión (objetiva, esperamos) del lector. Por último, indicar que se ha utilizado en la mayoría de los contenidos escritos en este libro, el formato de microrrelato, con independencia de otros breves textos que se pueden catalogar de forma diversa, y que quizá encajen mejor dentro de otros apartados como reflexiones y pensamientos, o incluso ser inclasificables, aunque por encima del nombre empleado para etiquetar una determinada historia, lo más importante es su contenido y el entretenimiento que éste, le aporte al lector, con independencia de las conclusiones que de su lectura pueda extraer. Al final, el objetivo del libro es contar cosas, y en definitiva, esta pequeña obra, sirve como medio de expresión en forma escrita que el autor utiliza para comunicarse con los lectores en un ejercicio de imaginación, para que la creatividad se manifieste de la mejor manera posible y vuele a su libre albedrío.

Severo Sarduy never enjoyed the same level of notoriety as did other Latin American writers. On the other hand, he never lacked for excellent critical interpretations of his work from critics like Roberto González Echevarría, René Prieto, Gustavo Guerrero, and other reputable scholars. Missing, however, from what is otherwise an impressive body of critical commentary, is a study of the importance of painting and architecture, first, to his theory, and second, to his creative work. In order to fill this lacuna in Sarduy studies, Rolando Pérez's book undertakes a critical approach to Sarduy's essays "Barroco, Escrito sobre un cuerpo, Barroco y neobarroco, and La simulación" from the stand point of art history. In short, no book on Sarduy until now has traced the multifaceted art historical background that informed the work of this challenging and exciting writer. It will be a book that many a critic of Sarduy and the Latin American baroque will consult in years to come.

El mar ha entregado un cadáver en Playa Blanca y Amanda corre desesperada; necesita saber quién es. La joven había escuchado a una mujer gritar que el ahogado era un pescador, un hombre de don Rómulo, el cacique del pueblo, y su padre era uno de ellos. A partir de este primer encuentro de Amanda con la muerte, su destino, el de su familia y el del pueblo se verán marcados por un antes y un después de aquel verano de 1927. Abandonar la infancia para entrar al mundo de la adultez, donde ni la inocencia ni la imaginación tienen cabida, será para Amanda un viaje sin retorno. El pasado, el presente y el futuro siempre colisionan en un punto de inflexión. Como en un bucle, las historias paralelas se van complementando y será Malene quien continúe ese viaje. Un recorrido emocional por los mares y desiertos de la Baja California en busca de respuestas a los secretos que han trazado sus destinos. Las enanas marrones no son estrellas, pero emiten luz, usando como combustible deuterio en vez de hidrógeno. Tampoco son planetas, aunque algunos límites entre unas y otros aún no están claros. En 1995 se anunció el descubrimiento de la primera enana marrón confirmada, y en estos 23 años se ha avanzado mucho en el estudio de estos objetos, se han descubierto un par de miles de enanas marrones y se ha desarrollado un ámbito nuevo de la astronomía. En un futuro próximo, los astrofísicos tal vez puedan dar mejores respuestas a las muchas preguntas que quedan por contestar sobre ellas: ¿cómo se forman?, ¿cómo se comportan sus atmósferas y qué clima tienen?, ¿son las más adecuadas para buscar exotierras? El objetivo es dar una visión global de las enanas marrones, dejar clara su naturaleza no estelar, ver cómo se buscan, cómo se cree que se forman, qué características tienen y cómo se han clasificado en función de esas características.

"Hanit the Enchantress" by Garrett Chatfield Pier is one of many renditions of the tale originally thought to have been held within the now lost Library of Alexandria. Following Egyptian legend, Pier is able to make readers of all ages feel as if they are actually within ancient Egyptian civilization as they become engrossed in the story of Hanit. Magic and adventure are on every page of this book making it impossible to put down until the very end.

"After the conflict ended in Angola, the country was faced with development challenges in economic and social conditions. The Government needed direction and reforms to encourage private sector participation to meet Angola's vast infrastructure needs in electricity and gas, water and sanitation, transport, and telecommunications. Private Solutions for Infrastructure in Angola provides an objective assessment of Angola's general environment for private sector participation in infrastructure. The main purpose of the book is to assist the Government of Angola in developing policies and a framework for the promotion of private participation in

the rebuilding and development of the country's infrastructure. This book focuses on maximizing the role and contribution of the private sector in infrastructure and it analyzes and documents the barriers, opportunities, and measures to promote private participation in infrastructure over the period 2005-2020. The book also provides a summary of the action plan of the short, medium, and long-term steps to facilitate private sector participation."
