Liver Growth and Repair Nov 03 2020 Nelson Fausto The Greek myth of Prometheus with its picture of a vulture feasting on its chained victim has traditionally provided a visual image of liver regeneration. It is a powerful and frightening representation but if one were to substitute the vulture by a surgeon and Prometheus by a patient laying on a properly prepared operating table, the outcome of the procedure would not differ significantly from that described by Greek poets. Yet few of us who work in the field have stopped long enough to ask where this myth originated. Did the poet observe a case of liver regeneration in a human being? Was it brilliant intuition or perhaps, literally, just a 'gut feeling' of a poet looking for good rhymes that led to the prediction that livers grow when part of the tissue is removed? This book does not attempt to solve these historical issues. It does, instead, cover in detail some of the major modern themes of research on liver regeneration, injury and repair. As indicated in Dr. N. Bucher's chapter, the modern phase of experimental studies on liver regeneration started in 1931 with the publication by Higgins and Anderson of a method to perform a two-thirds resection of the liver of a rat. The technique described has 3 remarkable features: 1) it is highly reproducible, resulting in the removal of 68% of the liver, 2) it has minimal if any mortality, and 3) it consists only of blood vessel ligation and does not involve cutting through or wounding hepatic tissue.

Qualitative and Quantitative Models in Socio-Economic Systems and Social Work Jan 05 2021 The main purpose of this book is not only to present recent studies and advances in the field of social science research, but also to stimulate discussion on related practical issues concerning statistics, mathematics, and economics. Accordingly, a broad range of tools and techniques that can be used to solve problems on these topics are presented in detail in this book, which offers an ideal reference work for all researchers interested in effective quantitative and qualitative tools. The content is divided into three major sections. The first, which is titled " Social work ", collects papers on problems related to the social sciences, e.g. social cohesion, health, and digital technologies. Papers in the second part, " Education and teaching issues, " address qualitative aspects, education, learning, violence, diversity, disability, and ageing, while the book ' s final part, " Recent trends in qualitative and quantitative models for socio-economic systems and social work ", features contributions on both qualitative and quantitative issues. The book is based on a scientific collaboration, in the social sciences, mathematics, statistics, and economics, among experts from the " Pablo de Olavide " University of Seville (Spain), the " University of Defence " of Brno (Czech Republic), the " G. D ' Annunzio " University of Chieti-Pescara (Italy) and " Alexandru Ioan Cuza University " of Iași (Romania). The contributions, which have been selected using a peer-review process, examine a wide variety of topics related to the social sciences in general, while also highlighting new and intriguing empirical research conducted in various countries. Given its scope, the book will appeal, in equal measure, to sociologists, mathematicians, statisticians and philosophers, and more generally to scholars and specialists in related fields.

Il partenariato pubblico privato Sep 25 2022 Un utile strumento per approfondire il partenariato pubblico privato nelle sue molteplici sfaccettature ed applicazioni, al fine di comprenderne pregi e limiti, opportunità e criticità nella convinzione di fondo che il perseguimento delle finalità delle pubbliche amministrazioni passa anche attraverso l ' efficace collaborazione con soggetti privati. Attraverso il ricorso al partenariato pubblico privato – PPP - il soggetto pubblico acquisisce, infatti, risorse finanziarie, know-how e competenze, limitando le proprie condizioni di rischio e mettendo a disposizione di un soggetto privato, con procedure trasparenti, l ' opportunità di concorrere allo svolgimento di un servizio di interesse pubblico nonché di realizzare investimenti pubblici infrastrutturali e di conseguire un congruo margine di profitto. Il testo offre un quadro esaustivo delle disposizioni normative e dell ' evoluzione giurisprudenziale intervenuta, anche legata all ' elaborazione della magistratura contabile rispetto alle problematiche della contabilizzazione. La presenza di numerosi casi all ' interno del volume - non limitati al contesto italiano ed europeo, ma estesi ad ulteriori ambiti che indubbiamente presentano specificità ed interesse, come gli Stati Uniti, il Canada e l ' Australia - permette di trarre spunti, cogliere differenze, elaborare riflessioni utili per comprendere le diverse regolazioni operate, ma anche le condizioni in presenza delle quali lo strumento è efficacemente utilizzabile oppure le circostanze in presenza delle quali occorre ricercare strade diverse. Particolarmente accurata è la parte di natura economico-finanziaria legata agli indici e parametri per la valutazione della convenienza del progetto ed alla scelta dei tassi di attualizzazione, che costituiscono un aspetto realmente cruciale in funzione della notevole estensione dei flussi considerati nella fase di studio e di analisi.

Le Nuove Forme del Partenariato Pubblico-Privato. Servizi pubblici e infrastrutture Aug 12 2021 Il volume affronta la recente evoluzione dei rapporti tra il settore pubblico e il settore privato, illustrando il mutamento di paradigma che sta interessando il tradizionale intervento dei privati nella realizzazione di opere pubbliche e nella gestione di servizi pubblici, in specie con riferimento al ruolo essenziale assunto dai servizi di telecomunicazione. Muovendo dalla " Crisi dello Stato ", ulteriormente aggravata dall ' avanzata di operatori economici in grado di gestire enormi quantità di dati e di risorse economiche

nonché dalla necessaria difesa della sovranità tecnologica, l'Autore analizza le dimensioni costitutive dei rapporti di Partenariato, soffermandosi sulla disciplina dei contratti maggiormente impiegati a livello nazionale ed esaminando, anche in una prospettiva comparativa, le ragioni che impediscono di costruire in Italia un'efficiente cooperazione tra il pubblico e il privato. L'impostazione del volume è pratica e permette al lettore di consultare la disciplina normativa vigente alla luce della più recente giurisprudenza.

Appraisal: From Theory to Practice Oct 22 2019 This book documents the state of the art and the emerging operational perspectives in the field of the appraisal discipline. It covers a wide range of topics, including energy efficiency, environmental sustainability, socio-economic evaluation of regional and urban transformations, real estate and facility management, risk management. It also discusses the potential role of appraisal in minimising unexpected consequences; the role of evaluators in urban development projects as well as the contribution of several methodologies with respect to the overall planning and design processes; the need to manage the complexity of the current decision contexts, while at the same time promoting efficient and effective evaluation processes; improving the quality of discussion and communication of the outcomes of evaluation processes; as well as the appropriateness of current regulation and policy regimes (EU, national, regional etc.). It comprises a selection of the best papers presented at the SIEV 2015 conference "Appraisal: Current Issues and Problems", which was held in Bari, Italy, in July 2015, and brought together architects, engineers, urban planners, decision-makers and government representatives.

PPP & Private Capital for Sustainable Infrastructure and Smart Cities Jan 17 2022 This work, fruit of the research activities of the Centre of Excellence on sustainable finance for infrastructure and smart

cities (exsuf), set up in 2021 from the «Committee on Housing and Land Management» of the United Nations Economic Commission for Europe (unece) and from Liuc – Cattaneo University, aims to describe the state of the art in the regulations and principle features and definitions of sustainable finance and smart cities, analyzing the classical schemes of project financing and ppps and highlighting the present scenario in which public and private actors, and, in particular, private capital entities move. By means of a market analysis of ppps in Italy and thanks to requests coming from discussions with practitioners and sector experts, the text concludes by showing how classical ppps models have to evolve to guarantee flexibility and to promote constructive dialogue between public entities and the private sector with the goal of identifying new financial and design metrics and new ways of putting them into practice.

Management and Valuation of Heritage Assets Mar 07 2021 The valuation of Heritage Assets (HA), which are a vital resource for the non-profit public or private organizations operating in the heritage sector is on the one hand sometimes difficult to do, and on the other, can be excessively costly with respect to the correlated disclosure benefits. The growing application of the (full or modified) accrual basis of accounting in the public and non-profit sectors has extended and reanimated this issue. This book applies the comparative method, in order to provide new information on the analyzed subject. Specifically, after having investigated the different theoretical and technical proposals, it compares the reporting behavior of significant cases of Italian and American public and private organizations, coming from different cultural and management approaches. Proposing a link between the managerial and reporting issues of the organizations involved in the management and maintenance of heritage assets, this book is crucial in the task to optimize the performance of organizations in this sector.

Families and Family Values in Society and Culture Jul 31 2020 This book which has been created in the framework of the EU-funded COST Action INTERFASOL brings together researchers from 22 INTERFASOL countries, who frame intergenerational family solidarity in the specific historical, cultural, social and economic context of their own country. Integrating different perspectives from social and political sciences, economics, communication, health and psychology, the book offers country-specific knowledge and new insights into family relations, family values and family policies across Europe. Praise for Families and Family Values in Society and Culture: "This comprehensive study of families in Europe reveals the strength and variation in family solidarity and values. By drawing together detailed descriptions of continuity and change, Families and Family Values in Society and Culture provides a fascinating account of the social and cultural contexts that shape European family life. The case studies of families in different European countries compare demographic and welfare regimes to consider the challenges facing generations in Europe and responses to these. The book is an invaluable resource for researchers studying family life and inter-generational solidarity." Clare Holdsworth Professor of Social Geography Keele University "This book is based on the testimony of experts, each of them proposing analyses which are specific to their own society. It provides an opportunity for the reader to take a new look at the evolution of intergenerational solidarity in 22 countries, whose wealth, welfare systems, and demographic situations, as well as recent events (wars, migratory movements, ...) offer specific challenges. It adopts the perspective of the insider to shed light not only on culture and values in each country, but also on conflicts between tradition and modernity, and between subcultures in the same society. The book thus allows better understanding of changes in intergenerational and gender relations, and the variety of solutions implemented or suggested to promote more satisfactory expressions of intergenerational solidarity for the next decade. Families and Family Values in Society and Culture provides an invaluable contribution for cross-cultural and social sciences researchers interested in understanding how different forms of solidarity arise from family and social dynamics." Anne Marie Fontaine Professor of Psychology University of Porto

Computational Science and Its Applications – ICCSA 2020 Jun 29 2020 The seven volumes LNCS 12249-12255 constitute the refereed proceedings of the 20th International Conference on Computational Science and Its Applications, ICCSA 2020, held in Cagliari, Italy, in July 2020. Due to COVID-19 pandemic the conference was organized in an online event. Computational Science is the main pillar of most of the present research, industrial and commercial applications, and plays a unique role in exploiting ICT innovative technologies. The 466 full papers and 32 short papers presented were carefully reviewed and selected from 1450 submissions. Apart from the general track, ICCSA 2020 also include 52 workshops, in various areas of computational sciences, ranging from computational science technologies, to specific areas of computational sciences, such as software engineering, security, machine learning and artificial intelligence, blockchain technologies, and of applications in many fields.

Mantua Humanistic Studies. Volume VII Dec 04 2020 The scientific series Mantua Humanistic Studies (ISSN 2612-0437) is devoted to collect studies, proceedings, and papers in the field of Humanities. Every volume is peer-reviewed, and is published with its own ISBN code. A full electronic version (PDF) of the volume is shared for free in “ Gold Open Access ” – and fully indexed – on Google Books database. Moreover, traditional paper copies are available for purchasing at major booksellers.

Advances in Architecture, Engineering and Technology Jul 11 2021 This book summarizes the latest studies regarding innovation in urban design and planning. It shares many tips and insights about sustainable solutions for the issues facing transport systems, innovative digital technologies, and ICT trends. The book touches upon the need to integrate the three fields of Architecture, Engineering, and Technology that have become indispensable. This is intended to respond to the increasing human needs and population growth in cities on one hand and to develop a holistic approach that helps overcome challenges to sustainability and environment management on the other hand. With the power of engineering in practice, problems of design and development once considered too complex to be dealt with other than empirically, intuitively, or by trial and error, are now becoming more solvable and applicable. This book offers strategies and solutions that enable designers to bring together knowledge in the fields of architecture, engineering, and technology to overcome challenges facing in modern times.

The Changing Administrative Law of an EU Member State May 09 2021 This book presents the evolution of Italian administrative law in the context of the EU, describing its distinctive features and comparing it with other experiences across Europe. It provides a comprehensive overview of administrative law in Italy, focusing on the main changes occurred over the last few decades. Although the respective chapters generally pursue a legal approach, they also consider the influence of economic, social, cultural and technological factors on the evolution of public administration and administrative law. The book is divided into three parts. The first part addresses general issues (e.g. procedures and organization of public administrations, administrative justice). The second part focuses on more specific topics (e.g. public intervention in the economy, healthcare management, local government). In the third part, the evolution of Italian administrative law is discussed in a comparative perspective.

Innovative Built Heritage Models Feb 06 2021 Several international and European institutions have given increasing importance to sustainable approaches to our existing building stock and the role of built heritage in this process. At the same time, preventive and planned conservation of built heritage has been increasingly recognised by researchers given its cost-effectiveness for owner-managers, effective long-term quality protection and environmental enhancement of structures, as well as its potential of activating heritage in the employment sector and empowering of local communities.

‘ Innovative Built Heritage Models ’ collects the lectures presented at the international conference on

CHANGES (2017 Thematic Week, Leuven, Belgium, 6-8 February 2017). The aim of the conference was to provide an international overview of the existing strategies, processes and operational case studies that support the implementation of a preventive and planned conservation approach in the built heritage sector. The conference twins with the ' CHANGES ' project, supported by the Joint Programming Initiative Heritage Plus programme. This publication meets the increasing demand for shared information to support the transition towards a more sustainable conservation process. The volume consists of three main parts: ' The CHANGES paradigm ', ' Preventive and planned conservation ' and ' Case studies of Change '. The book reflects on CHANGES in a straightforward manner by providing research and case studies that serve as baseline records, guidance and essential literature for researchers and practitioners involved in the built heritage sector.

Partnership Pubblico Privato Jan 29 2023 Partnership Pubblico Privato (PPP) nasce dell ' attività di formazione e consulenza realizzata nel corso degli ultimi quindici anni dalle Autrici e interiorizza le loro esperienze nazionali e internazionali nell ' ambito di politiche, programmi e progetti di PPP. Il libro offre una nuova prospettiva sulla PPP, mettendo a sistema, in ogni capitolo, la dimensione economico-finanziaria, giuridica e manageriale. I contratti di PPP sono operazioni in cui queste tre dimensioni non possono essere scisse e richiedono una profonda comprensione congiunta per renderne possibile un utilizzo più efficiente, efficace e innovativo. È un volume di principi, denso di spunti operativi, per il policy maker e per i manager pubblici e privati, che aiuta a comprendere l ' essenza della PPP e le modalità di utilizzo, al fine di colmare i gap che ne hanno ostacolato il corretto utilizzo. Oggi, come non mai prima, i contratti di PPP rappresentano la risposta alle sfide economiche e sociali dell ' Italia, a patto che il sistema pubblico e privato siano in grado, mettendo a sistema le loro reciproche conoscenze nell ' ambito dei loro rispettivi ruoli, di individuare soluzioni innovative e value for money. Il volume contiene gli aggiornamenti relativi alla bozza del Nuovo Codice dei Contratti e al Manuale Eurostat.
