Withheld by leading pedagogues in an effort to control competition, the art of reed making in the early 20th century has been shrouded in secrecy, producing a generation of performers without reed making fluency. While tenets of past decades remain in modern pedagogy, Christin Schillinger details the historical pedagogical trends of bassoon reed making to examine the impact different methods have had on the practice of reed making and performance today. Schillinger traces the pedagogy of reed making from the earliest known publication addressing bassoon pedagogy in 1687 through the publication of Julius Weissenborn's Praktische Fagott-Schule and concludes with an in-depth look at contemporary methodologies developed by Louis Skinner, Don Christlieb, Norman Herzberg, and Lewis Hugh Cooper. Aimed at practitioners and pedagogues of the bassoon, this book provides a deeper understanding of the history and technique surrounding reed-making craft and instruction. The "Heinemann Mathematics" scheme has been developed by the authors of the primary course "SPMG", with the aim of building on established strengths to provide a structured development of children's mathematical knowledge and skills within the revised curricula. Maths Mastery Reasoning: Teacher Resources KS1 contains a wealth of practical ideas and photocopiable resources to promote reasoning using precise mathematical vocabulary and stem sentences. It will enable teachers to explicitly teach children how to reason so they can answer questions such as: Which skills do I need to complete the task? How can I explain my thinking? What vocabulary do I need to use? Covering all areas of the primary maths curriculum including place value, fractions and the four operations, each photocopiable activity enables pupils to practise key skills and make links to the maths they are using. Many of the activities can be completed using a concrete, pictorial and abstract (CPA) approach to teaching maths. Written by experienced teacher John Bee, this must-have resource is ideal for teachers just starting on the maths mastery journey or for more experienced teachers who need some fresh input and ideas. This unique book will engage pupils in lively debate when they hypothesise, agree, criticise and prove their learning around key mathematical concepts. A companion book for Key Stage 2 is also available. Planned, developed and written by practising classroom teachers with a wide variety of experience in schools, this maths course has been designed to be enjoyable and motivating for pupils and teachers. The course is open and accessible to pupils of all abilities and backgrounds, and is differentiated to provide material which is appropriate for all pupils. It provides spiral coverage of the curriculum which involves regular revisiting of key concepts to promote familiarity through practice. This teacher's file is designed for Year 8.
