‘Interspersed with acts of breathtaking linguistic daring.’ Charlotte Mendelson, Observer Book of the Year Opening with a powerful and tender ‘Ode to the Hymen’, Sharon Olds uses this age-old poetic form to address many aspects of herself, in a collection that is centred around the female body and female pleasures, and touches along the way on parts of her own story which will be familiar from earlier works, each episode and memory now burnished by the wisdom and grace of looking back. In such poems as ‘Ode to My Sister’, ‘Ode of Broken Loyalty’, ‘Ode to My Whiteness’, ‘Blow Job Ode’, ‘Ode to the Last 38 Trees in New York City Visible from This Window’, Olds treats us to an intimate self-examination that, like all her work, is universal and by turns searing and charming in its honesty. From the early bodily joys and sorrows of her girlhood to the recent deaths of those dearest to her – the ‘Sheffield Mountain Ode’ for Galway Kinnell is one of the most stunning pieces here – Olds shapes her world in language that is startlingly fresh, profound in its conclusions, and life-giving for the reader. "Enemies to Lovers and a revenge so sweet you can't turn away." Emily Goodwin, New York Times Best Selling Author. Vengeance will be beautiful. Vengeance has a name, and her name is mine. My role is to take action against the darkest men I've ever come across. To kill them one at a time. Until my list is

complete. And in doing so, I'm going to use my most powerful weapon--my body. They ruined my life, and now it's my turn to destroy theirs. Even if it means a death sentence for me, each drop of blood will be deserving. Each kill will be worthy of the price I may need to pay. My name is Isadora, and my target is the Moretti Mafia. All new standalone from USA Today Best Selling Author T.L Smith. This book considers the full sweep of Haitian community invention and recreation in a multitude of national territories, with an eye toward the "place" factors that shape the everyday lives of Haitian migrants. Regine O. Jackson brings together an interdisciplinary group of scholars to explore how Haitian communities differ across time and place, as well as how migrants adjust to new economic, political and racial realities. The volume includes descriptive ethnographies of Haitians in 19th century Jamaica, eastern Cuba, Detroit, the Dominican Republic, Guadeloupe, Paris, and Boston, and innovative scholarly work on non-geographic sites of Haitian community building. The most important question addressed here is not whether the places described represent typical or exceptional Haitian diasporic communities, but how, why and to what effect do Haitians in particular places use diaspora as a signifier. By examining the diversity (and sameness) of the Haitian experience in diaspora, Geographies of the Haitian Diaspora asks how we might situate community in view of increased scholarly attention to transnational processes. This volume introduces readers to the methodology of dynamic systems analysis, using mathematical modelling techniques as an aid to understanding biological phenomena. It creates an ability to

appreciate current medical and biological literature, in which mathematical models are being used with increasing frequency, and provides an introduction to the more advanced techniques of systems science. Mathematical concepts are illustrated by reference to frequent biological examples. By the use of case studies drawn from physiology, the various levels of mathematical modelling which can be adopted are presented. way, Palo Vista seems like a typical California city, with office buildings, schools, and homes sprawled out across suburbia, filled with families making a life for themselves at the dawn of the new millennium. But two seniors at Mt. MacMurray High are about to find out that nothing is as it seems. Jason Nix is a star athlete and honors student who can't seem to remember anything about his childhood. Elyse Van Auten is a budding artist from a broken home whose father left her mother two years ago - or so she's been led to believe. Eugene is remembering the summer of 1938 in Frenchtown, a time when he began to wonder "what I was doing here on the planet Earth." Here in vibrant, exquisite detail are his lovely mother, his aunts and uncles, cousins and friends, and especially his beloved, enigmatic father. Here, too, is the world of a mill town: the boys swimming in a brook that is red or purple or green, depending on the dyes dumped that day by the comb shop; the visit of the ice man; and the boys' trips to the cemetery or the forbidden railroad tracks. And here also is a darker world—the mystery of a girl murdered years before. Robert Cormier's touching, funny, melancholy chronicle of a vanished world celebrates a son's connection to his father and human relationships that are timeless. This book explains how and why information literacy can help to foster critical thinking and discerning

attitudes, enabling citizens to play an informed role in society and its democratic processes. In early 21st century societies, individuals and organisations are deluged with information, particularly online information. Much of this is useful, valuable or enriching. But a lot of it is of dubious quality and provenance, if not downright dangerous. Misinformation forms part of the mix. The ability to get the most out of the information flow, finding, interpreting and using it, and particularly developing a critical mindset towards it, requires skills, know-how, judgement and confidence – such is the premise of information literacy. This is true for many aspects of human endeavour, including education, work, health and self-enrichment. It is notably true also for acquiring an understanding of the wider world, for reaching informed views, for recognising bias and misinformation, and thereby for playing a part as active citizens, in democratic life and society. This ground-breaking and uniquely multi-disciplinary book explores how information literacy can contribute to fostering attitudes, habits and practices that underpin an informed citizenry. The 13 chapters each come from a particular perspective and are authored by international experts representing a range of disciplines: information literacy itself, but also political science, pedagogy, information science, psychology. Informed Societies: Why Information literacy matters for citizenship, participation and democracy covers: - why information literacy and informed citizens matter for healthy, democratic societies - information literacy's relationship with political science - information literacy's relationship with human rights - how information literacy can help foster citizenship,

participation, empowerment and civic engagement in different contexts: school students, refugees, older people and in wider society - information literacy as a means to counter misinformation and fake news - the challenges of addressing information literacy as part of national public policy. The book will be essential reading for librarians and information professionals working in public libraries, schools, higher education institutions and public bodies; knowledge and information managers in all sectors and student of library and information science students, especially those at postgraduate/Masters level who are planning dissertations. Because of the topicality and political urgency of the issues covered, the book will also be of interest to students of political science, psychology, education and media studies/journalism; policy-makers in the public, commercial and not-for-profit sectors and politicians implications of information use and information/digital literacy. *Humanism and Religion in Early Modern Spain* brings together twenty-five essays by renowned historian Terence O'Reilly. The essays examine the interplay of religion and humanism in a series of writings composed in sixteenth-century Spain. It begins by presenting essential background: the coming together during the reign of the Emperor Charles V of Erasmian humanism and various movements of religious reform, some of them heterodox. It then moves on to the reign of Philip II, focusing on the mystical poetry and prose of St John of the Cross. It explores the influence on his writings of his humanist learning – classical, biblical and patristic. The third part of the book concerns a verse-epistle by John's contemporary, Francisco

de Aldana. One chapter presents the text with a parallel version in English, whilst two others trace its debt to Florentine Neoplatonism, particularly the thought of Marsilio Ficino. The final part is devoted to the humanism of the poet and Scripture scholar Luis de León, and specifically to the confluence in his work of biblical and classical motifs. This book is essential reading for scholars and students of early modern Spanish history, as well those interested in literary studies and the history of religion. Also time tables of railroads in Central America. Air line schedules. Troll the information-packed pages for advice and direction on fishing methods, equipment, organizations, and the latest fishing products and gadgets. This is a concise paperback version of the Laboratory Test Handbook. 'Leisure and Recreation Management' is essential reading for anyone interested in exploring both the theory and the practicalities of managing leisure and recreational facilities. On January 12, 2010, the deadliest earthquake in the history of the Western Hemisphere struck the nation least prepared to handle it. Jonathan M. Katz, the only full-time American news correspondent in Haiti, was inside his house when it buckled along with hundreds of thousands of others. In this visceral, authoritative first-hand account, Katz chronicles the terror of that day, the devastation visited on ordinary Haitians, and how the world reacted to a nation in need. More than half of American adults gave money for Haiti, part of a monumental response totaling \$16.3 billion in pledges. But three years later the relief effort has foundered. It's most basic promises—to build safer housing for the homeless, alleviate severe poverty, and strengthen Haiti to face future

disasters—remain unfulfilled. *The Big Truck That Went By* presents a sharp critique of international aid that defies today's conventional wisdom; that the way wealthy countries give aid makes poor countries seem irredeemably hopeless, while trapping millions in cycles of privation and catastrophe. Katz follows the money to uncover startling truths about how good intentions go wrong, and what can be done to make aid "smarter." With coverage of Bill Clinton, who came to help lead the reconstruction; movie-star aid worker Sean Penn; Wyclef Jean; Haiti's leaders and people alike, Katz weaves a complex, darkly funny, and unexpected portrait of one of the world's most fascinating countries. *The Big Truck That Went By* is not only a definitive account of Haiti's earthquake, but of the world we live in today. Goodreads Molly Trent is a passionate herbalist whose sorrow-filled childhood has driven her to a new mission in life—to make people feel better. Unfortunately, a series of burglaries at her wellness shop and a disgruntled customer put her in the path of a cynical and suspicious detective, who thinks she does more harm than good. Notwithstanding the important role of direct clinical and endoscopic examination in modern management of pathological conditions of the larynx, radiological study the and, more specifically, cross-sectional imaging by CT and MRI make definite diagnostic contributions by virtue of their potential to display superbly the deeper extent of laryngeal lesions. Indeed, remarkable progress has been achieved during recent years in CT and MRI techniques as applied to the neck region. This book sets out to provide a sorely needed update of our knowledge of the diagnostic potential of these cross-sectional methods and constitutes a very welcome addition to our series "Medical Radiology", which aims to cover all important clinical imaging fields of modern diagnostic radiology. It will be of great interest to general and head and neck radiologists as well as to ENT surgeons and radiotherapists. Professor R. Hermans and the other distinguished contributors to this work are internationally renowned experts in the field and they have accumulated vast experience and a wealth of radio-pathological knowledge of the larynx over the years. I would

like to congratulate them most sincerely for this outstanding volume, its comprehensive contents and its superb illustrations. I hope that this book will meet with the same great success as previously published volumes in the series. I would appreciate any constructive criticism that might be offered. This book provides detailed insight into the difficult problem of pediatric airway management. Both established treatment modalities and new management concepts are considered in depth, and controversies relating to the most difficult airway reconstructions are discussed. To help the reader, boxes are included to summarize procedures and to list tips, tricks, and traps relevant to daily practice. The contributors to the book have all been directly involved in the management of children with airway disorders and write on the basis of their vast experience. Otolaryngologists, pediatric surgeons, and thoracic surgeons involved in the management of pediatric airway problems, and in particular airway stenosis, will find this book to be a treasure trove of invaluable information and guidance.

Graffiti writing was born in the streets of Philadelphia in the late 1960s. But it was in New York in the early 1970s that it became a full-fledged urban art, gradually taking over the landscape of the city, from its walls to its subway cars. This is a writing manual, a detailed examination of how graffiti writers have developed the twenty-six letters of the alphabet. It includes the contribution of ten of the international scene's most talented creators answer Woshe's questions about matters

that include their practice, their relationship with letters and their backgrounds. It includes a map of New York with the sites where the most important graffiti are located. This new edition is a reprint of the hardback book, first published in 2005. As the pace of life increases and the effects of globalisation invade more and more areas of everyday life, free time becomes an increasingly precious resource. For those who are experiencing a shortage of free time - a 'time-squeeze' - and for the growing numbers looking forward to abundant free time in retirement, leisure has never been more vital for ensuring individual and social health and wellbeing and the enhancement of social capital and the quality of life. This book is an expanded and updated edition of a previous work entitled *World Leisure Participation: Free Time in the Global Village*, by the same editors (CABI, 1996). It brings together the results of the most recent national leisure participation surveys from 15 countries, including three countries not previously covered. The book also includes increased coverage of time-budget surveys and new themes such as public policy dimensions. It also examines the methodological problems and challenges of conducting national surveys in the field, and their future prospects.
