Constructive Side-Channel Analysis and Secure Design Jul 26 2020 This book constitutes the thoroughly refereed post-conference proceedings of the 4th International Workshop, COSADE 2013, held in Paris, France, in March 2013. The 13 revised full papers presented together with two invited talks were carefully selected from 39 submissions and collect truly existing results in cryptographic engineering, from concepts to artifacts, from software to hardware, from attack to countermeasure.

Does Using Local Pidgin Effect the Outcome of English Learning? The Case of Nigerian Students Sep 27 2020 Academic Paper from the year 2019 in the subject Didactics - English - Pedagogy, Literature Studies, , language: English, abstract: This study examines the effects of Nigerian pidgin on students' performance in English studies using selected students of Junior Secondary School, Bwari Abuja as case study. In conducting the research the researcher uses qualitative and quantitative approach method and sources data from both primary and secondary sources. Primary data are collected through the use of questionnaire with open-ended variables while secondary data collection is from existing literature on the project topic. Likert-type scale arranged in

order of "very significantly", "significantly", "neutral", "insignificantly" and "very insignificantly" are used to get respondents opinion on the variables. The major research questions are: What are the effects of Nigerian Pidgin on students' performance in English studies? Are students allowed to use Nigerian Pidgin in academic works? The general objective of the study is to find out the impact of Nigerian Pidgin on students' performance in English studies while the hypotheses posit for the study include: Ho1: There is no significant relationship between Nigerian Pidgin and students' performance in English Studies. Ho2: There is no significant relationship between students' use of Nigerian Pidgin on the outcome of their academic performance. The major results of the study indicate that 94% or the respondents posits that Nigerian Pidgin affects academic performance while the test of hypothesis with a degree of freedom 4 percent indicate that there is a significant relationship between Nigerian Pidgin and students' performance in English studies. The study recommends that the use of Nigerian Pidgin in an academic community such as Junior Secondary School Bwari, Abuja should not be encouraged. The study suggests that a more

robust examination on the research topic involving other academic communities be conducted. Besides,, a comparative study on the impact of Pidgin on students' performance in other English speaking countries should be carried out in order to investigate how its been handled.

How Genes Influence Behavior 2e Aug 19 2022 How Genes Influence Behavior takes a personal and lively approach to the study of behavioral genetics, providing an up-to-date and accessible introduction to a variety of approaches and their application to a wide range of disorders, and modeling a critical approach to both methods and results. This second edition includes additional biology content to help students understand the biological foundations of the field, while maintaining an appropriate focus on the main issues of relevance to psychology students; updates coverage of genomic technologies and their applications; and covers a wider range of disorders, including autism spectrum disorder, eating disorders, and intellectual disability. A new final chapter guides students through a range of quantitative approaches using worked examples that relate directly to cases and examples used

earlier in the text, and addresses current issues arising from debates around reproducibility. The online resources that accompany this book include: For students* Multiple choice questions for students to check their threshold knowledge* Data sets for students to manipulate, so that they can apply what they have learned For lecturers* Figures and tables from the book, ready to download

European Yearbook / Annuaire Européen, Volume 61 (2013)
Feb 13 2022 The European Yearbook promotes the scientific study of nineteen European supranational organisations and the OECD. Each volume contains a detailed survey of the history, structure and yearly activities of each organisation and an up-to-date chart providing a clear overview of the member states of each organisation.
Brookings Papers on Economic Activity: Spring 2019 Jan 12 2022 Brookings Papers on Economic Activity (BPEA) provides academic and business economists, government officials, and members of the financial and business communities with timely research on current economic issues. Contents: On Secular Stagnation in the Industrialized World, Lukasz Rachel and Lawrence H. Summers A Forensic Examination of China's National Accounts, Wei Chen, Xilu Chen, Chang-Tai Hsieh, and Zheng Song A Unified Approach to Measuring u^* , Richard K. Crump, Stefano Eusepi, Maric Giannoni, and Aysgöl Şahin Fiscal Space

and the Aftermath of Financial Crises: How It Matters and Why, Christina D. Romer and David H. Romer Okun Revisited: Who Benefits Most from a Strong Economy? Stephanie R. Aaronson, Mary C. Daly, William L. Wascher, and David W. Wilcox On the Economics of a Carbon Tax for the United States, Gilbert E. Metcalf
Current Trends in Analysis and Its Applications Jan 20 2020 This book is a collection of papers from the 9th International ISAAC Congress held in 2013 in Kraków, Poland. The papers are devoted to recent results in mathematics, focused on analysis and a wide range of its applications. These include up-to-date findings of the following topics: - Differential Equations: Complex and Functional Analytic Methods - Nonlinear PDE - Qualitative Properties of Evolution Models - Differential and Difference Equations - Toeplitz Operators - Wavelet Theory - Topological and Geometrical Methods of Analysis - Queueing Theory and Performance Evaluation of Computer Networks - Clifford and Quaternion Analysis - Fixed Point Theory - M-Frame Constructions - Spaces of Differentiable Functions of Several Real Variables - Generalized Functions - Analytic Methods in Complex Geometry - Topological and Geometrical Methods of Analysis - Integral Transforms and Reproducing Kernels - Didactical Approaches to Mathematical Thinking Their wide applications in biomathematics, mechanics,

queueing models, scattering, geomechanics etc. are presented in a concise, but comprehensible way, such that further ramifications and future directions can be immediately seen.

Recent Results on Time-Delay Systems Dec 23 2022 This book mostly results from a selection of papers presented during the 11th IFAC (International Federation of Automatic Control) Workshop on Time-Delay Systems, which took place in Grenoble, France, February 4 - 6, 2013. During this event, 37 papers were presented. Taking into account the reviewers' evaluation and the papers' presentation the best papers have been selected and collected into the present volume. The authors of 13 selected papers were invited to participate to this book and provided a more detailed and improved version of the conference paper. To enrich the book, three more chapters have been included from specialists on time-delay systems who presented their work during the 52nd IEEE Conference on Decision and Control, which held in December 10 - 13, 2013, at Florence, Italy. The content of the book is divided into four main parts as follows: Modeling, Stability analysis, Stabilization and control, and Input-delay systems. Focusing on various topics of time-delay systems, this book will be interesting for researchers and graduate students working on control and system theory.
Recent Trends in Nanotechnology and Materials Science May 24 2020 This book

presents 8 selected reviews from the 2013 International Conference on Manufacturing, Optimization, Industrial and Material Engineering, held in Bandung, Indonesia, 09-10 March 2013. The chapters focus on new advances and research results in the fields of Nanotechnology and Materials Science, from metals to thin films technology.

Mathematical Progress in Expressive Image Synthesis

I May 16 2022 This book presents revised versions of the best papers selected from the symposium "Mathematical Progress in Expressive Image Synthesis" (MEIS2013) held in Fukuoka, Japan, in 2013. The topics cover various areas of computer graphics (CG), such as surface deformation/editing, character animation, visual simulation of fluids, texture and sound synthesis and photorealistic rendering. From a mathematical point of view, the book also presents papers addressing discrete differential geometry, Lie theory, computational fluid dynamics, function interpolation and learning theory. This book showcases the latest joint efforts between mathematicians, CG researchers and practitioners exploring important issues in graphics and visual perception. The book provides a valuable resource for all computer graphics researchers seeking open problem areas, especially those now entering the field who have not yet selected a research direction.

TALIS 2018 Results (Volume II) Teachers and School Leaders as Valued

Professionals Dec 31 2020

This report aims to provide an in-depth analysis of teachers' and school leaders' perceptions of the value of their profession, their work-related well-being and stress, and their satisfaction with their working conditions. It also offers a description of teachers' and school leaders' contractual arrangements, opportunities to engage in professional tasks such as collaborative teamwork, autonomous decision making, and leadership practices.

Evaluating the Effects of Artificial Intelligence on Complexity in Marketing

Oct 17 2019 Bachelor Thesis from the year 2018 in the subject Business economics - Offline Marketing and Online Marketing, grade: 1,9, Reutlingen University (ESB Business School), language: English, abstract: The research question explored in this paper is about a potential benefit of AI in marketing, which to this day is comparatively unexplored. Even though the concept of AI has been around since the 1950s, and current research and development make significant progress in this area, scientific literature dealing with AI in marketing consists of less than 300 published articles. This paper distinguishes itself from related papers, as it goes beyond investigating whether AI has an impact on business or not. The results of this thesis shall not only show the potential AI holds for marketing, but also suggest constant theoretical exploration of untapped fields in marketing. The Internet of

things (IoT) and big data changed customer behavior and how businesses work. This trend has led to a continued increase in complexity for marketing managers. In 2017, 8.4 billion devices were connected to the internet. This number is forecasted to increase to 20.4 billion by 2020. The immense amount of data generated, collected, and analyzed has propelled new markets, such as big data and artificial intelligence. Marketing managers struggle to keep up with the sheer volume of data available and the surging complexity of marketing. Connecting dispersed data and finding patterns, leads to helpful insights, which are said to reduce complexity. Many businesses lack a clear strategy to tap into the benefits of AI and gain a competitive advantage.

Web Information Systems Engineering -- WISE 2013

Jan 24 2023 This book constitutes the proceedings of the 14th International Conference on Web Information Systems Engineering, WISE 2013, held in Nanjing, China, in October 2013. The 48 full papers, 29 short papers, and 10 demo and 5 challenge papers, presented in the two-volume proceedings LNCS 8180 and 8181, were carefully reviewed and selected from 198 submissions. They are organized in topical sections named: Web mining; Web recommendation; Web services; data engineering and

database; semi-structured data and modeling; Web data integration and hidden Web; challenge; social Web; information extraction and multilingual management; networks, graphs and Web-based business processes; event processing, Web monitoring and management; and innovative techniques and creations.

Modeling and Using Context

Mar 02 2021 This book constitutes the proceedings of the 8th International and Interdisciplinary Conference on Modeling and Using Context, CONTEXT 2013, held in Annecy, France, in October/November 2013. The 23 full papers and 9 short papers presented were carefully reviewed and selected from numerous submissions. In addition the book contains two keynote speeches and 9 poster papers. They cover cutting-edge results from the wide range of disciplines concerned with context, including: Cognitive Sciences (Linguistics, Psychology, Computer Science, Neuroscience), and computer science (artificial intelligence, logics, ubiquitous and pervasive computing, context-awareness systems), and the Social Sciences and Organizational Sciences, as well as the Humanities and all application areas, including Medicine and Law.

Effective Results and Methods for Diophantine Equations over Finitely

Generated Domains Oct 21 2022 Provides exceptional coverage of effective solutions for Diophantine equations over finitely generated domains.

The Future of Dynamic Structural Science

Jun 24 2020 This work focuses on complementary crystallographic and spectroscopic areas of dynamic structural science, from papers presented at the 46th NATO sponsored course in Erice, Sicily 2013. These papers cover a range of material from background concepts to more advanced material and represent a fully interdisciplinary collection of the latest ideas and results within the field. They will appeal to practising or novice crystallographers, both chemical and biological, who wish to learn more about modern spectroscopic methods and convergent advances and hence vice versa for experimental and computational spectroscopists. The chapters refer to the latest techniques, software and results and each chapter is fully referenced. The volume provides an excellent starting point for new comers in the emerging, multi-disciplinary area of time resolved science.

The Euro Experiment Mar 14 2022 A clear, analytical and balanced guide to the euro experiment and subsequent crisis that will appeal to a wide readership.

[The Awakening of Muslim Democracy](#) Aug 07 2021 Why and how did Islam become such a political force in so many Muslim-majority countries? In this book, Jocelyne Cesari investigates the relationship between modernization, politics, and Islam in Muslim-majority countries such as Egypt, Iraq,

Pakistan, Tunisia, and Turkey - countries that were founded by secular rulers and have since undergone secularized politics. Cesari argues that nation-building processes in these states have not created liberal democracies in the Western mold, but have instead spurred the politicization of Islam by turning it into a modern national ideology. Looking closely at examples of Islamic dominance in political modernization, this study provides a unique overview of the historical and political developments from the end of World War II to the Arab Spring that have made Islam the dominant force in the construction of the modern states, and discusses Islam's impact on emerging democracies in the contemporary Middle East.

ACCA Paper P6 Advanced Taxation FA2008 Practice and Revision Kit

Nov 10 2021 The Association of Chartered Certified Accountants (ACCA) is the global body for professional accountants. With over 100 years of providing world-class accounting and finance qualifications, the ACCA has significantly raised its international profile in recent years and now supports a BSc (Hons) in Applied Accounting and an MBA.BPP Learning Media is an ACCA Official Publisher. Paper P6, Advanced Taxation, requires you to extend the core tax knowledge that you learnt for Paper F6. As well as widening your knowledge of the core taxes, you will need to study inheritance tax, stamp taxes and trusts for the first time. In

this paper you will also be expected to comment on ethical issues. In Paper P6 all of the questions set will be scenario type questions as opposed to the purely computational questions that you met at Paper F6. The emphasis of the questions will be on the interpretation of a given situation. You may need to propose alternative strategies and compare and contrast the results. Marks will be specifically awarded in the examination for the demonstration of effective communication skills. You will also need to demonstrate that you are aware that there may be non-tax matters that should be taken into account. The important point about this paper is that you need to develop your application skills. The best way to do this is to practise as many exam standard questions as possible. BPP Learning Media's P6 FA2008 Practice and Revision kit allows you to do just this. The Practice and Revision kit is new and has been specifically written for this paper. Most of our questions are exam standard, although some are preparation questions which ease you into the topic you are studying. Questions are grouped into topic areas so that you can easily identify those that cover particular areas. Our detailed solutions often provide top tips, advice on how to approach the question or advice on gaining easy marks. There is also a reference so that you know where the topics concerned are covered in the study text. BPP Learning Media is the

publisher of choice for many ACCA students and tuition providers worldwide. Join them and plug into a world of expertise in ACCA exams. Commutative Algebra and Noncommutative Algebraic Geometry Nov 22 2022 This book surveys fundamental current topics in these two areas of research, emphasising the lively interaction between them. Volume 2 focuses on the most recent research. Algorithms in Bioinformatics Jun 17 2022 This book constitutes the refereed proceedings of the 13th International Workshop on Algorithms in Bioinformatics, WABI 2013, held in Sophia Antipolis, France, in September 2013. WABI 2013 is one of seven workshops which, along with the European Symposium on Algorithms (ESA), constitute the ALGO annual meeting and highlights research in algorithmic work for bioinformatics, computational biology and systems biology. The goal is to present recent research results, including significant work-in-progress, and to identify and explore directions of future research. The 27 full papers presented were carefully reviewed and selected from 61 submissions. The papers cover all aspects of algorithms in bioinformatics, computational biology and systems biology. OECD Economic Surveys: Brazil 2013 Dec 11 2021 OECD's 2013 economic review of Brazil examines recent economic developments, policies and prospects. This edition's special chapters cover productivity and

competitiveness of Brazilian firms and income distribution and the new middle class. The Effects of Incomplete Acquisition on Grammatical Gender Agreement in Heritage Speakers Apr 03 2021 Seminar paper from the year 2017 in the subject English Language and Literature Studies - Other, grade: 2,0, Technical University of Braunschweig (Institut für Anglistik und Amerikanistik), language: English, abstract: The following paper compares and contrasts three different studies in order to investigate, whether grammatical gender agreement in heritage speakers involves incomplete acquisition, and if so, how gender agreement is affected by this and other factors like age of onset and context of acquisition. The papers by Montrul, Foote, & Perpiñán (2008) and Alarcón (2011) analyse Spanish heritage speakers, whereas the study by Polinsky (2008) focuses on American Russian heritage speakers. In this paper, all three studies are analysed in order to compare the participants, the procedure and the specific results concerning grammatical gender under incomplete acquisition across different languages. The analysis of the papers is followed by a general discussion of their main outcome. In the end, I will conclude the overall results and provide an outlook. **Financial Health of the Higher Education Sector** Apr 22 2020 This report provides an overview of the financial health of the Higher Education Funding Council for England

(HEFCE)-funded higher education sector in England. The analysis covers financial results for the academic year 2013-14, as submitted to HEFCE in December 2014, as well as the outcomes from the sector's Transparent Approach to Costing (TRAC) reporting for 2013-14, as submitted to HEFCE in January 2015. The report provides universities and higher education colleges with feedback on their financial performance in 2013-14. It also provides other stakeholders with information about the current financial health of the sector. The financial results for the higher education sector in 2013-14 show a financially sound position overall. While the financial outturn was stronger than projected by the sector in July 2014, sector financial results were similar to those reported in 2012-13. It should be noted, however, that significant variations continue in the financial performances of individual institutions across the sector, with the main financial strength of the sector remaining in a small number of institutions.

What drives Income Inequality at the Firm - Level? Literature Review based on Recent Trends in Germany and the U.S. Mar 22 2020 Bachelor Thesis from

the year 2017 in the subject Economics - Finance, grade: 1,0, LMU Munich, language: English, abstract: This thesis will concern research on causes of income inequality, it asks the following question: What drives income inequality at the firm-level? More precisely this would entail the questions: What influences the development of market earnings inequality between firms, understood as establishments? What influences the development of market earnings inequality between firms, understood as distinct corporate units? I start my thesis with two recent articles that address these questions and that employ a similar methodology to different countries. The first one is a paper by David Card, Jörg Heining and Patrick Kline Card et al. (CHK), the second one is by Jae Song, David J. Price, Fatih Guvenen, Nicholas Bloom and Till von Wachter Song et al. (SPG). CHK is concerned with firms as establishments in Germany and SPG with firms as corporate units in the U.S. Both articles are concerned with more than just between-firm inequality. For brevities sake the parts on their other research concerns will be mentioned, but not as in-depth as the parts that concern between-firm inequality.

Functional Statistics and Applications May 04 2021
This volume, which highlights recent advances in statistical methodology and applications, is divided into two main parts. The first part presents theoretical results on

estimation techniques in functional statistics, while the second examines three key areas of application: estimation problems in queuing theory, an application in signal processing, and the copula approach to epidemiologic modelling. The book's peer-reviewed contributions are based on papers originally presented at the Marrakesh International Conference on Probability and Statistics held in December 2013.

Tubular Structures XV Apr 15 2022
Tubular Structures XV contains the latest scientific and engineering developments in the field of tubular structures, as presented at the 15th International Symposium on Tubular Structures (ISTS15, Rio de Janeiro, Brazil, 27-29 May 2015). The International Symposium on Tubular Structures (ISTS) has a long-standing reputation for being the principal

TALIS 2018 Results (Volume I) Teachers and School Leaders as Lifelong

Learners Nov 29 2020
The OECD Teaching and Learning International Survey (TALIS) is the largest international survey asking teachers and school leaders about their working conditions and learning environments, and provides a barometer of the profession every five years. Results from the 2018 cycle explore and examine the various dimensions of teacher and school leader professionalism across education systems.

Typed Lambda Calculi and Applications Jun 05 2021
This book constitutes the refereed proceedings of the 11th

International Conference on Typed Lambda Calculi and Applications, TLCA 2013, held in Eindhoven, The Netherlands, in June 2013 as part of RDP 2013, the 7th Federated Conference on Rewriting, Deduction, and Programming, together with the 24th International Conference on Rewriting Techniques and Applications, RTA 2013, and several related events. The 15 revised full papers presented were carefully reviewed and selected from 41 submissions. The papers provide prevailing research results on all current aspects of typed lambda calculi, ranging from theoretical and methodological issues to applications in various contexts addressing a wide variety of topics such as proof-theory, semantics, implementation, types, and programming.

ECRM2013-Proceedings of the 12th European Conference on Research Methods Feb 25 2023

Google Semantic Search in Ireland. Personalisation, Trust, Influence, Reliance, Reputation, and Ethics Jul 18 2022 Master's Thesis from the year 2015 in the subject Communications - Public Relations, Advertising, Marketing, Social Media, grade: First Class Honours, , course: Masters Degree in Digital Marketing - Semantic

Search Personalisation, language: English, abstract: This research is an investigation into the Irish public's perception of Google search. The study examines the methods used by Google to present users with the most relevant and satisfactory search results. 95% of the online public in Ireland use Google as a search tool. This study aims to uncover true user sentiment in Ireland. The objectives of this research are to reveal how the Irish public view Google in regards to semantic search personalisation, trust, influence, reliance, reputation, and ethics. The existing literature revealed that Google's search engine has evolved from, one that used Boolean Search logic to match keywords, to a semantic engine that understands user intent and context. The literature also reveals how the younger 'Millennial' generation associate the Internet with one brand, Google. The literature examines search personalisation and how intuitive it has become as it serves us with content that matches our online behaviour. We discover that over-personalisation is narrowing our search bubble which in turn can blind us from other information outside our search reach. During the course of this study, a mixed method research was used to measure and discuss public opinion. This study has identified where literature has fallen short. Where gaps have appeared in the literature, qualitative meaning has been extracted

from 3 groups of people from differing levels of technical ability and experience. It was discovered that age demographic affects how we view Google as a search engine. Quantitative findings revealed that 75% of users were aware of personalisation but 70% of these users were not always happy with the results. Although a general consensus was formed that personalisation was helpful in many respects, it was also argued, in some camps, that it breached ethical boundaries. Overall, there was a national split whether users considered personalisation ethical or not. This study leaves open the debate of how we perceive Google as a nation but it also gets closer to the truth of how we feel about the search engine on a personal level. The research also confirms that there is plenty of opportunity to carry out further studies into this area.

Global Assessment Report on Disaster Risk Reduction 2013 Feb 01 2021 This publication is the third biennial report coordinated by the United Nations Office for Disaster Risk Reduction (UNISDR). The first and second reports focused primarily on public policy and the role of national and local governments in disaster risk reduction. This current report explores why increasing disaster risks represent a growing problem for the economic and business community at different scales. It examines how paradoxically business investments that aimed to strengthen competitiveness and

productivity may have inadvertently contributed to increasing risks. This report seeks to engage businesses in a dialogue on disaster risk management that goes beyond the current emphasis on response and preparedness and instead identifies opportunities for the creation of shared value for business and society.

WGP Congress 2013 Sep 08 2021 Volume is indexed by Thomson Reuters CPCI-S (WoS). The German Academic Society for Production Engineering is an association of leading German professors of production engineering. The „WGP Jahreskongress“ has the aim to foster young researchers by giving the opportunity to publish their research results under their own name exclusively and discuss these results with each other during the meeting. The 46 peer reviewed papers are grouped as follows: Chapter 1: Assembly; Chapter 2: Cutting and Grinding; Chapter 3: Forming; Chapter 4: Machines; Chapter 5: Organization.

Forest Products Annual Market Review 2012-2013 Nov 17 2019 This publication provides general and statistical information on forest products markets and related policies in Europe, North America and the Commonwealth of Independent States. The Review begins with an overview chapter, followed by analysis of government and industry policies and market-based implements affecting

forest products markets. The third chapter is on innovation in the forest sector. Five chapters are based on annual country-supplied statistics, describing: wood raw materials, sawn softwood, sawn hardwood, wood-based panels, and paper, paperboard and wood pulp. Additional chapters discuss markets for wood energy, value-added wood products, and housing. In each chapter, production, trade and consumption are analyzed and relevant material on specific markets is included. Tables and graphs provided throughout the text present summary information.

Selected Papers from the 5th International Symposium on Mycotoxins and Toxigenic Moulds: Challenges and Perspectives

Oct 29 2020 This book is a printed edition of the Special Issue "Selected Papers from the 5th International Symposium on Mycotoxins and Toxigenic Moulds: Challenges and Perspectives" that was published in *Toxins* [Emerging Technologies in Computing](#) Dec 19 2019 This book constitutes the refereed conference proceedings of the First International Conference on Emerging Technologies in Computing, iCEtiC 2018, held in London, UK, in August 2018. The 26 revised full papers were reviewed and selected from more than 59 submissions and are organized in topical sections covering Cloud, IoT

and distributed computing, software engineering, communications engineering and vehicular technology, AI, expert systems and big data analytics, Web information systems and applications, security, database system, economics and business engineering, mLearning and eLearning.

Research Handbook on Innovation Governance for Emerging Economies Feb 19 2020 Although in recent years some emerging economies have improved their performance in terms of R&D investment, outputs and innovative capacity, these countries are still blighted by extreme poverty, inequality and social exclusion. Hence, emerging countries are exposed to conditions which differ quite substantially from the dominant OECD model of innovation policy for development and welfare. This Research Handbook contributes to the debate by looking at how innovation theory, policy and practice interact, and explains different types of configurations in countries that are characterized by two contrasting but mutually reinforcing features: systemic failure and resourcefulness. Focusing on innovation governance and public policies, it aims to understand related governance failures and to explore options for alternative, more efficient approaches.
