Deception in Honolulu Mar 24 2020 Book 2 of The Bryant Family Chronicles begins with a daring car chase through the streets of Sarasota. When it ends, people are dead. But why did this chase start in the first place? The Sarasota Police Department starts its investigation. While this is underway, the Bryant Family head to Hawaii to help their long-time friend on a mysterious string of murders in Honolulu. The friend that requested their help is the Honolulu Police. The Bryant's use their unique skill sets and hi-tech gear to search for clues. Eventually they discover an artifact from 1884 has a connection with several of the victims. A powerful Chinese triad also has interest in the artifact for various reasons. The Bryant family soon gets the triad's radar and chaos soon erupts. During all of this, the Bryant girls are working closely with some handsome male team members and romance stirs. But will they get to explore these relationships or will the friction with the triad end any chance of happiness...or their lives? This fictional story is based on true current events and on historical events. Great effort was taken in researching and listing the facts around the Hawaiian Royal family in the 1880's and 90's. The science mentioned in the book is state-of-the-art, and is developed in part by the author's own technology company.

Hunt for the Skinwalker May 26 2020 The author of the controversial bestseller Brain Trust brings his scientific expertise to the chilling true story of unexplained phenomena on Utah's Skinwalker Ranch -- and challenges us with a new vision of reality. For more than fifty years, the bizarre events at a remote Utah ranch have ranged from the perplexing to the wholly terrifying. Vanishing and mutilated cattle. Unidentified Flying Objects. The appearance of otherworldly creatures. Invisible objects emitting magnetic fields with the power to spark a cattle stampede. Flycatcher light with dazzling maneuverability and lethal consequences. For one family, life on the Skinwalker Ranch had become life under siege by an unknown enemy or enemies. Nothing else could explain the horrors that surrounded them -- perhaps science could. Leading a first-class team of research scientists on a disturbing odyssey into the unknown, Kelleher spent hundreds of days and nights on the Skinwalker property and experienced firsthand many of its haunting mysteries. With investigative reporter George Knapp -- the only journalist allowed to witness and document the work -- Kelleher chronicles in superb detail the spectacular happenings the team observed personally, and the theories of modern physics behind the phenomena. Far from the coldly detached findings one might expect, their conclusions are utterly hair-raising in their implications. Opening a door to the unseen world around us, Hunt for the Skinwalker is a clarion call to expand our vision far beyond what we know.

The Fall of the Philippines Oct 19 2019 The soldier reading these pages would do well to reflect on the wisdom of the statement exhibited in a Japanese shrine: "Woe unto him who has not tasted defeat." Victory too often leads to overconfidence and erases the memory of mistakes. Defeat brings into sharp focus the causes that led to failure and provides a fruitful field of study for those soldiers and laymen who seek in the past lessons for the future. The general and the informed citizen reading these pages will realize that our military means as well as our estimates and plans must always be in balance with our long-range national policy. This lesson - signposted by the Battle of Manila Bay; the Treaty of Paris, signed in December 1898 when we decided to keep the Philippines; the Washington Conference of 1921; the Manchurian Crisis of 1931 - we ignored before Pearl Harbor. The result was defeat on the field of battle and the loss of the Philippine Islands. The author of *The Fall of the Philippines*, Louis Morton, served overseas as a historical officer in the South Pacific area and in the Philippines during World War II. Since 1945, he has been chief of the Pacific History Section, Office of the Chief of Military History, Department of the Army. He holds a Doctor of Philosophy degree from Duke University, is the author of a volume on American colonial history, and has written a number of articles dealing with military affairs. Work on this volume was begun in 1947. The reader may gain some idea of the size of the task of writing this history by an appraisal of *The Sources*. Parent Child Journey May 18 2022 Author, pediatrician, and developmental-behavioral expert Dan Shapiro, MD, dives into his new parenting guide, Parent Child Journey, into ten different "miles." Each mile represents an interactive session that brings you closer to understanding your child's behavior and learning effective strategies. The first mile includes "Gander," an assessment tool Shapiro developed to help describe your child's developmental profile-and yours too. Respecting the different learning styles of children and parents, he presents the Gander in a variety of ways: as a rating scale with explanatory text, but also as a picture, a song, and a map. Then, Shapiro takes parents through the other sessions, continuing to present his evidence-based training program as a uniquely creative integration of session discussion, real-life vignettes, richly illustrated fable, worksheets, and homework assignments. Throughout Parent Child Journey, Shapiro emphasizes, "Just because your child's behavior may be complicated, does not mean it is incomprehensible." Parent Child Journey combines serious help with whimsical presentation-supporting and teaching parents, even as it engages and entertains. With this comprehensive new guide, Shapiro reassures parents that they are not alone on this journey.
