of university language centres has changed in recent decades. Initially conceived as laboratories for practical and autonomous language-learning, they are now considered as places with more specific and complex functions in language teaching and learning. University language centres now constitute networks for exchanging knowledge and know-how in order to respond to ever-changing, multilingual and multicultural contexts. At the same time, the availability and acquisition of new technologies is contributing to the creation of new tools for the provision of appropriate services and training. This collection covers a wide range of topics related to the activities, experiences and applied research carried out in Italian university language centres. It provides further evidence of the important role university language centres play in promoting language expertise, developing tools and adopting digital resources, and providing support and training for language teaching. Technology, creativity, methodologies and plurilingualism are key topics in the book as they constitute the essential ingredients for effective and successful language teaching and learning. The volume's thirty-three chapters provide multi-perspective approaches, showing how the real contexts of current language education need the integration of theoretical backgrounds with the best practices resulting from practical experience. Labour Law and Sustainable Development is a detailed reconstruction of the regulatory framework and jurisprudential findings of sustainable development at the international, European and national level. The global crisis of the past decade has underlined the social unsustainability of the ultra-liberalistic theories through which the labour law deregulation represents the precondition for social and economic development coherent with the globalization imperatives. It is no exaggeration to assert that the

existing foundations of labour law have been irreversibly compromised. It is essential to find a way out of the crisis, at the same time defining the founding values of new sustainable labour law. In linking labour law with the sustainability paradigm, this provocative book promises to widen the scope and terms of the reconciliation of interests, taking into account the multiplicity of the stakeholders interested in economic, social and environmental issues and, in particular, to practise an approach that achieves intergenerational equity. What's in this book: In an unprecedented comparative study, including case law, of the network of principles, agreements, practices and norms concerning sustainable development and its different economic and social implications, the author examines such facets as the following: sustaining solidarity and equality of opportunity in current and emerging work situations; enhancing individual autonomy in the current world of (subordinate but independent) labour; reconciling personal needs, flexible organization of companies and reduction of external and internal costs to companies; collective action for the regulation of labour relations allowing for the exercise of individual autonomy; involving entire populations that have been so far excluded in the world scene; developing a sustainable pension system to promote intergenerational solidarity; implementing flexicurity policies positively; social clauses of international trade treaties; undoing the profound contradiction of gender and wage inequalities; and promoting corporate social responsibility. The objective of this book is to provide the reader with a reasoning basis to assess whether the choice to elect sustainable development as a new paradigm of reference for labour law is feasible, and if, in particular, this choice can be useful in order to define the founding values of a new 'sustainable' labour law.

How this will help you: Using an interdisciplinary approach, the author emphasizes the need to consider the various dimensions of sustainability together, not only the original environmental but also the economic and social dimensions. This book offers a real strategic leap for both legislators and social actors, in particular leading the way to avoiding a fracture of the generational pact that has held together modern societies. Although the book presents a profound academic contribution to the analysis of labour law realities and trends, it will also be welcomed by corporate lawyers, judges, human rights experts, trade unionists, business managers, entrepreneurs and consultants interested in the issues of labour, sustainable development and social rights. In a world where diversity and pluralism are indispensable values for the balanced progress of international law, knowledge of the contribution that each State makes to the formation and development of international norms is increasingly important for both scholars and practitioners. "The Italian Yearbook of International Law" aims at making accessible to the English-speaking public the Italian contribution to the practice and literature of international law. "The" "Yearbook" is organised into three main sections. The first contains doctrinal contributions featuring articles on the European human rights system and its relation to customary international law, on international control of bribery and mergers, and on the problem of accountability for gross violations of human rights. The second section covers the Italian practice in the areas of 1) judicial decisions (including the important decisions in the "Ocalan" and "Cermis" cases), 2) diplomatic and parliamentary practice, 3) treaty practice, and 4) national legislation. Relevant materials are presented by way of introductory notes and concise legal analysis. The third part of

the volume contains a systematic bibliographical index of Italian literature in the field of international law. The volume ends with an analytical index for ready consultation. La presente Guida Pratica 2022 ha come obiettivo affrontare e risolvere - alla luce della normativa, della prassi interpretativa e delle pronunce giurisprudenziali - le questioni più complesse della gestione amministrativa e giuslavoristica del rapporto di lavoro. In particolare, il volume recepisce le principali normative del 2021 e quelle emanate fino a Marzo 2022, come ad esempio le disposizioni del Decreto Sostegni-ter (D.L. 27 gennaio 2022, n. 4) e le istruzioni degli istituti ministeriali e previdenziali. A seguito del graduale superamento dello stato emergenziale, la maggior rilevanza all'interno di questa edizione è attribuita alla Legge di Bilancio 2022, che dal 1° gennaio 2022 interviene in modo strutturale in materia di riduzione del carico fiscale mediante la riformulazione dell'IRPEF e mediante la riforma degli ammortizzatori sociali. Ulteriore tema di notevole rilievo consiste nell'introduzione, a partire dal 1° marzo 2022, dell'assegno unico e universale e i suoi relativi riflessi su altri istituti. The first part of the book reviews the multi-level system of protection currently operating in Europe and its constitutional implications. The Charter is analysed from a legal, political and practical standpoint. The activity of the European Parliament as a fundamental rights actor will also be examined, as well as the right to a fair trial and to effective judicial protection before and by the EU Courts. The second part of the volume addresses the impact of a binding Charter on specific areas of EU Law. The order in which the contributions have been set out reflects the structure of the Treaty on the functioning of the European Union: free circulation of persons; the internal market; the area of freedom security and justice (civil and criminal aspects);

social rights protection; environmental policy; enlargement; international trade and the Common Foreign and Security Policy. Market volatility and uncertainty have put welfare and social security policies back centre stage and point up the need for closer links with employment policy. The inability of existing income support systems to respond to the increasing fragmentation of people's working careers, the needs of people in difficulty, and the spread of various forms of poverty calls for well-coordinated and efficient responses. This volume highlights the best practices in the various regions of the world in the contexts of international and EU labour law, industrial relations, and social security. Authoritative reports by leading scholars of labour law and social security – originally presented at the twenty-second World Congress of the International Society for Labour and Social Security Law (ISLSSL) held in Turin in September 2018 – cover the following research themes in depth: – informal workers; – migrant workers; – global trade and labour; – organization, productivity, and well-being at work; – transnational collective agreements; – new forms of social security; and – the role of the State and industrial relations. In its insistence that, despite the radical changes in the world of work and business brought about by globalization and digital technologies, the decisions of institutions and public and private actors can lead to a more coherent system of international economic and social governance, this timely volume shows the way forward. Practitioners, policymakers, and scholars in the relevant fields will benefit immeasurably from its expert analyses and recommendations. The 8th International Symposium "Monitoring of Mediterranean Coastal Areas. Problems and Measurements Techniques" was organized by CNR-IBE in collaboration with FCS Foundation, and Natural

History Museum of the Mediterranean and under the patronage of University of Florence, Accademia dei Geofili, Tuscany Region and Livorno Province. It is the occasion in which scholars can illustrate and exchange their activities and innovative proposals, with common aims to promote actions to preserve coastal marine environment. Considering Symposium interdisciplinary nature, the Scientific Committee, underlining this holistic view of Nature, decided to celebrate Alexander von Humboldt; a nature scholar that proposed the organic and inorganic nature's aspects as a single system. It represents a sign of continuity considering that in-presence Symposium could not be carried out due to the COVID-19 pandemic restrictions. Subjects are related to coastal topics: morphology; flora and fauna; energy production; management and integrated protection; geography and landscape, cultural heritage and environmental assets, legal and economic aspects. Questo libro offre una prospettiva da cui osservare molte delle grandi potenzialità del sapere psicologico applicato al mondo sanitario, e offre la giusta voce con cui portarlo all'attenzione di chi non lo conosce ancora, o di chi già lo conosce, e vuole, The 2013 annual conference of the Italian Society of Agricultural Economics (SIDEA) has been held in the attractive scenario of the city of Lecce under the organization of three different Universities of the Apulia Region (Università degli Studi di Bari, Università degli Studi di Foggia and Università del Salento). The scientific theme of the 50th SIDEA Conference has been "Sustainability of the agri-food system: Strategies and Performances" (Sostenibilità del Sistema Agroalimentare: strategie e performance). With such a topic, the SIDEA intended to cope with the challenges coming from a growing demand of food in a world where critical natural resources such as water,

energy and land are becoming increasingly scarce and climate change is posing credible threats. The agri-food system and the broader bio-based economy are, in fact, human activities where the classic dimensions of sustainability (ecological, economic and social) are gaining a striking weight often showing evidence of frictions. Despite a significant growth in food production over the past century, today one of the most important challenges facing agro-food system is how to feed a growing population.

Each book will be written by a team of generalist EU lawyers and experts in the relevant field, bringing together perspectives from a wide range of different Member States in order to compare and analyse the effect of EU law on domestic legal systems and practice. The first volume focuses on the uneasy relationship between the economic freedoms enshrined in Articles 49 and 56 TFEU and the right of workers to take collective action. This conflict has been at the forefront of EU labour law since the CJEU's much-discussed decisions in C-438/05 Viking and C-341/05 Laval, as well as the Commission's more recent attempts at legislative reforms in the failed Monti II Regulation. Viking, Laval and

Beyond explores judicial and legislative responses to these measures in 10 Member States, and finds that the impact on domestic legal systems has been much more varied than traditional accounts of EU law would suggest. La nuova Guida Pratica Contenzioso del lavoro e previdenziale giunta alla seconda edizione, completamente rivista ed aggiornata, la Guida Pratica Contenzioso del lavoro e previdenziale intende continuare a fornire a professionisti e aziende uno strumento di fondamentale importanza per affrontare e risolvere i numerosi nodi problematici collegati alle controversie di lavoro e previdenziali. La descrizione in modo analitico degli istituti si accompagna ad una complessiva opera di revisione del contenuto, mediante la riformulazione di interi paragrafi e il necessario aggiornamento, in ragione delle numerose novità normative e giurisprudenziali intervenute in quest'ultimo anno. Viene comunque mantenuta viva l'attenzione sulle varie questioni e sui temi che riguardano il contenzioso sia nella fase amministrativa (soprattutto nelle vicende che riguardano l'attività ispettiva, gli illeciti amministrativi e gli obblighi contributivi) che nella fase giudiziale, dove il rito del lavoro e previdenziale è trattato secondo una prospettiva dinamica, aperta anche agli istituti processuali minori e ai riti alternativi. This book offers an in-depth exploration into the current educational climate and the impact of these policy measures for Roma people in seven Western and Southern European countries and seeks to raise awareness of this forgotten minority and to assess the policies implemented to integrate the Roma people into the education system. Starting from the assertion that crisis is part of the essence of labour law, this volume brings together researchers in the field who accepted the challenge to critically reflect on this branch of the discipline. As the COVID-19

pandemic has had a global impact, labour law across the world must come to terms with a new reality. In this context, it would be prudent to adapt to new circumstances by taking known paths. To this end, this book reflects on what effectively constitutes labour law, considering questions which are not usual within labour law. Insights from philosophical, sociological and even economic standpoints are mobilised to reconcile the past with the future of labour law. The book discusses how labour law and welfare systems will be affected by the ongoing transformation of work. The first section considers demography from two different perspectives. On the one hand, it focuses on chronic diseases and their impact on work, emphasising the role and the regulation of welfare systems. On the other, attention is given to youth unemployment and to those forms of employment which might have an impact on young people. Section II touches upon the relationship between the environment and industrial relations, while the third part broaches the topic of the impact of technology in the context of the Fourth Industrial Revolution, also known as Industry 4.0. As such, this volume provides an exhaustive picture of the changes currently underway, considering all the aspects which will affect work now and in the future. This volume provides an overview of research on seemingly, current and former peripheral areas and on processes of peripheralisation in Europe. Particular emphasis is given to questions of local and regional governance, to multiple actors of peripheralisation and residential revitalisation as well as to economic and ecological transformations. -- 365.633
