In addition to focusing on SL approaches to intervention, this book is organized around common poor reader profiles that have been identified in research. The chapters in this volume are written by experts who are well known as researchers but who are also highly skilled at writing for practitioners. Chapters were written with a strong foundation of research that is summarized, but with a concentration on translating research into practice, including case studies, sample intervention activities, and lesson plans. Each chapter includes application activities at the end to check for and extend readers' understanding"-- This highly practical resource and text presents
