**The Ancient Jewish Shroud at Turin** Oct 17 2019 An examination of the Shroud of Turin as an archaeological textile. The investigation reveals that the Shroud is an ancient Jewish tallit design before A.D. 66.

**Exo-Vaticana** Jun 05 2021 Project L.U.C.I.F.E.R.and the vatican's astonishing plan for the arrival of an alien savior.

Extraterrestrials in the Catholic Imagination Feb 13 2022 What do scientists know about the possibility of life outside our solar system? How does Catholic science fiction imagine such

worlds? What are the implications for Catholic thought? This collection brings together leading scientists, philosophers, theologians, and science fiction authors in the Catholic tradition to examine these issues. In the first section, Christian scientists detail the latest scientific findings regarding the possibility of life on exoplanets. The second part brings together leading Catholic science fiction authors who describe how "alien" life forms have been prevalent in the Catholic imagination from the Middle Ages right up to the present day. In the final section, Catholic philosophers and theologians examine the implications of discovering intelligent life elsewhere in the universe. Rather than worrying that the discovery of intelligent extraterrestrials might threaten the dignity of humans or their existence, the contributors here maintain that such creatures should be welcomed as fellow creatures of God and potential subjects of divine salvation.

Intelligent Design Apr 22 2020 Years ago, everybody knew that the earth was flat. Everybody knew that the sun revolved around the earth. Today, everybody knows that life on earth is the result of random evolution and/or a supernatural God. Or is it? In "Message from the Designers" Rael presents us with a third option: that all life on earth was created by advanced scientists from another world. During a UFO encounter in 1973 he was dictated a series of messages, face to face, by one of these designers. The result is what lies within these pages - an astonishing revelation for mankind.

**The Heavens Proclaim** Jun 17 2022 In honor of the International Year of Astronomy and the 400th anniversary of Galileo Galilei's first astronomical observations, the Vatican and its century-old Observatory present "The Heavens

Proclaim," an incredible demonstration of the beauty of the universe and the Catholic Church's role in its exploration.

**Vast Universe** Oct 21 2022 If we have learned anything from recent advances in cosmology and astronomy, it is that we have only barely begun to comprehend the vastness of our universe and all that it contains. For Christians, this raises some fascinating questions: If there are intelligent beings out there, what would be their relationship to what Christianity claims is a special history on Earth of life with God? Would the fact of persons on other planets banish or modify our understanding of God? Would it reduce the importance of Jesus? What role might goodness and evil play in extraterrestrial civilizations? Might God have incarnated himself among other races of creatures, as he became incarnate as Jesus among us? Respectful of the sciences that disclose the reality of the universe, Thomas O'Meara wonders about good and evil, intelligence and freedom, revelation and life as they might exist in other galaxies. In this book, one possible aspect of the universe we live in meets the perspective of Christian revelation.

**The Hidden Universe** Aug 27 2020 From aliens or ghosts to the djinn, electric-voice phenomenon and UFO abductions, this book is the most comprehensive and enlightening survey ever made of encounters with the Others. Since our very beginnings, human beings from all civilisations across the globe have encountered the Others - intelligent, self-motivated beings that are clearly not human in their origins. This book offers the most comprehensive survey ever made of such otherworldly visitors, from gods, angels, demons and djinns to hobgoblins, poltergeists and ghosts to UFOs and aliens. In addition to fully detailing the history of these encounters, the book attempts a bold explanation (never before undertaken) of the true nature of these beings. The book will explore the increasingly frequent "entheogen" encounters facilitated by substances such as dimethyltryptamine, ayahuasca, 5-Meo-DMT and LSD, as well as the beings encountered by individuals suffering from Alzheimer's-related Charles Bonnet Syndrome, young children's non-corporeal companions, and the seemingly independent beings met during lucid dreaming and near-death and out-of-body experiences.

This book continues Anthony Peake's work in developing a completely original model of reality based upon an amalgamation of ancient belief systems, subjective human experiences of the extraordinary, and the latest discoveries of neurology, neurochemistry, quantum mechanics and cosmology. This model proposes that consciousness, far from being simply an accident of evolution, is the actual root source of the material universe. It suggests that at its most basic level everything that is seemingly physical is rendered into existence by consciousness.

**The Eyes of the Sphinx** Sep 08 2021 The world-famous bestseller Chariots of the Gods introduced the theory that ancient Earth had established contact with aliens. Now, Erich von Däniken's The Eyes of the Sphinx reveals startling evidence that could prove it. Erich von Däniken's theory of alien contact with the ancient world is so incredible, yet so logical and convincing, that it has become part of a wide-ranging debate that continues to this day. His claims that an alien race helped create the pyramids of Egypt were based upon the ruins themselves. And it is these ruins that now provide researchers with a never-ending source of clues, compelling discoveries, revelations, and evidence that Earth was indeed colonized by an alien race.

**You Are a Spiritual Being Having a Human Experience** Dec 11 2021 Too many people allow themselves to be limited by their ideas about themselves and the world around them. Bob Frissell reminds readers that they create their own reality through their consciousness and that improving this reality and living a fuller life is simply a matter of broadening one's perspectives. In this book, he shows people how to reconnect with their multidimensional selves and remake their lives.

**Would You Baptize an Extraterrestrial?** Feb 25 2023 Witty and thought provoking, two Vatican astronomers shed provocative light on some of the strange places where religion and science meet. "Imagine if a Martian showed up, all big ears and big nose like a child's drawing, and he asked to be baptized. How would you react?" —Pope Francis, May, 2014 Pope Francis posed that question—without insisting on an answer!—to provoke deeper reflection about inclusiveness and diversity in the Church. But

it's not the first time that question has been asked. Brother Guy Consolmagno and Father Paul Mueller hear questions like that all the time. They're scientists at the Vatican Observatory, the official astronomical research institute of the Catholic Church. In *Would You Baptize an Extraterrestrial?* they explore a variety of questions at the crossroads of faith and reason: How do you reconcile the The Big Bang with Genesis? Was the Star of Bethlehem just a pious religious story or an actual description of astronomical events? What really went down between Galileo and the Catholic Church—and why do the effects of that confrontation still reverberate to this day? Will the Universe come to an end? And... could you really baptize an extraterrestrial? With disarming humor, Brother Guy and Father Paul explore these questions and more over the course of six days of dialogue. *Would You Baptize an Extraterrestrial?* will make you laugh, make you think, and make you reflect more deeply on science, faith, and the nature of the universe.

**American Cosmic** Apr 15 2022 More than half of American adults and more than seventy-five percent of young Americans believe in intelligent extraterrestrial life. This level of belief rivals that of belief in God. *American Cosmic* examines the mechanisms at work behind the thriving belief system in extraterrestrial life, a system that is changing and even supplanting traditional religions. Over the course of a six-year ethnographic study, D.W. Pasulka interviewed successful and influential scientists, professionals, and Silicon Valley entrepreneurs who believe in extraterrestrial intelligence, thereby disproving the common misconception that only fringe members of society believe in UFOs. She argues that widespread belief in aliens is due to a number of factors including their ubiquity in modern media like *The X-Files*, which can influence memory, and the believability lent to that media by the search for planets that might support life. *American Cosmic* explores the intriguing question of how people interpret unexplainable experiences, and argues that the media is replacing religion as a cultural authority that offers believers answers about non-human intelligent life.

*Would You Baptize an Extraterrestrial?* Jan 24

2023 Witty and thought provoking, two Vatican astronomers shed provocative light on some of the strange places where religion and science meet. "Imagine if a Martian showed up, all big ears and big nose like a child's drawing, and he asked to be baptized. How would you react?" —Pope Francis, May, 2014 Pope Francis posed that question—without insisting on an answer!—to provoke deeper reflection about inclusiveness and diversity in the Church. But it's not the first time that question has been asked. Brother Guy Consolmagno and Father Paul Mueller hear questions like that all the time. They're scientists at the Vatican Observatory, the official astronomical research institute of the Catholic Church. In *Would You Baptize an Extraterrestrial?* they explore a variety of questions at the crossroads of faith and reason: How do you reconcile the The Big Bang with Genesis? Was the Star of Bethlehem just a pious religious story or an actual description of astronomical events? What really went down between Galileo and the Catholic Church—and why do the effects of that confrontation still reverberate to this day? Will the Universe come to an end? And... could you really baptize an extraterrestrial? With disarming humor, Brother Guy and Father Paul explore these questions and more over the course of six days of dialogue. *Would You Baptize an Extraterrestrial* will make you laugh, make you think, and make you reflect more deeply on science, faith, and the nature of the universe.

*Science, Religion, and Mormon Cosmology* May 04 2021 Merrill, who urged a unique vision of reality that shaped a Mormon eschatology. He shows how authorities eventually retreated from the perception of reality as "true" and adopted a scientifically less secure position in order to protect their theology, an eventuality which ultimately resulted in a reactionary response to science within Mormonism.

*The UFO That Took Jesus* Nov 10 2021 Where did Jesus really go after he ascended? Will he come back? The answers to these questions might not be what you expect. Our understanding of the life of Jesus and who he was is completely wrong. What if Jesus came to teach humanity about a truth that we were not prepared for? As our scientific knowledge

improves, so does our understanding of the past, and in this book, the hidden secret about Jesus' identity is revealed for the first time. The implications of this truth could change how we perceive our origins, our future and why we are here... Dive into this ground-breaking book and find out for yourself what the Church Fathers kept hidden from us and don't want you to know! This book is prefaced by a revised, edited, new edition of the previous work 'Lost Secret: Jesus the Extraterrestrial'.

*Turn Left at Orion* Nov 17 2019 With over 100,000 copies sold since first publication, this is one of the most popular astronomy books of all time. It is a unique guidebook to the night sky, providing all the information you need to observe a whole host of celestial objects. With a new spiral binding, this edition is even easier to use outdoors at the telescope and is the ideal beginner's book. Keeping its distinct one-object-per-spread format, this edition is also designed for Dobsonian telescopes, as well as for smaller reflectors and refractors, and covers Southern hemisphere objects in more detail. Large-format eyepiece views, positioned side-by-side, show objects exactly as they are seen through a telescope, and with improved directions, updated tables of astronomical information and an expanded night-by-night Moon section, it has never been easier to explore the night sky on your own. Many additional resources are available on the accompanying website, [www.cambridge.org/turnleft](http://www.cambridge.org/turnleft).

*Abducted* Feb 01 2021 They are tiny. They are tall. They are gray. They are green. They survey our world with enormous glowing eyes. To conduct their shocking experiments, they creep in at night to carry humans off to their spaceships. Yet there is no evidence that they exist at all. So how could anyone believe he or she was abducted by aliens? Or want to believe it? To answer these questions, psychologist Susan Clancy interviewed and evaluated "abductees"--old and young, male and female, religious and agnostic. She listened closely to their stories--how they struggled to explain something strange in their remembered experience, how abduction seemed plausible, and how, having suspected abduction, they began to recollect it, aided by suggestion and hypnosis. Clancy argues that abductees are sane

and intelligent people who have unwittingly created vivid false memories from a toxic mix of nightmares, culturally available texts (abduction reports began only after stories of extraterrestrials appeared in films and on TV), and a powerful drive for meaning that science is unable to satisfy. For them, otherworldly terror can become a transforming, even inspiring experience. "Being abducted," writes Clancy, "may be a baptism in the new religion of this millennium." This book is not only a subtle exploration of the workings of memory, but a sensitive inquiry into the nature of belief.

*Who Built the Moon?* Mar 14 2022 The authors of *Civilization One* return, bringing new evidence about the Moon that will shake up our world. Christopher Knight and Alan Butler realized that the ancient system of geometry they presented in their earlier, breakthrough study works as perfectly for the Moon as it does the Earth. On further investigation, they found a consistent sequence of beautiful integer numbers when looking at every major aspect of the Moon--no such pattern emerges for any other planet or moon in the solar system. In addition, Knight and Butler discovered that the Moon possesses few or no heavy metals and has no core--something that should not be possible. Their persuasive conclusion: if higher life only developed on Earth because the Moon is exactly what it is and where it is, it becomes unreasonable to cling to the idea that the Moon is a natural object. The only question that remains is, who built it?

*Would You Baptize an Extraterrestrial?* Nov 22 2022 Witty and thought provoking, two Vatican astronomers shed provocative light on some of the strange places where religion and science meet. "Imagine if a Martian showed up, all big ears and big nose like a child's drawing, and he asked to be baptized. How would you react?"--Pope Francis, May, 2014 Pope Francis posed that question - without insisting on an answer! - to provoke deeper reflection about inclusiveness and diversity in the Church. But it's not the first time that question has been asked. Brother Guy Consolmagno and Father Paul Mueller hear questions like that all the time. They're scientists at the Vatican Observatory, the official astronomical research institute of the Catholic Church. In *Would You Baptize an*

Extraterrestrial? they explore a variety of questions at the crossroads of faith and reason: How do you reconcile the The Big Bang with Genesis? Was the Star of Bethlehem just a pious religious story or an actual description of astronomical events? What really went down between Galileo and the Catholic Church? and why do the effects of that confrontation still reverberate to this day? Will the Universe come to an end? And could you really baptize an extraterrestrial? With disarming humor, Brother Guy and Father Paul explore these questions and more over the course of six days of dialogue. *Would You Baptize an Extraterrestrial* will make you laugh, make you think, and make you reflect more deeply on science, faith, and the nature of the universe.

*Nature and Grace* Feb 19 2020 Conventional wisdom has it that thinking on nature and grace among Roman Catholic intellectuals between the sixteenth century and the eve of Vatican II was severely clouded by the work of Cajetan and his fellow Thomistic commentators. Henri de Lubachas rightly been given credit for pointing this out; and to all appearances, de Lubac's influence won the day, as can be seen by the imprint of his thought upon not just the Second Vatican Council, but also the pontific cates of John Paul II and Benedict XVI. In recent years, however, a new crop of Thomistic scholars has arisen who question whether de Lubac's word on nature and grace should be the last; hence, the debate over the nature-grace relation, so heated in the mid-twentieth century, has been stirred once again. Andrew Dean Swafford here offers a 'third way' by way of the nineteenth-century German theologian, Matthias J. Scheeben, who has been neglected in academic appraisals of the subject until now. Swafford shows that Scheeben captures the very best of both sides, while at the same time avoiding the characteristic pitfalls so often alleged against each.

**Finding God in the Universe** May 16 2022 How does a scientist find God in the universe? *Finding God in the Universe* is the personal reflection of a Jesuit brother and astronomer, the director of the Vatican Observatory. Br. Guy Consolmagno, SJ, insists that science is more than observing the universe; it's learning how to pay attention, how to concentrate on one aspect while setting aside, at least momentarily, all the

other interesting aspects that can distract us from a deeper knowledge of the universe--or of God. In his telling, joy is our compass, truth is our goal, and imagination weaves the story where we situate the joy that leads us to truth. Most importantly, both science and theology are done within a community of fellow seekers, where we share the stories that teach us how to explore, and with whom we can try to make sense of what we think we have found. In the *My Theology* series, the world's leading Christian thinkers explain some of the principal tenets of their theological beliefs in concise, pocket-sized books.

**Approaching "Would You Baptize an Alien?"** Apr 03 2021

**Would You Baptize an Extraterrestrial?** Dec 23 2022 Witty and thought provoking, two Vatican astronomers shed provocative light on some of the strange places where religion and science meet. "Imagine if a Martian showed up, all big ears and big nose like a child's drawing, and he asked to be baptized. How would you react?" —Pope Francis, May, 2014 Pope Francis posed that question—without insisting on an answer!—to provoke deeper reflection about inclusiveness and diversity in the Church. But it's not the first time that question has been asked. Brother Guy Consolmagno and Father Paul Mueller hear questions like that all the time. They're scientists at the Vatican Observatory, the official astronomical research institute of the Catholic Church. What really went down between Galileo and the Catholic Church—and why do the effects of that confrontation still reverberate to this day? Will the Universe come to an end? And... could you really baptize an extraterrestrial? With disarming humor, Brother Guy and Father Paul explore these questions and more over the course of six days of dialogue. *Would You Baptize an Extraterrestrial* will make you laugh, make you think, and make you reflect more deeply on science, faith, and the nature of the universe.

**Cold-Case Christianity** Oct 09 2021 Written by an L. A. County homicide detective and former atheist, Cold-Case Christianity examines the claims of the New Testament using the skills and strategies of a hard-to-convince criminal investigator. Christianity could be defined as a "cold case": it makes a claim about an event from the distant past for which there is little forensic evidence. In Cold-Case Christianity, J. Warner Wallace uses his nationally recognized skills as a homicide detective to look at the evidence and eyewitnesses behind Christian beliefs. Including gripping stories from his career and the visual techniques he developed in the courtroom, Wallace uses illustration to examine the powerful evidence that validates the claims of Christianity. A unique apologetic that speaks to readers' intense interest in detective stories, Cold-Case Christianity inspires readers to have confidence in Christ as it prepares them to articulate the case for Christianity.

**Archaeology, Anthropology, and Interstellar Communication** Jan 12 2022 Addressing a field that has been dominated by astronomers, physicists, engineers, and computer scientists, the contributors to this collection raise questions that may have been overlooked by physical scientists about the ease of establishing meaningful communication with an extraterrestrial intelligence. These scholars are grappling with some of the enormous challenges that will face humanity if an information-rich signal emanating from another world is detected. By drawing on issues at the core of contemporary archaeology and anthropology, we can be much better prepared for contact with an extraterrestrial civilization, should that day ever come.

**Searching for Stars on an Island in Maine** Jun 24 2020 As a physicist, Alan Lightman has always held a scientific view of the world. But one summer evening, while looking at the stars from a small boat at sea, Lightman was overcome by the overwhelming sensation that he was merging with something larger than himself—an eternal unity, something absolute and immaterial. The result is an inspired, lyrical meditation from the acclaimed author of Einstein's Dreams that explores these seemingly contradictory impulses. Lightman draws on sources ranging from Saint Augustine's

conception of absolute truth to Einstein's theory of relativity, and gives us a profound inquiry into the human desire for truth and meaning, and a journey along the different paths of religion and science that become part of that quest. This small but provocative book explores the tension between our yearning for certainty and permanence versus the modern scientific view that all things in the physical world are uncertain and impermanent.

**Albion's Seed** Oct 29 2020 This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are "Albion's Seed," no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.

The Impact of Discovering Life Beyond Earth Aug 19 2022 This book discusses the big questions about how the discovery of extraterrestrial life, whether intelligent or microbial, would impact society and humankind.

**The Physics of Immortality** Aug 07 2021 Is there a higher power in the universe? What happens to us when we die? Leading physicist Frank J. Tipler tackles these questions and more in an astonishing and profoundly important book that scientifically proves the existence of God and the physical resurrection of the dead.

Jesus from Outer Space Mar 02 2021 The earliest Christians believed Jesus was an ancient celestial being who put on a bodysuit of flesh, died at the hands of dark forces, and then rose from the dead and ascended back into the heavens. But the writing we have today from that first generation of Christians never says

where they thought he landed, where he lived, or where he died. The idea that Jesus toured Galilee and visited Jerusalem arose only a lifetime later, in unsourced legends written in a foreign land and language. Many sources repeat those legends, but none corroborate them. Why? What exactly was the original belief about Jesus, and how did this belief change over time? In *Jesus from Outer Space*, noted philosopher and historian Richard Carrier summarizes for a popular audience the scholarly research on these and related questions, revealing in turn how modern attempts to conceal, misrepresent, or avoid the actual evidence calls into question the entire field of Jesus studies--and present-day beliefs about how Christianity began.

**The Cosmic Zoo** Jan 20 2020 Are humans a galactic oddity, or will complex life with human abilities develop on planets with environments that remain habitable for long enough? In a clear, jargon-free style, two leading researchers in the burgeoning field of astrobiology critically examine the major evolutionary steps that led us from the distant origins of life to the technologically advanced species we are today. Are the key events that took life from simple cells to astronauts unique occurrences that would be unlikely to occur on other planets? By focusing on what life does - it's functional abilities - rather than specific biochemistry or anatomy, the authors provide plausible answers to this question. Systematically exploring the various pathways that led to the complex biosphere we experience on planet Earth, they show that most of the steps along that path are likely to occur on any world hosting life, with only two exceptions: One is the origin of life itself - if this is a highly improbable event, then we live in a rather "empty universe". However, if this isn't the case, we inevitably live in a universe containing a myriad of planets hosting complex as well as microbial life - a "cosmic zoo". The other unknown is the rise of technologically advanced beings, as exemplified on Earth by humans. Only one technological species has emerged in the roughly 4 billion years life has existed on Earth, and we don't know of any other technological species elsewhere. If technological intelligence is a rare, almost unique feature of Earth's history, then there can be no visitors to the cosmic zoo other

than ourselves. Schulze-Makuch and Bains take the reader through the history of life on Earth, laying out a consistent and straightforward framework for understanding why we should think that advanced, complex life exists on planets other than Earth. They provide a unique perspective on the question that puzzled the human species for centuries: are we alone?

**The Happy Atheist** Nov 29 2020 On his popular science blog, Pharyngula, PZ Myers has entertained millions of readers with his infectious love of evolutionary science and his equally infectious disdain for creationism, biblical literalism, intelligent design theory, and other products of godly illogic. This funny and fearless book collects and expands on some of his most popular writings, giving the religious fanaticism of our times the gleeful disrespect it deserves by skewering the apocalyptic fantasies, magical thinking, hypocrisies, and pseudoscientific theories advanced by religious fundamentalists of all stripes. Forceful and articulate, scathing and funny, *The Happy Atheist* is a reaffirmation of the revelatory power of humor and the truth-revealing powers of science and reason.

*Will I See My Dog in Heaven?* Dec 31 2020 A Universal Question, thoughtfully answered! What do you think: Will we see our dogs and cats in the hereafter? Does God's plan for eternity include the created nonhuman world?

Franciscan friar and popular writer Father Jack Wintz brings a love for all creation and infectious enthusiasm to the serious task of exploring answers to these long-asked questions, *In Will I See My Dog in Heaven?* Father Jack admits that no one really knows what God has in mind for us in the next life. But in ten thoughtful chapters, he lines up evidence from the Scriptures, Christian tradition and liturgy, and the life and teachings of St. Francis of Assisi, that God desires all creatures (yes, including our beloved pets!) in the afterlife.

**Brother Astronomer** Sep 20 2022 Publisher Fact Sheet The unexpected scientific & spiritual adventures of a Vatican astronomer.

[Solving the Communion Enigma](#) Jul 26 2020 The bestselling author probes the ultimate significance behind today's increasing reports of UFOs, alien abductions, crop circles, and other unexplained phenomena--and what they mean for

humanity's immediate future. In 1987 writer Whitley Strieber exposed the world to the truth about alien abduction in his landmark memoir, *Communion*. For the first time in years, Strieber revisits his encounter with alien intelligences—but now dramatically widens his search to explore how "the visitors" connect with today's persistent and globe-spanning reports of anomalous phenomena, such as crop circles, cattle mutilations, UFO sightings, alien abductions, near-death experiences, close encounters, and unexplained bodily implants. In his magisterial style, Strieber contextualizes these bizarre and unsettling reports with his own childhood memories of strange schools, sinister experiments, and family secrets. In exploring today's most convincing cases of unexplained phenomena, Strieber reasons that they are not unrelated events. Nor are they the result of mass delusion. In some of his most persuasive writing, Strieber argues that the wave of mysterious episodes marks a transition that humanity is undergoing right now. Against all conscious understanding, we are experiencing a broadened awareness of dimensions of reality that exist beyond our current perceptions.

*Rulers of the Earth* Jul 06 2021 "Dr. Lewels serves as an exponent of both logos and mythos: scholar/scientist, when he evaluates historical documents; and as mystic/hypnotist when he experiences the spiritual reality of the secret teachings of Jesus." "The reader is taken on an easy-to-read, but challenging journey: to the past, when the sons of God created humanity; in the present, as he revisits the Dead Sea Scrolls in Qumran; and to the future, when humanity awakens to the apocalyptic significance of UFO events." *Rulers of the Earth* is the complete companion to *The God Hypothesis*. Dr. Lewels has gifted both his higher self and humanity with the opportunity to experience the Law of Karma through the cycle of reincarnation and by revealing the arrival of a new age of consciousness." -Leo Sprinkle, Ph.D., counseling psychologist "Kudos to Joe Lewels for opening up this explosive dialogue so few dare to touch: the reincarnation of the original Jesus contingency, not only living among us today with their memories intact, but in secret contact with our extraterrestrial visitors." -

Marcia Schafer, award winning author *Confessions of an Intergalactic Anthropologist* "Three separate times in the New Testament (Matthew 12:31, Mark 3:28, and Luke 12:10), Jesus states that every sin can be forgiven, even blasphemy against Him, but that speaking against the Holy Spirit can never be forgiven. In John 15:26, we learn that the Holy Spirit is the source of truth. Joe Lewels reaches for this truth in his new book *Rulers of the Earth*. Join Lewels on an amazing and uplifting journey toward truth about Jesus, Christianity, Essenes, UFOs, history, religion, and spirituality. It's a fascinating and important trip." -Jim Marrs, New York Times best-selling author of *Alien Agenda* and *Rule by Secrecy* "It is a beautiful book. I have baptized it with tears throughout. Thank you!" -Command Sergeant Major Robert O. Dean (Ret) **Kant in the Land of Extraterrestrials** Mar 22 2020 "Yes, Kant did indeed speak of extraterrestrials." This phrase could provide the opening for this brief treatise of philosophiction (as one speaks of science fiction). What is revealed in the aliens of which Kant speaks—and he no doubt took them more seriously than anyone else in the history of philosophy—are the limits of globalization, or what Kant called cosmopolitanism. Before engaging Kantian considerations of the inhabitants of other worlds, before comprehending his reasoned alienology, this book works its way through an analysis of the star wars raging above our heads in the guise of international treaties regulating the law of space, including the cosmopirates that Carl Schmitt sometimes mentions in his late writings. Turning to track the comings and goings of extraterrestrials in Kant's work, Szendy reveals that they are the necessary condition for an unattainable definition of humanity. Impossible to represent, escaping any possible experience, they are nonetheless inscribed both at the heart of the sensible and as an Archimedean point from whose perspective the interweavings of the sensible can be viewed. Reading Kant in dialogue with science fiction films (films he seems already to have seen) involves making him speak of questions now pressing in upon us: our endangered planet, ecology, a war of the worlds. But it also means attempting to think, with or beyond Kant, what a point of view might be.

*Physics Made Simple* May 24 2020 Understand the rules that make the universe run. Understanding the laws of physics is essential for all scientific studies, but many students are intimidated by their complexities. This completely revised and updated book makes it easy to understand the most important principles. From the physics of the everyday world to the theory of relativity, **PHYSICS MADE SIMPLE** covers it all. Each chapter is introduced by anecdotes that directly apply the concepts to contemporary life and ends with practice problems—with complete solutions—to reinforce the concepts. Humorous illustrations and stories complete the text, making it not only easy but fun to learn this important science. Topics covered include: \*force \*motion \*energy \*waves \*electricity and magnetism \*the atom \*quantum physics \*relativity \*spectroscopy \*particle physics Look for these Made Simple titles Accounting Made Simple Arithmetic Made Simple Astronomy Made Simple Biology Made Simple Bookkeeping Made Simple Business Letters Made Simple Chemistry Made Simple English Made Simple Earth Science Made Simple French Made Simple German Made Simple Ingles Hecho Facil Investing Made Simple Italian Made Simple Keyboarding Made Simple Latin Made Simple Learning English Made Simple Mathematics Made Simple The Perfect Business Plan Made Simple Philosophy Made Simple Psychology Made Simple Sign Language Made Simple Spelling Made Simple Statistics Made Simple Your Small Business Made Simple [www.broadwaybooks.com](http://www.broadwaybooks.com)

**Faith Versus Fact** Sep 27 2020 “A superbly argued book.” —Richard Dawkins, author of *The God Delusion* The New York Times bestselling author of *Why Evolution is True* explains why any attempt to make religion compatible with science is doomed to fail In this provocative book, evolutionary biologist Jerry A. Coyne lays out in clear, dispassionate detail why the toolkit of science, based on reason and empirical study, is reliable, while that of religion—including faith, dogma, and revelation—leads to incorrect, untestable, or conflicting conclusions. Coyne is

responding to a national climate in which more than half of Americans don't believe in evolution, members of Congress deny global warming, and long-conquered childhood diseases are reappearing because of religious objections to inoculation, and he warns that religious prejudices in politics, education, medicine, and social policy are on the rise. Extending the bestselling works of Richard Dawkins, Daniel Dennett, and Christopher Hitchens, he demolishes the claims of religion to provide verifiable “truth” by subjecting those claims to the same tests we use to establish truth in science. Coyne irrefutably demonstrates the grave harm—to individuals and to our planet—in mistaking faith for fact in making the most important decisions about the world we live in. *Praise for Faith Versus Fact: “A profound and lovely book . . . showing that the honest doubts of science are better . . . than the false certainties of religion.”* —Sam Harris, author of *The End of Faith*

**God's Mechanics** Jul 18 2022 Brother Guy Consolmagno, scientist and Vatican astronomer, sees past the differences between science and religion and embraces the connections between them. In this volume, he explores the way scientists and engineers reconcile these two seemingly divergent world views.

**Secret Places of the Lion** Dec 19 2019 Early traditions speak of the arrival of “radiant beings from heaven,” self-sacrificing guardians of the human race who have reincarnated as pivotal figures in the panorama of human history to assist in the work of evolution. *Secret Places of the Lion* shows how these “great ones” have helped mankind for thousands of years, hiding their secrets in tombs, caverns, temple ruins, and catacombs. Posing as wanderers, they would declare universal wisdom and truth at certain periods of history when people were prepared to receive it; then they would withdraw for a time to see what was done with the new-found knowledge. Thus, the rises and plateaus of our cultural history emerged. Classic in the UFO field. Many years after his death, the author still has a devoted following.
