patriotism. Then the phone rings, and a woman with whom he once shared a life of violence and desire claims her daughter is missing--and Jason is the one man who can find her. The #1 New York Times bestseller by Senator Al Franken, author of Giant of the Senate Al Franken, one of our "savviest satirists" (People), has been studying the rhetoric of the Right. He has listened to their cries of "slander," "bias," and even "treason." He has examined the GOP's policies of squandering our surplus, ravaging the environment, and alienating the rest of the world. He's even watched Fox News. A lot. And, in this fair and balanced report, Al bravely and candidly exposes them all for what they are: liars. Lying, lying liars. Al destroys the liberal media bias myth by doing what his targets seem incapable of: getting his facts straight. Using the Right's own words against them, he takes on the pundits, the politicians, and the issues, in the most talked about book of the year. Timely, provocative, unfailingly honest, and always funny, Lies sticks it to the most right-wing administration in memory, and to the right-wing media hacks who do its bidding. Watch the news, and it's easy to be overwhelmed by snippets of badly presented science: information that's incomplete, confusing, contradictory, out-of-context, wrong, or flat-out dishonest. In this book, Dr. Sherry Seethaler provides a "bag of tricks" for making sense of science in the news. You'll learn how to think more sensibly about everything from mad cow disease to global warming and make better science-related decisions in both your personal life and as a citizen. You'll begin by understanding how science really works and progresses, and why scientists sometimes disagree. Seethaler helps you assess the possible biases of those who make scientific claims in the media, and place scientific issues in appropriate context, so you can intelligently assess tradeoffs. You'll learn how to determine whether a new study is really meaningful; uncover the difference between cause and mere coincidence; figure out which statistics mean something, and which don't. Finally, drawing on her extensive*

experience as a science journalist, she reveals the tricks self-interested players use to mislead and confuse you, and points you to sources of information you can actually rely upon. Seethaler's many examples range from genetic engineering of crops to drug treatments for depression, but the techniques she teaches you will be invaluable in understanding any scientific controversy, in any area of science or health. Now an original series on Hulu! YOU NEVER FORGET YOUR WORST. "A twisted modern love story" (Parade), Tell Me Lies is a sexy, thrilling novel about that one person who still haunts you—the other one. The wrong one. The one you couldn't let go of. The one you'll never forget. Lucy Albright is far from her Long Island upbringing when she arrives on the campus of her small California college and happy to be hundreds of miles from her mother—whom she's never forgiven for an act of betrayal in her early teen years. Quickly grasping at her fresh start, Lucy embraces college life and all it has to offer. And then she meets Stephen DeMarco. Charming. Attractive. Complicated. Devastating. Confident and cocksure, Stephen sees something in Lucy that no one else has, and she's quickly seduced by this vision of herself, and the sense of possibility that his attention brings her. Meanwhile, Stephen is determined to forget an incident buried in his past that, if exposed, could ruin him, and his single-minded drive for success extends to winning, and keeping, Lucy's heart. Lucy knows there's something about Stephen that isn't to be trusted. Stephen knows Lucy can't tear herself away. And their addicting entanglement will have consequences they never could have imagined. Alternating between Lucy's and Stephen's voices, Tell Me Lies follows their connection through college and post-college life in New York City. "Readers will be enraptured" (Booklist) by the "unforgettable beauties in this very sexy story" (Kirkus Review). Here's how to convince others of your innocence **NATIONAL BESTSELLER** • The gripping story of Elizabeth Holmes and Theranos—one of the biggest corporate frauds in history—a tale of ambition and hubris set

amid the bold promises of Silicon Valley, rigorously reported by the prize-winning journalist. With a new Afterword. "Chilling ... Reads like a thriller ... Carreyrou tells [the Theranos story] virtually to perfection."

—The New York Times Book Review In 2014, Theranos founder and CEO Elizabeth Holmes was widely seen as the next Steve Jobs: a brilliant Stanford dropout whose startup "unicorn" promised to revolutionize the medical industry with its breakthrough device, which performed the whole range of laboratory tests from a single drop of blood. Backed by investors such as Larry Ellison and Tim Draper, Theranos sold shares in a fundraising round that valued the company at more than \$9 billion, putting Holmes's worth at an estimated \$4.5 billion. There was just one problem: The technology didn't work. Erroneous results put patients in danger, leading to misdiagnoses and unnecessary treatments. All the while, Holmes and her partner, Sunny Balwani, worked to silence anyone who voiced misgivings—from journalists to their own employees.

7 Little White Lies is a masterful analysis of the racist propaganda that people of African descent have lived with for generations. The propaganda has been so dominant, that few realize that it is still in play. The book focuses on outlining 7 of the most dangerous but common "mistruths". It describes how these misconceptions have metastasized into other popular notions, and then thoroughly defeats them. The text, which is scholarly written but accessible, expounds on these common lies:

1. Caucasians are the Original People
2. Ancient Africa Contributed Nothing to Civilization
3. The Ancient Egyptians were 'Caucasian'
4. Hebrew Slaves Built the Pyramids
5. Africans Were Savages When the Europeans Enslaved Them
6. Columbus Discovered America
7. Abraham Lincoln Freed the Slaves

Big Little Lies is a brilliant take on ex-husbands and second wives, mothers and daughters, schoolyard scandal, and the little lies that can turn lethal. This entertaining story for children aged 4-8 help children to explore how telling tricky truths is usually better than telling little lies. In a postfactual world in which claims are often held to be true only to the extent that they confirm pre-existing or partisan beliefs, this book asks crucial questions: how can we identify the many forms of untruthfulness in discourse? How can we know when their use is ethically wrong? How can we judge untruthfulness in the messiness of situated discourse? Drawing on pragmatics, philosophy, psychology, and law, All Bullshit and Lies? develops a comprehensive framework for analyzing untruthful discourse in situated context. TRUST, or Trust-related Untruthfulness in Situated Text, sees untruthfulness as encompassing not only deliberate manipulations of what is believed to be true (the insincerity of withholding, misleading, and lying) but also the distortions that arise from an irresponsible attitude towards the truth (dogma, distortion, and bullshit). Chris Heffer discusses times when truth is not "in play," as in jokes or fiction, as well as instances when concealing the truth can achieve a greater good. The TRUST framework demonstrates that untruthfulness becomes unethical in discourse, though, when it unjustifiably breaches the trust an interlocutor invests in the speaker. In addition to the theoretical framework, this book provides a clear, practical heuristic for analyzing discursive untruthfulness and applies it to such

cases of public discourse as the Brexit "battle bus," Trump's tweet about voter fraud, Blair and Bush's claims about weapons of mass destruction, and the multiple forms of untruthfulness associated with the Skripal poisoning case. In *All Bullshit and Lies?* Chris Heffer turns a critical eye to fundamental questions of truthfulness and trust in our society. This timely and interdisciplinary investigation of discourse provides readers a deeper theoretical understanding of untruthfulness in a postfactual world. A NEW YORK TIMES BESTSELLER New York Times 100 Notable Books of 2019 New York Public Library Best Books of 2019 Kirkus Reviews Best Health and Science Books of 2019 Science Friday Best Books of 2019 New postscript by the author From an award-winning journalist, an explosive narrative investigation of the generic drug boom that reveals fraud and life-threatening dangers on a global scale—*The Jungle for pharmaceuticals* Many have hailed the widespread use of generic drugs as one of the most important public-health developments of the twenty-first century. Today, almost 90 percent of our pharmaceutical market is comprised of generics, the majority of which are manufactured overseas. We have been reassured by our doctors, our pharmacists and our regulators that generic drugs are identical to their brand-name counterparts, just less expensive. But is this really true? Katherine Eban's *Bottle of Lies* exposes the deceit behind generic-drug manufacturing—and the attendant risks for global health. Drawing on exclusive accounts from whistleblowers and regulators, as well as thousands of pages of confidential FDA documents, Eban reveals an industry where fraud is rampant, companies routinely falsify data, and executives circumvent almost every principle of safe manufacturing to minimize cost and maximize profit, confident in their ability to fool inspectors. Meanwhile, patients unwittingly consume medicine with unpredictable and dangerous effects. The story of generic drugs is truly global. It connects middle America to China, India, sub-Saharan Africa and Brazil, and represents the ultimate litmus test of globalization: what are the risks of moving drug manufacturing offshore, and are they worth the savings? A decade-long investigation with international sweep, high-stakes brinkmanship and big money at its core, *Bottle of Lies* reveals how the

world's greatest public-health innovation has become one of its most astonishing swindles. An Economist Best Book of the Year A PBS NewsHour Book of the Year An Entrepreneur Top Business Book An Amazon Best Book of the Year in Business and Leadership New York Times Bestseller Foreword by Steven Pinker, author of The Better Angels of our Nature Blending the informed analysis of The Signal and the Noise with the instructive iconoclasm of Think Like a Freak, a fascinating, illuminating, and witty look at what the vast amounts of information now instantly available to us reveals about ourselves and our world—provided we ask the right questions. By the end of an average day in the early twenty-first century, human beings searching the internet will amass eight trillion gigabytes of data. This staggering amount of information—unprecedented in history—can tell us a great deal about who we are—the fears, desires, and behaviors that drive us, and the conscious and unconscious decisions we make. From the profound to the mundane, we can gain astonishing knowledge about the human psyche that less than twenty years ago, seemed unfathomable. Everybody Lies offers fascinating, surprising, and sometimes laugh-out-loud insights into everything from economics to ethics to sports to race to sex, gender and more, all drawn from the world of big data. What percentage of white voters didn't vote for Barack Obama because he's black? Does where you go to school effect how successful you are in life? Do parents secretly favor boy children over girls? Do violent films affect the crime rate? Can you beat the stock market? How regularly do we lie about our sex lives and who's more self-conscious about sex, men or women? Investigating these questions and a host of others, Seth Stephens-Davidowitz offers revelations that can help us understand ourselves and our lives better. Drawing on studies and experiments on how we really live and think, he demonstrates in fascinating and often funny ways the extent to which all the world is indeed a lab. With conclusions ranging from strange-but-true to thought-provoking to disturbing, he explores the power of this digital truth serum and its deeper potential—revealing biases deeply embedded within us, information we can use to change our culture, and the questions we're afraid to ask that might be essential to our health—both emotional and physical. All of us are touched by big data everyday,

and its influence is multiplying. Everybody Lies challenges us to think differently about how we see it and the world. Her Dark Lies by J.T. Ellison will be available Mar 09, 2021. Preorder your copy today This volume provides new insights on lying and (intentionally) misleading in and out of the courtroom, a timely topic for scholarship and society. Not all deceptive statements are lies; not every lie under oath amounts to perjury—but what are the relevant criteria? Taxonomies of falsehood

based on illocutionary force, utterance context and speakers' intentions have been debated by linguists, moral philosophers, social psychologists and cognitive scientists. Legal scholars have examined the boundary between actual perjury and garden-variety lies. The fourteen previously unpublished essays in this book apply theoretical and empirical tools to delineate the landscape of falsehood, half-truth, perjury, and verbal manipulation, including puffery, bluffing, and bullshit. The papers in this collection address conceptual and ethical aspects of lying vs. misleading and the correlation of this opposition with the Gricean pragmatic distinction between what is said and what is implicated. The questions of truth and lies addressed in this volume have long engaged the attention of scholars in linguistics, philosophy, psychology, cognitive science, organizational research, and the law, and researchers from all these fields will find this book of interest. This book, however, is fine as hell."—Sophia Amoruso, author of #Girlboss "The funniest cry for help you'll read this year."—BJ Novak Well, well, well. Look at you, ogling my book page....I presume if you're reading this it means you either need more encouragement to buy it or we used to date and you're trying to figure out if you should sue me or not. Here are all the stories and mistakes I've made that were way too embarrassing to tell on stage in front of an actual audience; but thanks to not-so-modern technology, you can read about them here so I don't have to risk having your judgmental eye contact crush my self-esteem. This book contains some delicious schadenfreude in which I recall such humiliating debacles as breaking my shoulder while trying to impress a guy, coming very close to spending my life in a Guatemalan prison, and having my lacerated ear sewn back on by a deaf guy after losing it in a torrid love affair. In addition to hoarding mortifying situations that'll make you feel way better about your choices, I've also accumulated a lot of knowledge from therapists, psychotherapists, and psychopaths, which can probably help you avoid making the same mistakes I've made. Think of this book as everything you'd want from the Internet all in one place, except

without the constant distractions of ads, online shopping, and porn. I'm not sure what else to say to say, except that you should buy it if you want to laugh and learn how to stop being crazy. And if we used to date, see you in court. From the author of the 20-million copy bestselling novel The Shack and the New York Times bestsellers Cross Roads and Eve comes a compelling exploration of the wrong-headed ideas we sometimes have and share about God. Wm. Paul Young has previously faced charges of heresy for the ways he vividly portray's God through his novels. Here he shares 33 commonly uttered things we say about God, revealing how they keep us from having a full, loving relationship with God. Using personal anecdotes and drawing on the touching comments from his readers of The Shack, Wm. Paul Young encourages readers to think anew about important issues, including sin, religion, hell, politics, identity, creation and human rights. In the process, he helps us discover God's deep and abiding love. In twelve essays, the author of Shizuko's Daughter, named a 1993 Best Book of the Year by The New York Times, describes being caught between the Japanese culture of her childhood and the America of her adulthood. As it was in Anna Karenina, Madame Bovary, and Othello, so it is in life. Most forms of private vice and public evil are kindled and sustained by lies. Acts of adultery and other personal betrayals, financial fraud, government corruption—even murder and genocide—generally require an additional moral defect: a willingness to lie. In Lying, best-selling author and neuroscientist Sam Harris argues that we can radically simplify our lives and improve society by merely telling the truth in situations where others often lie. He focuses on "white" lies—those lies we tell for the purpose of sparing people discomfort—for these are the lies that most often tempt us. And they tend to be the only lies that good people tell while imagining that they are being good in the process. NEW YORK TIMES BESTSELLER • The bestselling author of The Ruthless Elimination of Hurry equips readers to recognize and resist the lies that seek to rob them of peace and freedom. "Live No Lies is brilliant, deep, scriptural, and will equip you to face the enemy and fight."—Jennie Allen, New York Times bestselling author of Get Out of Your Head We are at war. Not with a foreign government or domestic terrorists or a creepy new artificial intelligence hell-bent on taking

over the world. No, it's a war we feel deep inside our own chests: we are at war with lies. The problem isn't so much that we tell lies but that we live them. We let them into our bodies, and they sabotage our peace. All around us in the culture and deep within our own body memories are lies: deceptive ideas that wreak havoc on our emotional health and spiritual well-being, and deceptive ideas about who God is, who we are, and what the good life truly is. The choice is not whether to fight or not fight, but whether we win or surrender. Ancient apprentices of Jesus developed a paradigm for this war; they spoke of the three enemies of the soul: the devil, the flesh, and the world. Live No Lies taps into this ancient wisdom from saints of the Way and translates the three enemies for the modern era, with all its secularism and sophistication. As a generation, we chuckle at the devil as a premodern myth, we are confused by Scripture's teaching on the flesh in an age where sensual indulgence is a virtue not a vice, and we have little to no category for the New Testament concept of the world. In this provocative and practical book, bestselling author John Mark Comer combines cultural analysis with spiritual formation. He identifies the role lies play in our spiritual deformation and lays out a strategic plan to overcome them. Do you feel the tug-of-war in your own heart, the inner conflict between truth and lies? The spirit and the flesh? The Way of Jesus and the world? It's time to start winning. It's time to live no lies...
