This thesis approaches the Milton Bradley Companys classic Game of Life as an object of both material culture and literary study, applying critical analysis and historical research to the 1860, 1960, 1982, 1991, and 2016 editions of the game to better understand social assumptions about morality and American adulthood. Each edition is first assessed as an artifact of literature, a readable object from which implications can be drawn about the respective societys expectations concerning adulthood and ethics. Next, historical research is conducted on the era surrounding each edition, providing context for each boards message and exploring whether or not the editions literary implications correlate to historical events. Milton Bradleys original game, the 1860 Checkered Game of Life, concerns itself primarily with

entertainment as an outlet for moral instruction, a focus consistent with the recorded history of the eighteenth-century United States; it elevates personal integrity as the catalyst for social success. Editions published after 1960 emphasize materialism and portray morality as a component of the American Dream, tying a player's financial gains to public morality by rewarding industry, perseverance, and healthy risk-taking. By 2016, the game shifts from the American Dream to a focus on personal affirmation and individualism, a change consistent with the mentality of an emerging millennial culture. No reading necessary to play. Meet the man behind the board games: Milton Bradley. Born in Maine in 1836, Milton Bradley moved with his family to the working-class city of Lowell, Massachusetts, at age 11. His early life consisted of several highs and lows, from graduating high school and attending Harvard to getting laid off and losing his first wife.

These experiences gave Bradley the idea for his first board game: The Checkered Game of Life. He produced and sold Life across the country and it quickly became a national sensation. Working with his company, the Milton Bradley Company, he continued to produce board games, crayons, and kid-friendly school supplies for the rest of his life. He is often credited as the father of board games, and the Milton Bradley Company has created Battleship, Jenga, Yahtzee, Trouble, and many more classic games. Discusses the life of Milton Bradley including his childhood, his training as a draftsman, the establishment of the Milton Bradley Company, and the games he and his company developed. Game Changer is the story of how a twenty-three-year-old waiter from Seattle had the outrageous dream of beating industry giants Milton Bradley and Mattel at their own game. With no experience, Rob Angel used his guts, drive, and intuition to create one of the most beloved board games of all time: Pictionary. Rob did it his way. He produced the first 1,000 games by hand in his tiny one-bedroom apartment, disrupted the market by selling to nontraditional retail outlets, and did countless demonstrations at the bottom of the escalator at Nordstrom-a store with no game department. Anything to succeed. Getting there wasn't easy; Rob had to navigate his way through production mishaps, cash flow troubles,

and countless copycats trying to scratch their way past Pictionary. Still, within three years, Pictionary became the bestselling board game in North America, and shortly after, the world. When Mattel acquired Pictionary in 2001, a staggering 38,000,000 games had been sold in 60 countries. In Game Changer, Rob shares the remarkable inside story of taking Pictionary from simple idea to iconic global brand by breaking rules and breaking records, never giving up or giving in, and working harder when most would walk away all while having the time of his life. Candid and compelling, Game Changer is as much a captivating memoir as it is a blueprint to personal and professional success." "Meet the man behind the board games: Milton Bradley.
