This book, which will be of interest to teachers, students and scholars of constitutional and business law, explains how, over the past 225 years, US Supreme Court decisions have enshrined corporations with fundamental constitutional rights

and transformed those rights from individual freedoms to corporate entitlements. This is a fascinating story that delineates which fundamental constitutional rights accorded to individuals have been extended to corporations and which have not, and parses the US Supreme Court decisions extending constitutional protections to corporations. The book also shows how the views of the Founders have been altered by these decisions, and demonstrates how corporations, like individuals, have used their constitutional protections to evade government regulations. Telling this story in a clear and uncomplicated way underscores how intriguing and compelling the ebb and flow and evolution and retreat of fundamental constitutional rights is, from the time of the Founders to the twenty-first century. An account of the 19th-century criminal justice system as a whole, from the crimes committed and the classification of offences to the different courts and their procedure. The author describes the stages of criminal prosecution -- committal, indictment, trial, verdict and punishment -- and the judges, lawyers and juries, highlighting the significant changes in the rules of evidence during the century. He looks at reform of the old system and assesses how far it was brought about by lawyers themselves and how far by external forces. Finally, he considers the fairness of the system, both as seen by

contemporaries and in modern times. Vol. 26- includes the report on the schools for the deaf and dumb in central and western Europe by Rev. George E. Day.
