Jewish and Non-Jewish Creators of "Jewish" Languages Jul 21 2020 The present volume brings together 34 articles that were published between 1964 and 2003 on Judaized forms of Arabic, Chinese, German, Greek, Persian, Portuguese, Slavic (including Modern Hebrew and Yiddish, two Slavic languages "relexified" to Hebrew and German, respectively), Spanish and Semitic Hebrew (including Ladino - the Ibero-Romance relexification of

Biblical Hebrew) and Karaite. The motivations for reissuing these articles are the convenience of having thematically similar topics appear together in the same venue and the need to update the interpretations, many of which have radically changed over the years. As explained in a lengthy new preface and in notes added to the articles themselves, the impetus to create strikingly unique Jewish ethnolects comes not so much from the creativity of the Jews but rather from non-Jewish converts to Judaism, in search (often via relexification) of a unique linguistic analogue to their new ethnoreligious identity. The volume should be of interest to students of relexification, of the Judaization of non-Jewish languages, and of these specific languages.

Thou Shalt Kill Dec 06 2021 Anna Geifman examines the explosion of terrorist activity that took place in the Russian empire from the years just prior to the turn of the century through 1917, a period when over 17,000 people were killed or wounded by revolutionary extremists. On the basis of new research, she argues that a multitude of assassination attempts, bombings, ideologically motivated robberies, and incidents of armed assault, kidnapping, extortion, and blackmail for party purposes played a primary role in the revolution of 1905 and early twentieth-century Russian political history in general.

Advances in Artificial Intelligence Oct 16 2022 This book constitutes the refereed proceedings of the 21st Conference of the Canadian Society for Computational Studies of Intelligence, Canadian AI 2008, held in Windsor, Canada, in May 2008. The 30 revised full papers presented together with 5 revised short papers were carefully reviewed and selected from 75 submissions. The papers present original high-quality research in all areas of Artificial Intelligence and apply historical AI techniques to modern problem domains as well as recent techniques to historical problem settings.

Art of the 20th century Aug 22 2020 The 20th century was a revolutionary period in art history. In the span of a few short years, Modernism exploded into being, disrupting centuries of classical figurative tradition to create something entirely new. This astoundingly thorough survey of art's modern era showcases all of the key artistic movements of the 20th century, from Fauvism to Pop Art, featuring illustrative examples of some of the most

renowned works of the era along with illuminating companion essays by expert critics and art historians. A vivid window into the collective psyche of the modern world's great artists, *Art of the 20th Century* is a must-have for any fan of contemporary art.

The Qualities of a Citizen Apr 10 2022 *The Qualities of a Citizen* traces the application of U.S. immigration and naturalization law to women from the 1870s to the late 1960s. Like no other book before, it explores how racialized, gendered, and historical anxieties shaped our current understandings of the histories of immigrant women. The book takes us from the first federal immigration restrictions against Asian prostitutes in the 1870s to the immigration "reform" measures of the late 1960s. Throughout this period, topics such as morality, family, marriage, poverty, and nationality structured historical debates over women's immigration and citizenship. At the border, women immigrants, immigration officials, social service providers, and federal judges argued the grounds on which women would be included within the nation. As interview transcripts and court documents reveal, when, where, and how women were welcomed into the country depended on their racial status, their roles in the family, and their work skills. Gender and race mattered. The book emphasizes the comparative nature of racial ideologies in which the inclusion of one group often came with the exclusion of another. It explores how U.S. officials insisted on the link between race and gender in understanding America's peculiar brand of nationalism. It also serves as a social history of the law, detailing women's experiences and strategies, successes and failures, to belong to the nation.

Alloying Feb 25 2021 *Alloying: Understanding the Basics* is a comprehensive guide to the influence of alloy additions on mechanical properties, physical properties, corrosion and chemical behavior, and processing and

manufacturing characteristics. The coverage considers "alloying" to include any addition of an element or compound that interacts with a base metal to influence properties. Thus, the book addresses the beneficial effects of major alloy additions, inoculants, dopants, grain refiners, and other elements that have been deliberately added to improve performance, as well the detrimental effects of minor elements or residual (tramp) elements included in charge materials or that result from improper melting or refining techniques. The content is presented in a concise, user-friendly format. Numerous figures and tables are provided. The coverage has been weighted to provide the most detailed information on the most industrially important materials.

Conference Papers Index Jan 15 2020 Monthly. Papers presented at recent meeting held all over the world by scientific, technical, engineering and medical groups. Sources are meeting programs and abstract publications, as well as questionnaires. Arranged under 17 subject sections, 7 of direct interest to the life scientist. Full programs of meetings listed under sections. Entry gives citation number, paper title, name, mailing address, and any ordering number assigned. Quarterly and annual indexes to subjects, authors, and programs (not available in monthly issues).

50 Practice Sets Indian Army CLERK/SKT Exam Jul 01 2021 Career in Indian Army has a place of dignity and passion among the youth. 'Join the Indian Army' series has been prepared to ensure the success of the candidates in written examination. 1. "50 Practice Sets for Indian Army clerk" deals with 'Indian Army Clerk' preparation. 2. Questions are prepared as per the prescribed syllabus. 3. Each practice set analyzes the difficulty level of the exam. 4. Variety of questions is given to give insights of examination pattern. "50 Practice Sets for Indian Army Clerk" have been carefully compiled for the aspirants to clear their doubts about the exam. Each practice set contains a good number and variety of questions to cover the entire syllabus as prescribed for the exam. All the questions have been prepared keeping in line with the difficulty level of the paper, which gives the exact feel of the exam. This book follows the exact pattern that helps the students to analyze their prepare level and boost their confidence.

Primary Productivity in the Sea Sep 22 2020 Primary productivity in the sea accounts for ~30% of the total global annual production. Holistic understanding of the factors determining marine productivity requires detailed knowledge of algal physiology and of hydrodynamics. Traditionally studies of aquatic primary productivity have

been conducted by workers in two major schools: experimental laboratory biology, and empirical field ecology. Here an attempt was made to bring together people from both schools to share information and concepts; each author was charged with reviewing his field of expertise. The scope of the Symposium is broad, which we feel is its strength. We gratefully acknowledge financial support from the Department of Energy, the United States Environmental Protection Agency, the National Oceanic and Atmospheric Administration, including the NMFS Northeast Fisheries Center and the MESA New York Bight Project. Thanks are due to Mrs. Margaret Dienes, without whose editorial skills this volume could not have been produced, and to Mrs. Helen Kondratuk as Symposium Coordinator. Finally, we wish to record our indebtedness to Dr. Alexander Hollaender for his tireless efforts and valuable advice in supporting all aspects of this Symposium.

New Trends in Coal Preparation Technologies and Equipment Jan 27 2021 First published in 2004.

Routledge is an imprint of Taylor & Francis, an informa company.

Asian/Pacific Islander American Women Jun 12 2022 A groundbreaking anthology devoted to Asian/Pacific Islander American women and their experiences Asian/Pacific Islander American Women is the first collection devoted to the historical study of A/PI women's diverse experiences in America. Covering a broad terrain from pre-large scale Asian emigration and Hawaii in its pre-Western contact period to the continental United States, the Philippines, and Guam at the end of the twentieth century, the text views women as historical subjects actively negotiating complex hierarchies of power. The volume presents new findings about a range of groups, including recent immigrants to the U.S. and understudied communities. Comprised of original new work, it includes chapters on women who are Cambodian, Chamorro, Chinese, Filipino, Hmong, Japanese, Korean, Native Hawaiian, South Asian, and Vietnamese Americans. It addresses a wide range of women's experiences— as immigrants, military brides, refugees, American born, lesbians, workers, mothers, beauty contestants, and community activists. There are also pieces on historiography and methodology, and bibliographic and video documentary resources. This groundbreaking anthology is an important addition to the scholarship in Asian/Pacific American studies, ethnic studies, American studies, women's studies, and U.S. history, and is a valuable resource for scholars and students. Contributors include: Xiaolan Bao, Sucheng Chan, Catherine Ceniza Choy, Vivian Loyola Dames, Jennifer Gee, Madhulika S. Khandelwal, Lili M. Kim, Nancy In Kyung Kim, Erika Lee,

Shirley Jennifer Lim, Valerie Matsumoto, Sucheta Mazumdar, Davianna Pomaika'i McGregor, Trinity A. Ordon, Rhacel Salazar Parreñas, Amy Ku'uleialoha Stillman, Charlene Tung, Kathleen Uno, Linda Trinh Võ, Judy Tzu-Chun Wu, Ji-Yeon Yuh, and Judy Yung.

Gendered Justice? May 11 2022 Built upon the foundations of women's real-life experiences, which have real-world implications, *Gendered Justice?* introduces a range of recommendations and implications for both policy and practice in the field of criminal justice.

The Physiological Measurement Handbook Aug 02 2021 The *Physiological Measurement Handbook* presents an extensive range of topics that encompass the subject of measurement in all departments of medicine. The handbook describes the use of instruments and techniques for practical measurements required in medicine. It covers sensors, techniques, hardware, and software as well as information on processing systems, automatic data acquisition, reduction and analysis, and their incorporation for diagnosis. Suitable for both instrumentation designers and users, the handbook enables biomedical engineers, scientists, researchers, students, health care personnel, and those in the medical device industry to explore the different methods available for measuring a particular physiological variable. It helps readers select the most suitable method by comparing alternative methods and their advantages and disadvantages. In addition, the book provides equations for readers focused on discovering applications and solving diagnostic problems arising in medical fields not necessarily in their specialty. It also includes specialized information needed by readers who want to learn advanced applications of the subject, evaluative opinions, and possible areas for future study.

Nuclear Weapons and Nonproliferation May 31 2021 Provides an overview of the world's nuclear weapons, including histories of countries that have nuclear programs, and biographies of individuals who have played a key role in nuclear weapon history.

The Terrorist's Dilemma Jan 07 2022 How do terrorist groups control their members? Do the tools groups use to monitor their operatives and enforce discipline create security vulnerabilities that governments can exploit? This title examines the great variation in how terrorist groups are structured.

Captives of Revolution Dec 26 2020 The Socialist Revolutionaries (SRs) were the largest political party in Russia in the crucial revolutionary year of 1917. Heirs to the legacy of the People's Will movement, the SRs were unabashed proponents of peasant rebellion and revolutionary terror, emphasizing the socialist transformation of the countryside and a democratic system of government as their political goals. They offered a compelling, but still socialist, alternative to the Bolsheviks, yet by the early 1920s their party was shattered and its members were branded as enemies of the revolution. In 1922, the SR leaders became the first fellow socialists to be condemned by the Bolsheviks as "counter-revolutionaries" in the prototypical Soviet show trial. In *Captives of the Revolution*, Scott B. Smith presents both a convincing account of the defeat of the SRs and a deeper analysis of the significance of the political dynamics of the Civil War for subsequent Soviet history. Once the SRs decided to openly fight the Bolsheviks in 1918, they faced a series of nearly impossible political dilemmas. At the same time, the Bolsheviks fatally undermined the revolutionary credentials of the SRs by successfully appropriating the rhetoric of class struggle, painting a simplistic picture of Reds versus Whites in the Civil War, a rhetorical dominance that they converted into victory over the SRs and any left-wing alternative to Bolshevik dictatorship. In this narrative, the SRs became a bona fide threat to national security and enemies of the people—a characterization that proved so successful that it became an archetype to be used repeatedly by the Soviet leadership against any political opponents, even those from within the Bolshevik party itself. In this groundbreaking study, Smith reveals a more complex and nuanced picture of the postrevolutionary struggle for power in Russia than we have ever seen before and demonstrates that the Civil War—and in particular the struggle with the SRs—was the formative experience of the Bolshevik party and the Soviet state.

Ryan's Retina E-Book Mar 29 2021 Through six outstanding and award-winning editions, *Ryan's Retina* has offered unsurpassed coverage of this complex subspecialty—everything from basic science through the latest research, therapeutics, technology, and surgical techniques. The fully revised 7th Edition, edited by Drs. Srinivas R. Sadda, Andrew P. Schachat, Charles P. Wilkinson, David R. Hinton, Peter Wiedemann, K. Bailey Freund, and David Sarraf, continues the tradition of excellence, balancing the latest scientific research and clinical correlations and covering everything you need to know on retinal diagnosis, treatment, development, structure, function, and pathophysiology. More than 300 global contributors share their knowledge and expertise to create the most

comprehensive reference available on retina today. Features sweeping content updates, including new insights into the fundamental pathogenic mechanisms of age-related macular degeneration, advances in imaging including OCT angiography and intraoperative OCT, new therapeutics for retinal vascular disease and AMD, novel immune-based therapies for uveitis, and the latest in instrumentation and techniques for vitreo-retinal surgery. Includes five new chapters covering Artificial Intelligence and Advanced Imaging Analysis, Pachychoroid Disease and Its Association with Polypoidal Choroidal Vasculopathy, Retinal Manifestations of Neurodegeneration, Microbiome and Retinal Disease, and OCT-Angiography. Includes more than 50 video clips (35 new to this edition) highlighting the latest surgical techniques, imaging guidance, and coverage of complications of vitreoretinal surgery. New videos cover Scleral Inlay for Recurrent Optic Nerve Pit Masculopathy, Trauma with Contact Lens, Recurrent Retinal Detachment due to PVR, Asteroid Hyalosis, and many more. Contains more than 2,000 high-quality images (700 new to this edition) including anatomical illustrations, clinical and surgical photographs, diagnostic imaging, decision trees, and graphs.

Death of a Suburban Dream Feb 20 2023 Compton, California, is often associated in the public mind with urban America's toughest problems, including economic disinvestment, gang violence, and failing public schools. Before it became synonymous with inner-city decay, however, Compton's affordability, proximity to manufacturing jobs, and location ten miles outside downtown Los Angeles made it attractive to aspiring suburbanites seeking single-family homes and quality schools. As Compton faced challenges in the twentieth century, and as the majority population shifted from white to African American and then to Latino, the battle for control over the school district became symbolic of Compton's economic, social, and political crises. *Death of a Suburban Dream* explores the history of Compton from its founding in the late nineteenth century to the present, taking on three critical issues—the history of race and educational equity, the relationship between schools and place, and the complicated intersection of schooling and municipal economies—as they shaped a Los Angeles suburb experiencing economic and demographic transformation. Emily E. Straus carefully traces the roots of antagonism between two historically disenfranchised populations, blacks and Latinos, as these groups resisted municipal power sharing within a context of scarcity. Using archival research and oral histories, this complex narrative reveals how increasingly racialized poverty and violence made Compton, like other inner-ring suburbs, resemble

a troubled urban center. Ultimately, the book argues that Compton's school crisis is not, at heart, a crisis of education; it is a long-term crisis of development. Avoiding simplistic dichotomies between urban and suburban, *Death of a Suburban Dream* broadens our understanding of the dynamics connecting residents and institutions of the suburbs, as well as the changing ethnic and political landscape in metropolitan America.

The Qualities of a Citizen Mar 09 2022 *The Qualities of a Citizen* traces the application of U.S. immigration and naturalization law to women from the 1870s to the late 1960s. Like no other book before, it explores how racialized, gendered, and historical anxieties shaped our current understandings of the histories of immigrant women. The book takes us from the first federal immigration restrictions against Asian prostitutes in the 1870s to the immigration "reform" measures of the late 1960s. Throughout this period, topics such as morality, family, marriage, poverty, and nationality structured historical debates over women's immigration and citizenship. At the border, women immigrants, immigration officials, social service providers, and federal judges argued the grounds on which women would be included within the nation. As interview transcripts and court documents reveal, when, where, and how women were welcomed into the country depended on their racial status, their roles in the family, and their work skills. Gender and race mattered. The book emphasizes the comparative nature of racial ideologies in which the inclusion of one group often came with the exclusion of another. It explores how U.S. officials insisted on the link between race and gender in understanding America's peculiar brand of nationalism. It also serves as a social history of the law, detailing women's experiences and strategies, successes and failures, to belong to the nation.

Sports Analytics Aug 14 2022 This book is a collection of applications of analytic techniques to a number of popular sports including baseball, basketball, hockey, Jai Alai, NFL football and horseracing. We focus on both the statistics of the sporting events and betting strategies on the events. The subject is fascinating as there are many twists and subtle complicated decisions. Sports analytics applies mathematical and statistical methods to important questions in the structure and performance of sporting activities using the same basic methods and approaches as data analysts in other disciplines. Sports games and events are a fruitful area for study and to evaluate betting strategies as there is extensive data and mean reversion. With prices changing continuously, risk

arbitrage bets can be made. Moreover, little errors, like a penalty to a player or an error in a call by a referee, can change the score of a game and corresponding betting prices. The collection and analysis of in-game data can inform players, coaches and staff on effective decision making during sporting events. Novel features of the book include: an analysis of who were the greatest baseball batters; analyses of the players most important to team success (and they are not necessarily the best players) in basketball, NFL football and hockey; a tutorial on risk arbitrage and its applications to NFL football and NBA basketball; a discussion of many ad hoc decision rules by coaches and players and what was really optimal; in the racing section we discuss breeding, the analysis of various bets like the Rainbow and ordinary Pick 6, a discussion and betting on the most important races and a visit to the Breeders' Cup with Ed Thorp to demonstrate the place and show system in action.

Teaching Primary Science Feb 08 2022 This second edition brings science subject knowledge and pedagogy together to support, inform and inspire those training to teach primary science. Written in a clear and accessible way, the book provides comprehensive coverage of science themes. Ideas for teaching and examples from practice provide a basis for inspiring children to explore science and look at the world in new and intriguing ways.

An Overview Of, U.S. Federal, Coal Preparation Research Nov 05 2021

Mn Manganese Oct 12 2019 Of system-number "Manganese", Part B, which describes the Element Manganese, has been completed. Also completed is Part C, describing the compounds, with 10 volumes. Part A will present the history and occurrence of manganese. Volume A 1 on the history has already been published, the other volumes dealing with occurrence of manganese are in preparation. Part D is devoted to the coordination compounds. Part D 1, D 2, D 3, D 4, D 5 and D 6 thereof are already available. The present volume "Manganese D 7" continues the description of the coordination compounds. Complexes with nitriles, with nitro-hydrocarbons, and with ligands containing sulfur, selenium or tellurium are described. Many of the coordination compounds containing sulfur are of analytical or biological interest. A formula index lists the ligands and the empirical formulas.

Thiazole and Its Derivatives Oct 04 2021 The Chemistry of Heterocyclic Compounds, since its inception, has been recognized as a cornerstone of heterocyclic chemistry. Each volume attempts to discuss all aspects – properties, synthesis, reactions, physiological and industrial significance – of a specific ring system. To keep the series up-to-date, supplementary volumes covering the recent literature on each individual ring system have been published. Many ring systems (such as pyridines and oxazoles) are treated in distinct books, each consisting of separate volumes or parts dealing with different individual topics. With all authors are recognized authorities, the Chemistry of Heterocyclic Chemistry is considered worldwide as the indispensable resource for organic, bioorganic, and medicinal chemists.

Entangled in Terror Nov 24 2020 In the winter of 1909, a political bombshell exploded in tsarist Russia. Scandal swept not only the empire but the entire world with the exposure of the secret life of one man. Newspaper headlines introduced him as a "twentieth-century Judas," and since his initiation to the most notorious villains' club, his name, Evno Filipovich Azef, has remained in the Russian tradition as a synonym for scandalous duplicity, unscrupulous perfidy, and criminal provocation. His story is inseparable from the history of the Russian Socialist-Revolutionary party (PSR) and the terrorism that plagued the tsarist regime in the first decade of the twentieth century. More than 17,000 people were killed or wounded throughout the empire between 1905 and 1910 as a result of political assassination attempts alone. The use of undercover police spies to infiltrate oppositionist groups was a primary means of combatting terrorist activity. Enter Evno Azef, a man who, before being reviled by Socialist-Revolutionary party leaders as a traitorous double agent, would spend fifteen years inside the PSR, the largest terrorist organization in Russia. A man who would rise to a position of prominence in the party's Central Committee, and become one of the most trusted leaders of its famous terrorist arm, the SR Combat Organization: Evno Azef, Russian master spy. A thorough investigation based on all available documentary resources-available for the first time due to the Soviet government's demise-Entangled in Terror: The Azef Affair and the Russian Revolution sorts out the facts of the case from rumors and legends. Entangled in Terror explores the background and history of the radical SR party and its Combat Organization, the course of Azef's career, his role within the party, and the extent and frequency of his contacts with the secret police. The book evaluates the consequences of the Azef affair for the party, for the Russian revolutionary movement, and for

terrorism in Russia. Finally, Entangled in Terror examines
